And may I say one thing more. These Administrators are all serving at a salary of One Dollar per year. It is, I believe, a splendid commentary on the unselfishness of Canada's effort in this war that we are able to find and enlist the services of those who without remuneration are willing to give their high ability to this country in our hour of need. May I say too that it is some tribute to the high regard in which the Wartime Prices and Trade Board is held that it has been able, in this hour of national emergency, to elicit such services, and to obtain for Canada the advantage of having men who are most competent and public spirited and have outstanding qualifications that fit them for the task in which they are engaged.

I have endeavoured to give you a necessarily sketchy outline of a few of the matters with which the Wartime Prices and Trade Board has dealt during the three months Canada has been at war. No one realizes more than I do how incomplete the picture is. But it will, I trust, illustrate the important functions which this Board is asked to perform, and indicate the problems which the Board is daily called upon to face—as well as, I hope, the general principles which it has adopted in performing those functions and in facing those problems.

That it will play an important part during the war in preventing the development of exorbitant prices and preventing undue profits in the necessaries of life is, I believe, quite obvious.

In The Aftermath Of War

It may be regarded by some as premature to consider the aftermath of the war. The first and all compelling purpose of the people of Canada is to win this war. That purpose is one which must run through all our national action and govern all our national life.

But without detracting one jot or tittle from our dedication to this high purpose, it is essential that we give some consideration to the aftermath of war—to the time when our soldiers, whether of the land, the sea, or the air are demobilized; when our industrial workers are no longer required for the production of implements of war; when finally we are released from the scourge of war and we have to return to the more normal conditions of our economic life.

It is with this in view that I suggest that what is not so obvious about the Board's work is the important part which it will inevitably play "when the war drums beat no longer and the battle flags are furled." For the experience of the last war clearly demonstrates that high prices, high wages, high costs—produced by the artificial stimulus of war—have a very definite and a very painful reaction when we return to the normal and unstimulated economic levels.

One of the main purposes which this Board will serve is this; by maintenance of fair and reasonable prices during the war time period, we will not wear the false face of false prosperity during that period on the one hand; but, on the other hand, we will not have to endure the severe pains of economic contraction.

While the Board may be fairly regarded as a Board to protect consumers, its influence should be much wider than that. It will be of advantage to our wage earners in maintaining a sound basis of the cost of living and in maintaining real as against nominal wages. It will be of advantage to our producers in the stabilizing of the prices of their products and in eliminating the unfortunate and precipitate fall which inevitably follows an unregulated advance. It will be of advantage to all our citizens in that its tendency is to bring order out of chaos and stability out of confusion.

Such interferences with normal life as have been set up are to the end that all of our resources may be marshalled and ordered and made available where and when they are needed the most, and such control is also for this purpose and to this end—that at a time when our enemies who have sworn our destruction stand in arms against us no one within our own gates shall be allowed to wax fat on his country's necessity—no one shall be permitted to make greedy gain out of our common need.

COMBINES INVESTIGATION ACT

Dismissal of Motion to Quash Charges Against Members of Alleged Tobacco Combine

Judgment was handed down by Mr. Justice Ewing in the Supreme Court of Alberta on November 18, refusing a motion to quash the indictment preferred by the Attorney-General of Alberta against the Imperial Tobacco Company, Limited, and forty-two other corporations and individuals under section 498 of the Criminal Code. (LABOUR GAZETTE, June, 1939, p. 586).

Counsel for the accused argued that the counts were all bad in that none of them contained an indictable offence stated with the reasonable precision required by the Criminal Code; that several of the counts were bad for duplicity in that each count charged several offences, while the count charging a conspiracy in restraint of trade was defective in that it failed to specify the actual offence.

Mr. Justice Ewing, in refusing the motion, held that each offence charged was sufficiently specified and sufficiently stated in substance, and that the counts of the charge were not bad for duplicity in the light of the relevant sections of the code. He also held that the count charging a criminal conspiracy was in proper form.

Permission to appeal his judgment was given by Mr. Justice Ewing on November 29, and the case was heard by the Alberta Court of Appeal on December 11. On December 12 the Court dismissed the appeal without hearing argument from the Crown. The court found that the trial judge had no jurisdiction in referring the case to the Appeal Court and the Appeal Court had no jurisdiction in hearing the appeal.

Application for hearing of a motion asking for particulars of the charges, suspended pending the appeal, was later set for January 8.

Prosecution of Members of British Columbia Fruit Combine Announced

It was announced on November 19 that the Attorney-General of British Columbia had instructed that indictments be preferred without delay against certain companies alleged to be parties to a combine of wholesalers and shippers of fruits and vegetables in British Columbia and the prairie provinces. This decision resulted from the recent report of the Commissioner of the Combines Investigation Act which was summarized in the November issue of the LABOUR GAZETTE, pages 1104-1106.

H. I. Bird, Vancouver solicitor, has been instructed by the Attorney-General to study the report with a view to the nature of the proposed prosecutions. In his report the Commissioner found that the control which Western Grocers, Limited, of Winnipeg and its wholly-owned subsidiary, Dominion Fruit Limited, secured over certain shipping agencies representing British Columbia fruit growers was in violation of the Combines Investigation Act.

Industrial Home Work Hearings in New York

Public hearings were held on October 23 by New York State Department of Labor on the question of re-opening industrial home work in the artificial-flower industry. In 1938 home work in this industry was barred for one year, with provision for review of the order at the end of that time. The order is known as Homework Order No. 3. Order No. 1 barred home work on men's and boys' outer clothing; Order No. 2, on men's and boys' neckwear. Special certificates are issued, however, to home workers if they are unable to adjust to factory conditions because of age, or physical or mental disability, or the necessity of staying at home to care for an invalid.

"The artificial-flower industry," said State Industrial Commissioner Frieda S. Miller in opening the public hearing, "is a $14,000,000 industry. Sixty per cent of its production is centered in the city of New York."

Factual background for the hearing was a report by the Division of Women and Children in Industry, based on experience in administering Order No. 3, and on a special survey of the industry made just before the hearing. Chief conclusions of the report, which was in the hands of interested persons some days before the hearings, were as follows:

1. A considerable number of manufacturers in the industry have shifted to factory production exclusively.
2. The survey indicates that the order has increased by one-third the employment of women in factories.
3. The order has curtailed homework in the artificial flower and feather industry without placing an undue burden upon employers or workers in the industry.
4. Most employers have been able to adjust to the increase in factory employment resulting from Homework Order No. 3, even without the expense of obtaining additional factory space.
5. A majority of the employers who expressed their views regarding the order are in favour of it.

RECENT REGULATIONS UNDER DOMINION AND PROVINCIAL LEGISLATION

Old Age Pensions—Price Control and Teachers' Pensions in Alberta—Minimum Wages in British Columbia, Quebec and Saskatchewan—Regulation of Saskatchewan Trade Schools

THE residence requirements under federal old age pensions regulations have been relaxed to allow three years instead of two within which to complete the 700 days' residence required immediately before application for a pension. Regulations under other statutes include rules for the pension scheme for Alberta teachers, orders relating to hours and wages in resort hotels in British Columbia during the slack season and special provision in the same province for longer hours in shops in small places on Saturdays and on days preceding a statutory holiday which falls on a Saturday.

Under the Quebec Fair Wage Act three new orders cover tailoring and dressmaking in Quebec City, the mattress and upholstery industry in Quebec City, Levis and Quebec West and the ice industry in Quebec City and district. The orders governing stationary engineers and silk manufacture have been extended to April 1 and April 15, respectively, and that relating to the manufacture of brick, tile and building products was further suspended to December 1, 1939. Rates of pay have been fixed for special constables on duty during the war in cotton textile plants and new provisions govern learners in full-fashioned hosiery mills.

A wage order has been issued covering lumber workers in Quebec for the 1939-40 season. In Saskatchewan there are minimum wage orders for the towns of Estevan and Melville dealing with the same classes as are covered by the City orders. A number of trades have been brought under the Saskatchewan Trade Schools Regulation Act.

Canada Old Age Pensions Act

An amendment has been made in the regulations laid down in an order in council of December 9, 1937, (LABOUR GAZETTE, 1938, p. 287) concerning qualifications in respect to residence of an applicant for an old age pension.

The Act provides that no regulation by reference to which any agreement with a province has been made is to be altered except with the consent of such province or in accordance with the provisions of the regulations to which it has agreed. This amending order was made on July 27 and having been approved by all the provinces came into force when it was gazetted on December 2. It extends from two to three years the period immediately preceding the application during which the applicant must have lodged in Canada for 700 days. The other residence requirements which remain unchanged, stipulate that in addition to the above an applicant at least twenty years prior to making application must have lodged in Canada at sometime and also for a total of at least 5,844 days within the twenty years immediately preceding application.

Alberta Department of Trade and Industry Act

The code of fair competition for the retail trade which prohibits a retailer selling goods at a price less than 5 per cent above the price at which he bought or above the lowest wholesale price (LABOUR GAZETTE, November, 1939, p. 1110) was amended to stipulate that where the selling price of goods is fixed by order of the Price Spreads Board this prohibition does not apply.

Alberta Teachers' Retirement Fund Act, 1939

The first by-laws under this Act were passed by the board of administrators on October 31. The board of four members, two of whom are teachers, is appointed by the Lieutenant-Governor in Council and charged with management of the fund set up by the Act.

Two types of pension are provided, one being for life and the other for such period as the board considers that by reason of ill health the teacher is unable to follow any gainful occupation. The former scheme applies to a teacher who retires on or after December 1, 1939, and who has taught in Alberta for at least 20 school years and has reached the age of 65 or has reached 60 and after retirement contributes annually until he reaches 65, 30 per cent of the amount of salary provided for under his last teaching contract.

The disability pension is payable to a teacher who after teaching in Alberta for 15 school years discontinues on or after December 1, 1939. A teacher applying for or in receipt of such a pension must if, required by the board, be examined by a medical practitioner named by the board. No application.

for a pension is to be considered after the expiration of two years from the termination of service under the teacher's last employment contract.

Time spent in active war service including nursing is to count as service provided the teacher was teaching in the public schools of Alberta immediately prior to enlistment and resumed his profession within a year from the date of discharge.

Until December 31, 1943, the amount of pension to which a person is to be entitled is not to exceed $12.50 a month exclusive of the similar sum which the Act entitles him to receive out of money appropriated by the legislature.

British Columbia Female Minimum Wage Act

Order 52E of November 8, dealing with women employed in resort hotels varies Order 52 for the slack season in the same way as last year, by permitting longer hours. (LABOUR GAZETTE, 1938, p. 1095.) The new order is effective from November 9, 1939, to June 12, 1940. It raises the maximum number of hours that may be worked from 48 to 54 in a week and from 8 to 10 in a day but time worked in excess of 48 hours a week is still required to be paid for at one and one-half times the regular rate. The overtime rate does not apply to work in excess of eight hours in a day where the work week does not exceed 48 hours. The limits now fixed are absolute, whereas Order 52 allowed up to 10 hours work a day and 52 a week in emergency.

The provision of Order 52 requiring that employees working on split shifts must complete both shifts within 14 hours is suspended for this type of establishment. For the rest period of 24 consecutive hours in each week which is provided by Order 52 another arrangement may be made by an employer and his employees with the approval of the Board. The employers and employees may apply for the Board's approval of an arrangement for hiring by the month, the wage to be not less than $25 with board and lodging.

British Columbia Hours of Work Act

Regulation 29 of November 8, 1939, dealing with persons employed in retail and wholesale stores except in Vancouver, Victoria, Burnaby, Esquimalt, Oak Bay and Saanich, makes identical provision with respect to hours of work as was made by several earlier orders each for a limited time but together covering practically the whole period since September, 1934. The new regulation fixes no time limit for its operation.

The maximum hours per week for such workers remain at 48, but the regulation allows three hours' work a day in excess of the eight fixed by the Act on Saturdays and on days preceding a statutory holiday when the holiday occurs on a Saturday.

Quebec Fair Wage Act

From November 25 several amendments are made in the provisions of Order 4 (LABOUR GAZETTE, 1938, p. 512) dealing with drivers of motor and horse-drawn vehicles. The exception formerly made in the case of domestic servants is removed. Drivers of horse-drawn vehicles employed by an industrial or commercial establishment whose cartage business is incidental continue to be subject to the same rates and conditions as those employed in the establishments. These conditions are also to apply to carters' helpers working with such drivers.

But motor vehicle drivers employed by such establishments or by employers in any business are now subject to the same conditions as drivers of horse-vehicles employed by employers whose business is chiefly, if not exclusively, one of transportation but the rates vary according to the type of vehicle. All rates for these drivers apply to a 60-hour week. Where the chief business of the employer is transportation, carters' helpers and truck drivers are entitled to a minimum hourly rate of 20, 18, 16 and 14 cents in Zones I, II, III and IV, respectively. For drivers of autobuses and trucks of over 6,000 pounds the minimum hourly rates are 30, 25, 23 and 20 cents in Zones I, II, III and IV, respectively. For men driving all other types of vehicles the minima are 25, 20, 18 and 15 cents an hour according to the zone. The last-named rates were formerly fixed for drivers of taxis, trucks and vehicles in general with a capacity of less than 5,500 pounds. Weekly, monthly and yearly rates of pay are no longer specified.

Revised Order 5, covering silk manufacture, and *Order 6,* governing stationary engineers (LABOUR GAZETTE, 1938, pp. 985, 624) are to remain in effect until April 1 and April 15, 1940, respectively unless the Board or the Lieutenant-Governor in Council decides otherwise. The resolution of October 17 placing restrictions on the number of looms to be handled by each operator in the silk industry which was noted in The LABOUR GAZETTE, November, p. 1114, was repealed on November 16.

To *Order 8* (LABOUR GAZETTE, 1938, p. 625), relating to the cotton textile industry a provision has been added retroactive to September 1 fixing rates of pay for special constables

and sergeants on duty during the war. They are to be paid a minimum of $25 and $28 a week respectively with no limit on working hours. The provision in Order 4 for a weekly rest does not apply.

Order 19 (LABOUR GAZETTE, 1938, p. 1352) governing full-fashioned hosiery mills was amended on November 14 to stipulate that new operatives for the first six months of their employment are not to be included in the workers who are classified for the purpose of determining the number entitled, respectively, to the four minimum rates payable to a specified percentage of the operatives. New male operatives are to receive at least 18 cents an hour in the zone comprising Montreal and district and 15 cents elsewhere in the province. The rates for female learners are 14½ cents and 13½ cents. An employer may not treat as "new" operatives more than 10 per cent of the total number in the same zone of male or female operatives as the case may be.

Order 22 (LABOUR GAZETTE, February, 1939, p. 157) relating to the manufacture of brick, tile and building blocks which has been suspended since June 17 is further suspended to December 1, 1939, by an order made on November 14.

TAILORING AND DRESSMAKING

Order 31 of October 2 governs tailors and dressmakers in Quebec City workshops where men's suits, overcoats and other garments and women's or children's dresses, coats, suits, etc., are made to measure or mended but persons employed on factory-made clothing and garments or in religious or teaching institutions or in establishments where the principal undertaking is not that of tailoring or dressmaking but where such work is performed for the purposes of the main undertaking are excluded from this Order.

Part-time workers are defined as those with three years' experience employed for less than the regular working hours and for not more than 20 hours a week or any other period determined by the Board. Part-time male workers have a minimum of 30 cents and females a minimum of 20 cents an hour. The work-week to which the minimum rates apply is 50 hours and an overtime rate of time and a half is payable thereafter except under the conditions allowed by *Order 4* and with the exception of the experienced male operatives who have a minimum hourly rate of 50 cents. The latter may be paid the regular hourly rate for overtime.

Of the male employees with three years' experience at least 20 per cent are to receive 50 cents an hour, not more than 20 per cent, 40 cents, not more than 30 per cent, 30 cents and not more than 30 per cent, 24 cents an hour. For females with three years' experience the rates for the same proportions are 24, 22, 20 and 18 cents an hour.

Male workers with less than three but more than two years' experience are to receive 20 cents an hour; those with between one and two years' experience 15 cents, between six months' and one year's experience 10 cents and with less than six months' experience 6 cents an hour. Somewhat higher rates are fixed for women learners who are working on men's custom clothing than for other inexperienced female employees. When the former have less than six months' experience they are to be paid 10 cents an hour, the rate then rising to 12 cents, to 14 cents after a year and to 16 cents when two years' experience is gained. This rate is payable until three years' experience entitles the worker to the full minimum. Women employed on other clothing receive 6 cents an hour for the first six months, the rate increasing by 2 cents every six months until the employee has three years' experience.

Experience is determined by the total number of days or parts of days worked, whether consecutive or not, at paid work in any establishment covered by the Order or in any similar establishment and a month is deemed to mean 26 working days.

MATTRESS AND UPHOLSTERING INDUSTRY

Order 32 made on October 2 and in effect for one year, renewable for another, applies to Quebec City, Levis and Quebec West, and deals with the mattress and upholstering industry, *i.e.*, establishments where mattresses are manufactured or repaired and furniture is upholstered but not where this work is incidental to the main undertaking. Part-time employees are defined as in *Order 31*.

The rates apply to a 48-hour week except in the case of travelling salesmen and for carters and drivers and their helpers who have a regular work-week of 54 hours and for watchmen whose rates apply to a week of 84 hours. Overtime beyond the regular work week must be paid for at the rate of time and a half except under the conditions as to time-off, etc., provided in *Order 4*. Part-time employees must be paid 20 cents an hour.

All permanent male employees, except travelling salesmen, are divided into five classes with not less than 10 per cent to receive 50 cents an hour, not more than 10 per cent, 40 cents and not more than 35 per cent, 30 cents, not more than 30 per cent, 20 cents and not more than 15 per cent, 15 cents. Female permanent employees are to be in three classes with at least 60 per cent re-

ceiving 25 cents an hour, not more than 25 per cent, 20 cents and not more than 15 per cent, 15 cents.

Workers with less than six months' experience may be excluded from the number classified provided they are paid at least 15 cents an hour but not more than 10 per cent of the male and 10 per cent of the female employees, other than part-time workers and travelling salesmen, may be classified as new employes. Travelling salesmen have a weekly minimum of $15.

Ice Industry

Order 34 of October 2, 1939, to remain in force until January 1, 1941, and be then renewable for a year, deals with the ice industry and trading in Quebec City and district, but only when it is the principal business of an undertaking. One part of the order regulates conditions of workmen, except carters, engaged in harvesting and storing ice in the Quebec judicial district, except New Quebec, together with the lakes and rivers in that area. Persons employed in cutting ice or working at the place where ice is cut are to receive 30 cents an hour in Quebec Harbour and 20 cents an hour in the remaining territory. Those engaged in storing ice are entitled to 30 cents an hour in ice-houses in Quebec Harbour as well as in Quebec City, Quebec West and Sillery and to 20 cents elsewhere. The rates apply to a 54-hour week.

Overtime beyond the hours specified in the order and on Sundays must be paid for at the rate of time and a half subject to the provisions of Order 4.

The part of the order dealing with retail and wholesale trading in ice covers Quebec City and a number of surrounding towns, villages, municipalities and parishes. It also specifies a 54-hour week, except from May 15 to October 1 when the week to which the rates apply is 66 hours. Higher rates of pay are fixed for Quebec City and Quebec West than for the other territory and employees delivering ice in these places are entitled to the higher rates although the employer's establishment may be in an outlying district. Accountants and administrative employees in Quebec and Quebec West (Zone I) receive 25 cents an hour and 22½ cents elsewhere (Zone II). Office employees and collectors in the first-mentioned district receive 15 cents an hour for the first year the rate then rising to 18 cents. The rate for telephone operators and messengers is 10 cents an hour in both districts. When there is only one man on a truck or vehicle used for delivering ice he is to be paid 30 cents an hour in Zone I and 25 cents in Zone II. If there is a helper, he is to receive 25 cents or 20 cents an hour according to the zone. Any additional employees receive 20 cents in Zone I and 15 cents in Zone II. For all other workers hourly rates of 25 cents and 20 cents are payable. Where the employer himself works on a truck or vehicle delivering ice he may be considered an employee for the purpose of determining the rates.

The manufacture of artificial ice is dealt with separately. The same territorial division is made as for ice trading. There is a regular work-week of 66 hours and throughout the area covered accountants and administrative employees are to be paid 25 cents an hour, office employees and collectors 15 cents for the first year and then 20 cents an hour. Telephone operators and messengers receive 10 cents an hour. All other employees including drivers, carters and their helpers are divided into three classes, not less than 25 per cent to receive 30 cents an hour, not more than 25 per cent, 25 cents and not more than 50 per cent, 20 cents.

Except for employees in artificial ice establishments other than office employees, collectors, telephone operators, messengers and administrative employees, the provision in Order 4 for a 24-hour weekly rest is to govern all branches of the industry. No person may be employed more than 85 hours in a week.

Tables of Percentages

In order to carry out the above orders which provide for minimum rates for certain percentages of the employees, four new tables of percentages were gazetted on November 25. They indicate the number to be assigned to each class when the wage order calls for four classes of 20 per cent, 20 per cent, 30 per cent and 30 per cent, five classes of 10 per cent, 10 per cent, 35 per cent, 30 per cent and 15 per cent, four of 20 per cent, 30 per cent, 25 per cent and 25 per cent and three of 25 per cent, 25 per cent and 50 per cent.

Quebec Forest Operations Act

The third annual order under this Act came into force on July 1 last, and was approved by order in council September 13. It is generally similar to the orders in effect during 1937 and 1938 and applies to all persons engaged in forest operations except on private lands belonging to farmers or settlers.

A minimum wage of $45 per month of 26 days is fixed for all workers except inexperienced youths from 18 to 20 years of age, handicapped persons and men of 60 years or over, who have a minimum of $30 for a month of 26 days. The number of workers in these excepted classes is limited to 12½ per cent of the total number employed. No person under 18 years may be employed.

Special rates established for piece-workers range from 80 cents per hundred cubic feet for wood cut in 16 foot-lengths to $2 per hundred for four-foot foot lengths.

Board and lodging must be supplied to the workers free of charge but piece-workers may be required to pay not more than 60 cents a day for board and lodging. No deductions may be made from wages for medical service, hospital fees, board, lodging or insurance premiums and the prices for goods sold to workers must be reasonable. Except for cooks, chore boys, stablemen and teamsters, the maximum hours are 60 per week with time and a quarter for overtime and time and a half for work on Sunday.

Provisions requiring the posting of the order and the furnishing of information to the Department of Lands and Forests are the same as in earlier orders.

Saskatchewan Minimum Wage Act

In line with the order in council of September 26 declaring this Act to apply from October 6 to the towns of Estevan and Melville and within a five-mile radius as well as to the cities of the Province, Orders 7 and 8, effective from November 20, have been issued for these towns.

Order 7 covers the same classes of workers as Orders 1, 2, 3, 5 and 6 (LABOUR GAZETTE, November, 1939, p. 1114), that is all classes employed in factories; retail and wholesale stores and mail order houses; fuel yards, lumber yards and building supply yards; beauty parlours and barber shops; in warehousing, draying, cartage, transfer and delivery work; and in theatres and dance halls. Order 8 applies to the same classes as are covered for cities by Order 4, that is persons employed in hotels, including rooming houses in which there are more than five beds set apart for the use of lodgers, restaurants, including places in which meals are supplied daily for a consideration to more than five persons, and refreshment rooms.

As under the city orders, the normal work-week to which the minimum wage applies under Orders 7 and 8 is not to exceed 48 hours, except in the case of elevator operators, bell boys and porters in hotels and restaurants for whom the normal work-week is 60 hours. Time worked in excess of 48 hours, or of 60 hours in the case of the specified classes, is to be paid at overtime rates. Under the Factories Act, no women or boys under 16 may be employed in a factory for more than 48 hours in a week or after 6.30 p.m. unless the inspector has granted a special permit. Part-time rates, except in hotels and restaurants, apply when the hours of work are at least six less than the normal work-week and in hotels and restaurants part-time workers are those employed for less than 43 hours a week. In all cases they must be paid for at least two consecutive hours on any day they are required to report for duty and their number may not exceed one-third of the number of full-time workers except that under Order 7 a permit for a larger proportion may be obtained from the Secretary of the Bureau of Labour.

The rates fixed by Orders 7 and 8 are generally lower than those for cities. Orders for cities fix a minimum of $13 or $14 for experienced workers in all work-places covered except hotels and restaurants and theatres and dance-halls where the minimum is $12. The minimum weekly rate established by Order 7 for experienced workers, except those delivering goods on foot or bicycle, is $12 and for inexperienced workers $7 for the first six months, $9 for the second six months, $11 for the third six months and $12 thereafter. Messengers and errand boys in the two towns have a weekly minimum of $5 and if a messenger or errand boy with a year's experience is given work of any other kind he is to be paid as if he had six months' experience in that work. Drivers of horse-drawn or motor vehicles have a minimum of $11 a week for three months, then $12.

Order 8, applying to hotels, boarding houses and restaurants, fixes a weekly minimum of $10 for workers with one year's experience except dish washers, elevator operators, bell boys and porters who must be paid at least $8 weekly regardless of experience. Inexperienced workers of other classes have a minimum of $6 for the first six months and $8 for the second. Where the employer furnishes meals or lodging, not more than $4 may be deducted from wages for 21 meals in a week or $1.50 for a week's lodging. The maximum deduction for a single meal is 20 cents and for a single night's lodging, 25 cents. No deductions may be made for civic or statutory holidays.

Under Order 7 the proportion of inexperienced workers, not including apprentices, that may be employed is limited to one-third of the total number of employees in any work-place and under Order 8 the proportion may not be greater than 25 per cent. One inexperienced worker is permitted where the total number employed is less than three under Order 7 or less than four under Order 8.

As under the city orders, wages fixed in an indenture of apprenticeship approved by the Minimum Wage Board or in an apprenticeship agreement registered under a collective agreement which is approved by the Bureau of Labour and Public Welfare may supersede the rates for inexperienced workers fixed in Orders 7 and 8.

Overtime and part-time work under both orders must be paid at the rate of 25 cents an hour in the case of experienced and 20 cents for inexperienced workers but messengers and errand boys may be paid a minimum of 15 cents an hour and dish washers, elevator operators, bell boys and porters in hotels and restaurants have a minimum hourly rate of 20 cents for overtime or part-time.

Saskatchewan Trade Schools Regulation Act

By order in council of November 21 to the list of callings and vocations defined as a trade within the meaning of the Trade Schools Regulation Act (LABOUR GAZETTE, June, 1939, p. 580) have been added the following: radio and wireless communications; television; sound projection and motion picture operation; air conditioning and refrigeration; electric and acetylene welding; sheet metal work; steam fitting; printing and bookbinding; photography; mechanical dentistry; painting and interior decorating; commercial and industrial art; industrial and business management; theoretical and industrial chemistry; theoretical and industrial engineering; broadcasting instruction; hand, machine and power sewing; detective and secret service courses; civil service preparation; business courses by correspondence; advertising; salesmanship; journalism and story writing; speech and oratory courses; landscape gardening; hotel management and hostess training courses.

EFFECT OF WAR ON LABOUR AND SOCIAL STANDARDS

Changes in Working Hours in Great Britain—Railway Schedules in France—Suspension of Labour Regulations in Germany

A Review was given in last month's issue of the LABOUR GAZETTE of the early effects of the war on labour standards in the belligerent countries, this summary being based on material gathered from various sources by the International Labour Office and published in its weekly periodical, *Industrial and Labour Information*. Continuing its informative service in this direction, recent weekly issues of the I.L.O. publication contain further reports of the results of the war on labour legislation and regulations in Great Britain, France, Germany and also in neutral countries. Extracts from these surveys are presented herewith:

Hours of Work in Great Britain

EFFECT OF BLACK-OUTS ON WORKING HOURS

The problem of operating factories and commercial establishments as far as possible during the hours of day-light is the subject of considerable discussion at present in Great Britain, owing to the lighting restrictions, which require a black-out at night. Details of arrangements made in certain branches of industry and commerce are as follows:

Textile Industry.—In the weaving section of the cotton industry, the starting time in many districts is 7.45 a.m., and in others 7 a.m. The weavers' associations in the districts in which work at present starts at 7 a.m. agreed to start at 7.45 a.m. until "Summer Time," which was prolonged until November 18, 1939, came to an end. The break of half-an-hour for breakfast was abolished. An hour's break is allowed for dinner at 12.15 p.m., and work continues until 5.30 p.m., instead of 5.15 p.m., on the first five days of the week, in order to complete the regular 8¾ hours for those days.

Boot and Shoe Industry.—In Leicester, efforts are being made to alter hours of work so that workers can reach home before the black-out. At one factory, employees are to start earlier, reduce the mid-day break to 45 minutes, and finish at 4.30 p.m., instead of 6 p.m.

On the other hand, the National Union of Boot and Shoe Operatives is opposing the suggestion that operatives' hours should be altered to allow week-end work, thus avoiding the necessity of darkening the factories during normal hours. The delegates of the Union consider that week-end leisure is essential in the interests of the operatives health and productive capacity.

Shops.—Sir John Anderson stated in the House of Commons on October 12, 1939, that he proposed to issue an Order advancing the hour of closing shops to 7.30 p.m. on the late night and 6 p.m. on other evenings. Where local conditions make some variation desirable for the convenience of the public, local authorities would be empowered to substitute the hour of 8 p.m. on the late night and an hour not later than 7 p.m. on one or more evenings in any part of their district, for any class of trade or business. Existing exemptions would not be affected. The existing shop closing hours are 9 p.m. on the late night and 8 p.m. on other nights. Local authorities may fix an earlier hour, provided it is not earlier than 7 p.m.

HOURS AND PRODUCTION IN COAL MINES

At a meeting, held on September 28, of the Joint Standing Consultative Committee of the Coal-Mining Industry, on which the employers' and workers' organizations are represented, various questions arising out of war conditions were discussed, and a certain amount of progress made towards their solution.

While agreeing as to the importance not only of providing all the coal required by the country for its own needs, but also of meeting, as far as possible, the requirements of overseas markets, the miners considered that at present there was no need to lengthen the working day. They stated that they were making an enquiry into the number of unemployed miners available in each mining area, and into the amount of short time being worked.

TIME LOST IN BUILDING INDUSTRY THROUGH AIR RAID WARNINGS

The National Joint Council for the Building Industry has decided that employers should as far as possible enable their operatives to make up time lost through air raid warnings by working before or after the normal hours. This extra time will be paid for at overtime rates.

A worker will not be penalized if an air raid warning makes him late, provided he arrives within a reasonable time after the "all-clear" signal has been given.

If it is not possible to bring the total number of hours worked in a week up to normal, the employer will pay for half the time lost, provided it is not more than 8 hours. If, however, it is found that over a considerable area of the country workers have lost more than 8 hours in the week and cannot make them up, the Council will consider the position within seven days.

EMPLOYMENT OF BOYS IN AIR RAID PRECAUTIONS SERVICES

The British Government has decided that boys under 16 are to be withdrawn from the Air Raid Precautions Messenger Services. They are not in future to be enrolled in any Air Raid Precautions service, as it is considered that they should not be exposed to the strain and long hours of war conditions.

Before the declaration of war, boys under 16 were allowed to train at A.R.P. centres. It is now thought better that they should be trained to take their part in civil defence by the organizations to which they belong.

Hours of Work on Railways in France

A Decree of October 6, 1939, regulates the working time-table of staff of the National Company of French Railways for the duration of hostilities.

The report to the President of the Republic which appears at the head of the Decree states that the provisions governing hours of work meet the imperative needs of a state of war, which require all citizens to make a supreme effort in the service of their country. The provisions have also been drafted with a view to avoiding any overstrain likely to prejudice the output of staff or the safety of transport.

The only hours to be considered as overtime, and paid at a special rate, will be those worked in excess of the statutory maximum limits, and for which no equivalent time off is given. The saving thus made will facilitate the financing of the measures taken by the National Company for its mobilized staff, on the lines of those introduced by the State for its mobilized officials. In this way the necessary collaboration will be established between railwaymen who have been called up for active service and those who remain in the employment of the Company.

In view of the difficulty of arranging the details of the shifts and working timetables for the railway staff, it has been necessary to empower the Ministry of Public Works to issue Orders to regulate the conditions for the application of the provisions of the Decree.

The Decree then sets forth the schedules of working hours for all trades on the railways.

Effects of War on Social Insurance in France

The legislation on social insurance in France has been amended by a Decree of September 26, 1939, published in the Official Journal on September 27, which is designed to simplify the working of social insurance in time of war.

The Decree facilitates rapid payment of benefits to persons entitled to them, and provides for the allocation of certain social insurance funds to prophylactic and health purposes. It applies both to the social insurance funds for industry and commerce and also to those for agriculture.

Sickness and Maternity Insurance.—Wives and children dependent on insured persons who have been called to the Colours retain their right to sickness and maternity benefit without any condition as to payment of premium, throughout the period for which the person concerned is on active service. When the insured persons return home they are considered as having regularly paid, throughout the period of their army service, the minimum statutory sum entitling them and their wives and children to sickness and maternity benefit.

Invalidity, Old-Age and Survivors' Insurance.—The provisions with regard to pension

insurance concern the maintenance and increase of rights in course of acquisition throughout the period of mobilization and the rules for payment of old-age and invalidity pensions due either before or after the opening of hostilities.

Suspension of Protective Labour Legislation in Germany

The official bulletin of the German Ministry of Labour published a semi-official explanatory note on the provisions of the Emergency Measures Order of September 4, 1939, and of the Order of September 1, 1939, amending and increasing the restrictions introduced in labour law.

Hours of Work.—It is pointed out that while the head of an undertaking is no longer bound by any legal restrictions when establishing hours of work for his adult male staff, the freedom of action thus conferred on him must not lead to any improper use being made of labour. The strain of work and the worker's power of resistance must be taken into account by the head of the undertaking in fixing hours of work. The labour inspectorate is entitled to intervene, and if, for example, a high sickness rate in a given undertaking can be attributed to excessive strain imposed on the staff, the inspector may order a reduction in hours of work.

Breaks and Rest Periods.—It is further pointed out that the provisions of the Hours of Work Order referring to daily rest and breaks have not been suspended. Wage earners are therefore still entitled to a daily rest period of at least 11 consecutive hours (10 hours in certain branches of industry). In addition, the management must grant a break of at least half-an-hour or two breaks of at least a quarter-of-an-hour each after every spell of six hours' work.

Unhealthy Trades.—Workers engaged in unhealthy work remain covered by the hours of work prescriptions of the Industrial Order. This rule applies to workers employed in accumulator works, factories making lead paints, lead-working, underground stone quarries and works, vulcanizing shops, ship-painting and compressed air work.

Holidays.—The explanatory note goes on to state that the suspension of holiday provisions of all kinds does not exclude the possibility that certain heads of undertakings may grant holidays to staff whenever output requirements permit. At the same time, a note published in the daily press emphasizes the fact that the grant of holidays is forbidden in principle for the time being. An exception to this rule may be made only if a doctor prescribes a holiday as a result of a serious illness or if important family circumstances justify a short holiday. Holidays may also be granted during a temporary suspension of work in an undertaking, such as may be required by the transformation of the undertaking, provided that the staff is without work as a result of such circumstances.

Exemptions.—Finally, the explanatory note states that the labour inspectorate may authorize exemptions from any labour protection prescriptions still in force, but only in special cases. Recently isued Orders give no details of the conditions under which such exemptions are permitted. In considering applications for exemptions, the Order states that it will be essential in all cases to take account of "the condition indispensable for the safety of the armed forces, namely, that the suppression of the last barriers protecting labour should not result in undermining the health of the working classes."

WORKMEN'S COMPENSATION IN BRITISH COLUMBIA, 1938

Twenty-Second Annual Report of Workmen's Compensation Board

THE twenty-second annual report of the British Columbia Workmen's Compensation Board covering the year ending December 31, 1938, gives an estimated payroll of industries within the scope of the Act of $165,000,000 compared with the audited payroll of $172,147,299 in 1937. It is explained in the report that the figures for 1938 are necessarily an estimate only, as an audit of the payroll will not be completed until later in the year.

The report shows that the number of employers engaged in industries under the Act has increased from 8,619 in 1937 to 8,886 in 1938.

Accidents and Claims.—Accidents reported during 1938 were approximately 10 per cent lower than the number reported in 1937, a total of 31,505 accidents, including 159 fatalities, having occurred in 1938.

In addition, nearly 2,000 minor injuries were also reported but were treated with first aid only and resulted in no expenditure for time-loss compensation or medical attention. The time-loss accidents were distributed amongst the various industries as follows: Lumber in-

dustry, 43 per cent; metal-mining, 13 per cent; general manufacturing and delivery classes, 11 per cent; construction, 6 per cent; navigation, 5 per cent; coal-mining, 4 per cent; railroading groups, 4 per cent; and all other classes, 14 per cent.

The fatalities ocurred in the following industries: Lumber industry, 44 per cent; metal-mining, 13 per cent; coal-mining, 10 per cent; railroading groups, 6 per cent; construction-work, 6 per cent; general manufacturing and delivery classes, 6 per cent; and all other classes, 15 per cent.

Revenue and Disbursements.—Revenue for 1938 totalled $7,720,869.67, of which $4,833,541.15 represented collections made during 1938 as follows: From employers, assessments and interest, $3,355,879.29; from employers, medical aid, $410,699.62; from employers, silicosis, $169,049.03; from workmen, medical-aid dues, $286,686.59; from interest on investments, $533,784.60; from appreciation on investments sold $22,089.91 and transferred to contingent fund $55,352.81. The remainder ($2,887,328.52) of the total revenue was listed as balance on hand, January 1, 1938.

Disbursements made during 1938 included $154,907.17 in compensation to workmen; $701,953.85 in medical aid; compensation and medical aid, silicosis fund, $3,166.21. From the reserve account $1,303.679.08 was paid in pensions during 1938, $26,563.90 was paid out by way of silicosis pensions, $853.704.19 was invested for pensions, leaving a cash balance available for pensions of $21,926.09. The balance at December 31, 1938, to the credit of the various classes under the Act was $2,585,-719.37; the balance to the credit of medical aid at the same date was $166,046.55, while the balance to the credit of silicosis was $370,029.46.

At the end of 1938 there were on the pension list as a result of the fatal cases during the twenty-two years the Act has been in operation, 981 widows, 842 children, 127 dependent mothers, 33 dependent fathers, and 17 other dependents.

Permanent partial or total disability resulted in 13,239 cases during the past twenty-two years and at the end of 1938, 2,130 workmen were in receipt of pensions for such disabilities.

Including permanently disabled workmen and the dependents of deceased workmen, there was a total of 4,130 persons on the pension list at the end of the last calendar year. Nearly 2,000 workmen were in receipt of time-loss compensation at any one time. They with their dependents and the pensioners make a total of more than 12,000 persons who relied on compensation in whole or in part for their maintenance.

Silicosis.—During 1938 awards were made for permanent partial or permanent total disability to thirty-three workmen suffering from silicosis. Commenting on this phase of workmen's compensation the report states: "The amendment to the 'Workmen's Compensation Act' passed at the second session of the Legislature in 1936 made silicosis in the metalliferous mining industry an industrial disease under the Act. Workmen who became disabled on or after January 1, 1936, are, subject to the provisions of the Act, entitled to compensation. Silicosis cases under the Act resulted in eight deaths and awards with respect to fifty-four cases where the disease had reached a stage which permanently disabled the workmen. While those awards were made for cases which became disabling during the past three years, we know that that number includes an accumulation of silicotic cases who contracted the disease over a considerable number of years."

The report also deals with accident prevention activities in the province, and the revision of first-aid service requirements under the Act. As usual detailed statistics are given in the report showing industries in which accidents occurred, workmen's wage loss, average length of disability, average daily wage at the time of accident, sex, conjugal state, etc.

"Related Instruction for Plumber Apprentices" is the title of a bulletin (No. 200) published by the Vocational Division, Office of Education of the United States Department of the Interior.

The intention of the bulletin is to provide uniformity of content in plumbing instruction courses, as well as agreement on supplementary instruction for plumber apprentices by employers, employees, educators and apprenticeship officials and "a rounding out of the apprenticeship set-up as formulated in the 'National Plumbing Apprenticeship Standards.'"

The contents of the bulletin are divided into five chapters and three appendices. The chapter headings are as follows: Introduction; Selection and Training of Plumber Apprentices; Selection and Training of the Plumber Apprentice Instructor; Instruction for the Plumbing .Apprenticeship Plan; Questions concerning Plumber Apprentice Training; and Results of a Questionnaire on Mimeographed Preliminary Edition.

Copies of the bulletin may be obtained from the Superintendent of Documents, Washington, D.C., the price being 15 cents each.

CONFERENCE OF AMERICAN STATES OF INTERNATIONAL LABOUR ORGANIZATION

Proceedings of Second Meeting at Havana

THE second Conference of American States which are members of the International Labour Organization was held in Havana, Cuba, from November 21 to December 2. The first of these American Conferences organized under the auspices of the I.L.O. met in Santiago, Chile, in January, 1936. (LABOUR GAZETTE, February, 1936, p. 159).

The holding of regional conferences marks a new phase in the development of the I.L.O. For some time previous to 1936 the Governing Body had hoped to hold such regional conferences. A resolution in favour of the holding of an Asiatic regional conference had been passed by the International Labour Conference of 1931. It was not, however, until the Chilean Government proposed that a regional conference should be held in Santiago to discuss labour problems common to the American States that such an opportunity was provided. One of the resolutions of the Santiago Conference expressed the desire that another regional conference be called in the near future. This desire was realized in the holding of the present Havana Conference.

The organization of these American conferences follows very closely the organization of the regular annual International Labour Conferences, except that the membership is limited to American States which are members of the International Labour Organization. Non-Member States may attend as observers. Each American member State has the right to be represented by two government delegates, one employers' delegate and one workers' delegate, accompanied by advisers on the same conditions as in the case of the general conferences.

The powers of regional conferences to take decisions, however, differ very substantially from those of the general I.L.O. conferences where the decisions may take the form of draft conventions or recommendations, and place certain definite if limited obligations on member States. In the case of the regional conferences the decisions can only take the form of resolutions addressed to the Governing Body of the I.L.O., the Governing Body being free to take whatever action it considers advisable.

The number of member states represented at the Havana Conference was 16. There were in attendance 27 government delegates, 8 employers' delegates and 9 workers' delegates, making a total of 44 delegates. There were also 65 technical advisers, making a gross total of 109.

91170—4½

The following countries were represented:

Argentine, Bolivia, Brazil, Canada, Chile, Colombia, Cuba, Dominican Republic, Ecuador, Haiti, Mexico, Panama, Peru, United States, Uruguay, Venezuela.

Four countries sent observers, viz. Costa Rica, Guatemala, Nicaragua and the United Kingdom. In addition there was present a delegation from the Governing Body of the I.L.O., including two members from the government group (one from the United States and one from Mexico), two members from the employers' group (one from Jugoslavia and one from the United States) and one member from the workers' group (from the United States). The workers' member from France was unable to attend.

The Canadian delegation consisted of a delegate representing the Government of Canada (Dr. W. A. Riddell, Counsellor of the Canadian Legation, Washington; former Chairman of the Governing Body of the I.L.O.), a delegate representing the employers of Canada (Mr. H. W. Macdonnell, Secretary of the Industrial Relations Department, Canadian Manufacturers' Association, Toronto) and a delegate representing the workers of Canada (Mr. Tom Moore, President of the Trades and Labour Congress of Canada, Ottawa).

The following officers of the Conference were elected:—

President—Sr. Juan Miguel Portuondo y Domenech, Secretary of Labour of Cuba.
Vice-President—Sr. Justiniano Sotomayor, Government Delegate of Chile.
Secretary-General—Mr. John Winant, Director of the I.L.O.

Conference Agenda

The agenda of the Conference comprised the following items:—

1. The Director's Report.
2. The examination of the effect given to the resolutions of the Conference held at Santiago, Chile (particularly as regards the work of women and children, and social insurance).
3. Organizations of official institutions dealing with immigration and settlement.

It was understood that the delegations would have the right to lay draft resolutions before the Conference, dealing, among other things, with the questions which appeared suitable to be discussed by a future conference of the American States which are members of the Organization.

In order to deal with the work of the Conference five committees were set up, namely, a Selection Committee, a Resolutions Committee, a Committee on Social Insurance, a Committee on Immigration, a Committee on the work of Women and Juveniles.

Canada was represented on the Selection Committee by two members, both of whom were elected officers—Dr. W. A. Riddell being chosen President and Mr. Tom Moore Vice President. Dr. W. A. Riddell and Mr. H. W. Macdonnell were appointed to the Resolutions Committee, Mr. Macdonnell being chosen Vice-President. Mr. Tom Moore was also appointed to the Social Insurance Committee, and served as substitute member on the Resolutions Committee. Mr. H. W. Macdonnell was appointed to the Committee on Work of Women and Juveniles.

Decisions of Conference

The decisions of the Conference were incorporated in the First, Second and Third Reports of the Resolutions Committee; the First and Second Reports of the Committee on Social Insurance; the Report of the Committee on Immigration and the First and Second Reports of the Committee on the Work of Women and Juveniles.

The reports of the Resolutions Committee contained 28 Resolutions which were finally adopted unanimously. These resolutions dealt with the following subjects:—

The Declaration of Havana, pledging the American nations to promote international law and eliminate war as an instrument of international policy.

The holding of the General Conference this year in an American country.

The urging of membership in the International Labour Organization among the non-member American States.

Closer economic and financial trade between American States based upon fair labour standards.

The setting up of tripartite committees by the American member States of the I.L.O. for consultation by their respective governments and by the I.L.O.

Collaboration between technical labour officials in the Americas.

Organization of excursions of workers to other American countries.

The granting of the free exercise of civil liberties.

Nutrition.

The study of measures for the application of freedom of association.

Recognition of the legal status and free functioning of trade unions.

Effect of changing centres of population on labour.

Results of competition of low paid workers.

The abolition of Latifundism; the payment of wages in legal tender; guarantees of personal liberty and civil rights.

Conditions of life of professional workers.

Working class housing.

Preparation of a model code of safety regulations.

Draft labour code for Latin American countries.

Handling of heavy weights.

Protection of workers from currency fluctuations.

Protection of proletarian masses (Indians).

Protection of performers' rights *re* broadcasting, television, and mechanical reproduction of sounds.

Establishment of boards for conciliation and arbitration.

Simplification of procedure for the payment to workers of ordinary claims.

Ratification of the convention on minimum wage-fixing machinery, 1928.

Ratification of the convention on statistics of wages and hours, 1938.

Resumption of publication of the I.L.O. publication on legal decisions regarding labour legislation.

Tendering homage to eminent Cuban internationalist, Professor Antonio Sanchez de Bustamante.

Resolution on Labour Standards

A prominent part was taken in the adoption of the resolution on fair labour standards by Mr. Moore, the Workers' Delegate from Canada. This resolution, submitted by James B. Carey, Workers' Delegate from the United States, considered that "stable prosperity cannot be achieved without building up standards of life adequate to ensure reasonable conditions of health and well-being for the masses of the population." In this objective it emphasized the importance of several contributory factors, viz.:—

(1) The establishment by Governments of adequate machinery to protect the right of association. . . .

(2) The establishment of legal minimum rates of wages adequate to enable all classes of workers to maintain a reasonable standard of life.

(3) The establishment of legal maxima for hours of work, which should in no case be based upon a standard working week longer than forty-eight hours.

(4) The abolition of child labour, the fixing of an age, which should in no case be lower than 14, and should where possible be 16, as the minimum age for admission to employment. . . .

(5) The provision of an adequate and effective system of inspection. . . .

In committee, this resolution was amended on a close vote of 11-10 to delete the reference to the objective of the 40-hour week. Notice was served on the Committee by Mr. Moore that steps would be taken when this resolution came before the plenary session to have this particular clause re-inserted, and an amendment to this effect was submitted by the Workers' Delegate from the United States. After re-consideration of the entire circumstances the employers' delegates withdrew their opposition, and the resolution as originally presented was adopted.

Adoption of Resolution of Canadian Workers' Delegate

Among the resolutions adopted by the Conference was that submitted by Mr. Moore, the Workers' Delegate for Canada. This resolution requested "the Governing Body to instruct the Office to study and to report to the International Labour Conference upon the extent to which the exercise of civil liberties, within the nations and in the areas in which wage-earners live and work, is a necessary condition to improvement in the economic status of the worker."

Amplifying the intent of this resolution before the Conference, Mr. Moore stated:

"Mr. President, I have not occupied this rostrum before during this Conference, being quite satisfied to make such contribution as I could in the work of the Committees. I feel, however, that at this time, it may be necessary to make a very brief statement as to the purposes of this particular resolution. It was adopted unanimously by the Resolutions Committee, and I do not anticipate that it will necessitate discussion here. It has long been recognized, even by those living under the freest form of political democracy, that political democracy alone is not sufficient, but that it must be coupled, if it is to exist and develop, with economic and industrial democracy. To those usually classed as workers, who are dependent on the sale of their labour for their free existence, questions of political and economic democracy take on more than an academic meaning. They have a real meaning, and the question at all times in the minds of the workers is to what extent do we cash in, what benefits do we receive from these particular forms of democracy. We have to consider the two extremes—conditions such as exist in some countries where native labour is hired under contract conditions and where the workers have very few liberties; this is generally referred to as the problem of 'native labour' in Geneva. We find there the lowest standard of living, where practically no liberties exist—either political or economic. Then, there is the other extreme—we have the United States where there has developed during the past few years perhaps the fullest form of economic democracy within the framework of a political democracy, and we find that they have there established what I think can justly be claimed as one of the highest, if not the highest, standards for workers in the world.

"What this resolution seeks, therefore, is for the Governing Body to authorize the Office to make an enquiry on how a political and economic democracy—its existence or its absence—affects the economic status of workers, particularly as regards wages and working conditions, and it is for that reason that I ask approval at this Conference of this particular resolution."

Committee on Social Insurance

The first report dealt with two resolutions submitted by the Cuban Government Delegation. The first resolution invited the Governing Body of the International Labour Office to impress upon the American States the desirability of basing their social insurance policy on the fundamental principles adopted by the Santiago Conference in 1936. The second called attention to the three functions of social insurance: prevention, restoration and compensation. The resolution points out the advantages which social insurance possesses over other methods of collective provision and indicates the substantial contributions which social insurance is able to make to the economic security and health security of workers and their families. It further affirms the common will to achieve justice and social progress of the American States which desire to increase their productive capacity and to raise the standard of living of workers both in town and country.

The second report dealt with workmen's compensation sickness and maternity insurance, invalidity, old age and widows' and orphans' insurance and unemployment insurance.

Committee on Immigration

The report of the Committee on Immigation consisted of two parts, the first dealing with the general discussion and the second with the organization of official institutions for immigration and settlement. Several speakers emphasized the great importance that immigration had and still has for their countries, both for the development of their natural resources and for the improvement of their standard of living and of general progress and suggested that measures of national organization should be completed by international co-operation, notably as regards financing.

The second section of the report listed the requirements arising out of application of a policy of developing migration for settlement.

Committee on Work of Women and Juveniles

The first report dealt with women, and its findings were embodied in a series of resolutions on maternity protection, including (*a*) regulation of relations under the contract of employment; (*b*) benefits during maternity leave; (*c*) care and supervision in respect of health; (*d*) social aid for wage-earning mothers. The report continued with a summary of the discussion on protection of women's wages which included (*a*) fixing of statutory minimum wage rate; (*b*) application of the principle of equal wages for equal work. Other subjects dealt with included homework, protection of women employed in domestic service and agriculture, the right of married women to work, preparation of statistics on women's work, women's right to representation at international labour conferences, women's general rights.

The second report of the Committee dealt with the conditions of employment of juveniles, including the age for admission to

employment, fitness for work, special services, night work, street trading, apprenticeship and administration relating to the work of women and juveniles.

Opening Addresses and Messages

The Conference was formally opened by Mr. Carter Goodrich, Government Delegate of the United States and Chairman of the Governing Body, who called upon His Excellency Dr. Miguel A. de la Campa, Secretary of State of the Republic of Cuba. Dr. Campa cordially welcomed the members of the Conference in the name of the Republic and the Cuban Government, pointing out that they were meeting "to investigate in a friendly spirit what are the most adequate measures to maintain good understanding between the different representative interests of the supreme social energies which are latent in each of our several nations."

The Secretary of State's address of welcome was followed by four speeches from the representatives of the delegation from the Governing Body of the I.L.O., including Mr. Fabela, Government delegate of Mexico; Mr. Carter Goodrich of the United States, Chairman of the Governing Body; Mr. Georges Curcin of Jugoslavia of the employers' group of the Governing Body; Mr. Robert Watt of the United States, of the workers' group of the Governing Body; Mr. Victor Pinto, Government delegate of the Argentine Republic; Mr. Jaramillo Sanchez, employers' delegate of Colombia, and Mr. Lombardo Toledano, workers' delegate of Mexico.

Among the more important communications received by the Conference was a letter from the President of the United States and a message from the Government of Great Britain.

President Roosevelt declared that this Conference is another significant example of the effectiveness of an agency like the International Labour Organization, which even in times like these can serve the people of various nations without regard to boundary lines or battlefront."

Continuing he stated:

> The twenty years of the I.L.O.'s existence has proven the usefulness of such an organization in time of peace. I am confident that it can and will be of service to its members, indeed to society as a whole, in time of war. Its many activities make it the focal point from which should come the constant reminder, in these tragic times, that a humane civilization can flourish only under conditions of just human relationships.
>
> May I express the sincere hope of the Government of the United States of America that there will be no lessening of the activities of the International Labour Organization during the existing world emergency. We pledge ourselves to continue our full part in its constructive, non-political, international effort for the betterment of living standards.

The message from the Government of Great Britain was read by Mr. Norman, observer for that country at the Conference. Expressing "greatest satisfaction" that in spite of the difficult world situation, the Conference of American States was taking place as a normal function of the I.L.O., the message continued in part as follows:

> His Majesty's Government in the United Kingdom, closely associated with its foundation, has always given warmest support to the Organization and it does not propose to diminish this support owing to the fact that it is now involved in war. Vital labour problems which are the concern of the Organization are in no way diminished in the present circumstances and, indeed, in some respects they are increased.

Report of Director

In presenting his report to the Conference, the Director of the International Labour Office, Mr. John G. Winant, indicated the greater responsibilities of the Organization in a world under the burden of war, thus:

> In this war crisis, the function of the Organization is to preserve and to extend the social frontiers of democracy. No nation is too small to be outside its field of interest nor so great and powerful that it can long ignore the problems with which it is concerned. The future of mankind depends upon the type of civilization which emerges after this war, upon the type of world institutions which are created after it and the intensity of the allegiance which they can command from the common man, upon economic and social practices, and upon the way in which they affect the social evolution which dominates our times.

With particular reference to reciprocal relations with the Americas, the Director stated:

> In discussing social questions on a regional basis, however, the countries of the New World should not forget that the basic problems are shared by the rest of the world. Regionalism should be kept within the broader framework of international understanding.
>
> The International Labour Organization has accepted the challenge explicit in the present world situation. What it asks of the American countries is complete reciprocity of relations. The Organization is ready to increase its services to the Americas, but in return it asks for sincere and sustained support from them to the world-wide organization whose essential aims coincide with their own social objectives. The importance of American support for the International Labour Organization has never been more fundamental, and the opportunity for the New World to contribute to the creation of a new and genuinely social civilization has never been so great.

Under various chapter headings, the Director dealt with the following: The Place of American Economy in World Economy; The Progress of Social Legislation in American Countries; The International Labour Code in the American Countries; and American

Countries in the International Labour Organization.

The development of social legislation was reviewed under the following headings: Nutrition, housing, minimum wage regulation, social insurance, women and young workers, labour inspection, holidays and recreation, and conditions of indigenous workers.

Discussion of Director's Report

The discussion on the Director's report ranged a wide field with particular emphasis on war problems and the relationship of Latin America thereto. Contributing to this discussion were two Canadian delegates—Dr. Riddell and Mr. Macdonnell.

Canadian Government Delegate.—Referring to the economic and social aspects of the report, Dr. Riddell observed:—

> As our people become more conscious of the solidarity of the Western world, it is to be expected that co-operation between our countries on a mutually advantageous basis will result in even a greater exchange of ideas, of services, and of commodities. The result should be an increase in the general prosperity which will enable us to build surer foundations for social well-being and thus make possible for our peoples greater social and economic security.

As indicated in the Director's chapter on "American Countries in the International Labour Organization," Canada's participation was active and continuous from the beginning, and Dr. Riddell further emphasized this country's part in being represented by complete delegations. He also referred to the unusual continuity in the personnel of Canadian representation. "This long and active participation in the work of the International Labour Organization," stated Dr. Riddell, "is the best criterion and affords the greatest assurance of Canadian collaboration in the future."

Dr. Riddell declared that the Canadian delegation was deeply appreciative of the inspiring messages which had been received by the Conference from his Majesty's Government in the United Kingdom and from President Roosevelt.

In conclusion he emphasized that "democracy in industrial relations cannot survive without democracy in political relations," and that "the International Labour Organization can flourish only in a world in which democratic peoples have a voice."

Canadian Employers' Delegate.—Mr. Macdonnell, the Employers' Delegate from Canada, also commented on the Director's reference to the function of the I.L.O. as being "to extend the social frontiers of democracy." "There is no word," he added, "that the Director could have used to express more clearly exactly what he means—no word better than democracy." Voicing the democratic ideal in the relationship between the individual and the state, Mr. Macdonnell emphasized its importance "at a time when these principles are being not merely challenged but derided."

In concluding, Mr. Macdonnell referred to the democratic nature of the Conferences with full representation of all parties, free discussion and majority rule—all the evidences of "a real parliamentary sense in this Conference" as in its predecessors. "In other words," he said, "the democratic spirit and method may be said to have proved themselves in the international as well as in the national field. It is perhaps not too much to say that our presence here means that we see in the continued and intensified application of this spirit and method the best, indeed the only, hope for the future."

Meeting of Permanent Agricultural Committee

Meeting at the same time and place as the Second Labour Conference of American States, the second session of the Permanent Agricultural Committee was convened, Canada being represented by Dr. J. F. Booth, Associate Director of Marketing, Agricultural Economics, Dominion Department of Agriculture. This meeting was held in Havana as a result of war conditions in Europe which had made necessary the postponement of the scheduled September meeting.

The agenda of the meeting comprised two items:—

(1) the effect of the present situation on the welfare and standard of living of agricultural populations.
(2) the extension of social insurances to the rural populations.

On the first item, the Committee spent the greater part of its sittings in examining carefully the question of the effect of the present situation on the welfare and standard of living of the agricultural population. It unanimously agreed as to the wisdom of the International Labour Office in submitting this important problem for international discussion so soon after outbreak of war.

Dealing with the subject of the extension of social insurance to the rural population the Committee expressed the belief that it was likely that the interest of the rural population in social insurance schemes which was a development of relatively recent years would rapidly increase.

The Committee was also united in expressing the hope that Governments would pay full attention to the desires for social insurance and assistance schemes which may be

brought forward by the rural population, finding support for the realization of the plans they may establish in the Conventions and Recommendations concerning insurance schemes against various social risks for agricultural workers adopted by the International Labour Conference during its sessions of the years 1921, 1933 and 1937.

On the other hand, the meeting expected the International Labour Office to continue its research on ways and means to facilitate the introduction of social insurance to agricultural workers and to place the results of its studies as soon as possible before the Permanent Agricultural Committee or the International Labour Conference.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Meeting of Emergency War Committee

IN the November issue of the LABOUR GAZETTE (page 1141) reference was made to a meeting in September of the Emergency War Committee to which the Governing Body of the International Labour Office has delegated its powers during the war, owing to the impossibility of convening the Governing Body itself.

The Emergency War Committee met again on October 10-12 and it was noted that since its September meeting 4 more Governments had affirmed in writing their support of the principle of the continued functioning of the Organization in time of war. The total number of favourable replies which have now been received is 31.

It decided that the 1940 Session of the International Labour Conference should be held unless absolutely impossible for some material reason, and requested the I.L.O. to study the preparation and date of that Conference.

With regard to the actual work of the Organization, the Committee approved the program of special studies and technical consultations submitted by the International Labour Office.

During the discussion which took place on this subject, the Workers' members of the Committee recalled, together with the immediate problems resulting from the present international situation, the important questions which would have to be solved at the conclusion of the war. They stressed the sacrifices of all kinds which are at present asked of the working class in all countries.

Mr. Jouhaux (France) recalled that the I.L.O., by its tripartite constitution, united the representatives of two forces—employers and workers—directly concerned with the life of a country, and the representatives of a third force which holds the balance between the former two. It was thus better qualified than any other organization to develop the new social policy which will be necessary at the conclusion of the war to reconcile authority and liberty, the requirements of production, and the well-being of the workers.

Mr. Kupers (Netherlands) developed the importance of the constitutional problems of the International Labour Organization: the enlargement of its competence in the economic field; the development of its autonomy; and the embodiment in the provisions of its Constitution of the right of the worker to work or to receive adequate relief in case such work cannot be provided.

Mr. Hallsworth (Great Britain) and Mr. Mertens (Belgium) stressed the special service that the I.L.O. is called on to fulfil in wartime, to factory workers as well as to soldiers in the trenches—to see that the fullest provision be made for soldiers' families, for safeguarding the conditions of soldiers on their return and of dealing properly with the relatives of the men who may not return, and seeing that their places in civil life after the war be ensured, etc.

Mr. Serrarens (Netherlands) expressed similar views in the name of the Christian Trades Unions.

In the name of the Employers' group, Messrs. Oersted (Denmark) and Lambert-Ribot (France) recalled the support given by the Employers' representatives to the International Labour Organization. They agreed with the Workers' representatives in declaring that peace could only be established on the basis of social justice. There would doubtless be difference of opinion on one point or another in the future, but there could be no question of there not being loyal collaboration between Workers and Employers.

Mr. Justin Godart, French Government representative, was happy to note the agreement between the Employers' and Workers' groups and the Governments, in support of the I.L.O. carrying out the work required of it to meet the needs of the present time. He stressed in particular the necessity of preparing a careful documentation on the important post-war problems, by studying specially the methods of workers' participation in the management and profits of industry and the development of the wage-earning system towards one of collaboration.

Mr. Gambs, United States Government representative, speaking of the special studies of the Office, emphasized the importance of the problems of vocational training and of the role played by professional organizations in economic and social reorganization.

Mr. Helio Lobo, Brazilian Government representative, showed that the Conference of countries of America, convened at Havana at the end of November, was a first and very important stage in the work to be accomplished by the I.L.O. during and after the war. It will be of the greatest value both for the countries of the continent of America and for the International Labour Organization, as it will deal with problems peculiar to the countries of that continent and with the effects of the war on the economy and social conditions both of the countries of America and of those in Europe.

The next sitting of the Emergency Committee is to be held in January, and will be followed by a plenary meeting of the Governing Body of the I.L.O., circumstances permitting.

Shop Hours Legislation in South Africa

On June 16, 1939, the Parliament of the Union of South Africa passed a Shops and Offices Act to regulate hours and conditions of work in shops throughout the union. The Act is expected to affect some 100,000 employees. The most important provisions relating to hours of work and holidays with pay are summarized in the following paragraphs extracted from a recent issue of *Industrial and Labour Information.*

History of the Act.

The original Bill, which was the outcome of recommendations made by the Industrial Legislation Commission in 1935, was introduced during the 1938 session of Parliament but later withdrawn and referred to a Select Committee. It was reported back on April 14, 1939, with some important amendments, including the reduction of the proposed limits of hours from 48 to 46 in the week and from 8½ to eight in the day. The Act is based on the provincial Shop Hours Ordinances previously in force and repeals and supersedes those of their provisions which deal with hours of work. It does not, however, regulate the opening and closing hours of shops, since it was considered that this was a matter for local government, and the provincial authorities will therefore continue to regulate trading hours as before.

Scope of the Act.

The Act applies to all shops, including restaurants, tearooms and eating-houses and hairdressers' and barbers' saloons, but excluding hotels and boarding houses. The Minister of Labour is also empowered to extend any or all of its provisions to any classes of offices in areas that he may specify.

Hours of Work.

Weekly hours of work may not exceed 46. In urban areas to be designated by the Minister, daily hours of work are normally limited to eight and the daily spreadover to a maximum of two hours in excess of the total number of hours worked, so that an eight-hour day would have to be worked within a spreadover of 10 hours. In rural areas and country towns, no daily limit is fixed but the spreadover must be limited to 12 hours. This spreadover also applies to restaurant and tea-room employees in all areas.

Extensions and Exceptions.

In designated areas in which an eight-hour day is prescribed this may be lengthened to nine hours on one day of the week and to 10 hours on the weekday preceding Christmas Day. Employees may also be required to work without extra pay for not more than one additional hour weekly in all and, in designated areas, for not more than 15 extra minutes daily, in order to attend to late customers. Further, the limits of hours do not apply in case of emergency work, defined as any work which, owing to causes such as fire, storm, accident, act of violence, or theft, must be done without delay.

In addition, overtime may be worked up to a total of not more than six hours in the week and 30 hours in the year for unspecified purposes and for a further 15 hours a year for the purpose of the packing and dispatch of goods. Such overtime may not, however, be worked on a Sunday nor on more than one weekly half-holiday or public holiday in the year. All overtime worked under this provision must be paid for at the rate of not less than time-and-a-quarter.

Other features include provisions for a weekly half holiday and two weeks annual holidays with pay.

Juvenile actors of Hollywood are now under the jurisdiction of the California Labor Commission. The consent of the State Labor Commissioner must be obtained before minors are employed and he has announced that satisfactory records must be furnished with regard to the child's school attendance, school progress and health. Formerly the Los Angeles school system issued permits.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, OCTOBER, 1939

THE accompanying information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on November 1 was 11,914, the employees on their pay-rolls numbering 1,206,183 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,951, having an aggregate membership of 244,063 persons, 9·0 per cent of whom were without employment on November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of November, 1939, As Reported by Employers

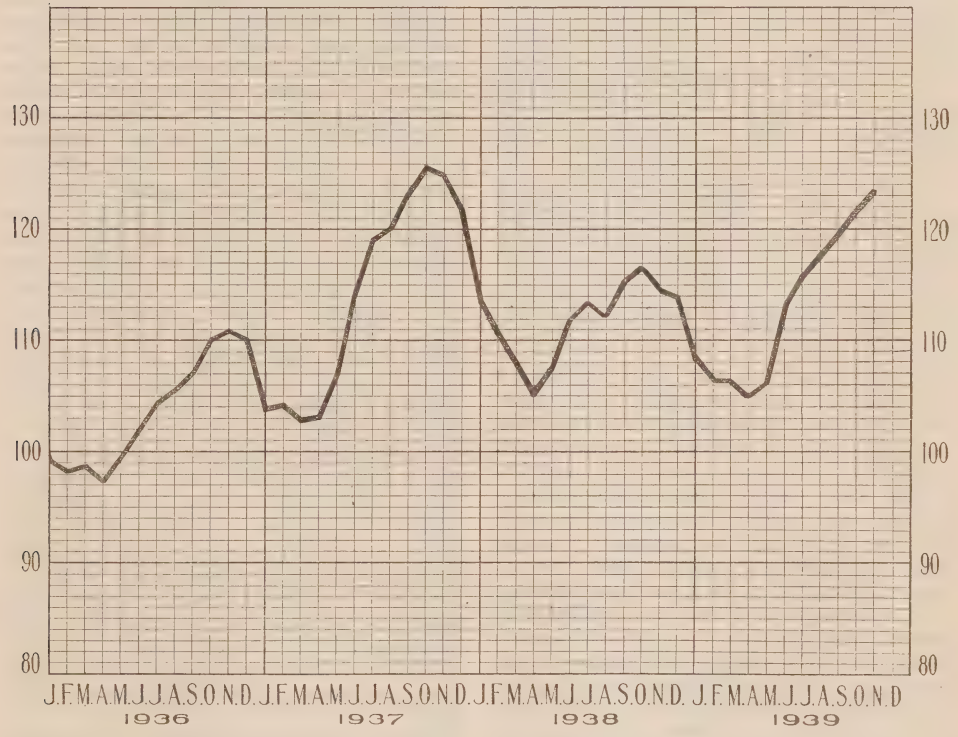
Industrial employment showed pronounced, contra-seasonal expansion at the beginning of November, continuing the uninterruptedly favourable movement in evidence since the first of April. During these seven months the index (1926 = 100) rose by 18·7 points to 123·6 at November 1, an advance which in the years since 1920 has only once been exceeded, by that recorded in the same period of 1937. The latest index was higher than in any other November for which data are available, except 1929 and 1937, when the figures were 124·6 and 125·2, respectively.

The Dominion Bureau of Statistics tabulated returns from 11,914 establishments employing 1,206,183 men and women, an increase of 18,914 or 1·6 per cent over their October 1 staffs. As already mentioned, this improvement is contrary to the usual seasonal trend from October to November; accordingly, the index of employment when corrected for seasonal influences, showed an advance, the adjusted figure rising from 115·8 in the preceding month, to 118·3 at the beginning of November.

In recent years of the record, the unadjusted indexes at November 1 have been as follows (1926 = 100): 1939, 123·6; 1938, 114·6; 1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9, and 1927, 108·8.

Employment in manufacturing showed a substantial increase, reversing the usual seasonal movement at the first of November; this advance resulted in the highest level of activity indicated in any month in this record of nearly nineteen years, the November 1 index, at 122·1, being slightly above the previous high points in 1937 and 1929. Some 12,700 persons were added to the payrolls of the co-operating employers between October 1 and November 1, 1939, an increase of 2·1 per cent. The largest gains were in iron and steel and textile plants, while seasonal losses were reported in food and lumber factories.

In the non-manufacturing industries, logging reported important seasonal improvement, the co-operating camps furnishing work for 26,600 additional employees; with one exception (viz., 1937), this was the largest November 1 increase in the years for which data are available. Trade and mining also reported heightened activity. On the other hand, transportation and construction and maintenance showed pronounced contractions; although these were seasonal in character, they exceeded the average losses indicated in those industries in preceding years of the record.



For November 1 of last year, 11,049 employers had reported staffs aggregating 1,100,263, a decrease of some 19,800 persons as compared with their October 1, 1938, returns. The contractions in construction and transportation were then most pronounced, while manufacturing, services and communications had also released employees.

Employment in Financial Organizations

For some months, statistics of their employment have been collected from banks, trust companies and stock market operators. At the beginning of November, 413 firms and branches in these lines of business reported staffs aggregating 33,264 persons, compared with 33,354 in the preceding month. The addition of these figures to the returns furnished in the manufacturing, logging, mining, transportation, communications, construction, services and trade industries brings the total number of employees included in the November 1 survey of employment to 1,239,447 in 12,326 establishments, and slightly lowers the index of 123·6 in the industries above enumerated, to 123·2; when the employees of the co-operating financial organizations were added to the general figures for October 1, the index was lowered from 121·7 to 121·3. Comparable data for 1938 are not available.

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Employment by Economic Areas

In New Brunswick, Quebec and Ontario important additions to staffs were reported, but the tendency in the remaining provinces was seasonally downward. The largest losses in employment took place in Saskatchewan. In that province, the index was lower than at November 1, 1938; in New Brunswick and Ontario it was below the level of the same month in 1937, but with these exceptions, employment at November 1, 1939, was generally more active than in the autumn of any preceding year since 1931.

Maritime Provinces.—There was a decrease in industrial activity in Prince Edward Island and Nova Scotia, but this was slightly more than offset by improvement in New Brunswick, with the result that there was little general change in the Maritime Provinces as a unit. Returns were received from 833 employers in this area with 87,250 workers on their payrolls, compared with 87,215 at the beginning of October. The factory group as a whole showed moderate improvement; additions to staffs were recorded in vegetable food, pulp and paper, textile and some other plants, but lumber and animal food factories were seasonally slacker. Heightened activity was

indicated in mining, building and trade, and there were large, seasonal increases in logging camps. On the other hand, transportation and highway and railway construction and maintenance reported curtailment.

A considerable decline had been recorded at November 1, 1938, by the 807 co-operating establishments, whose payrolls had included 82,494 men and women; the index was then some five points lower than at the latest date, when employment was, however, in less volume than at November 1, 1937.

Quebec.—Important expansion was shown in Quebec, chiefly in logging, although manufacturing, building and trade also afforded more employment. On the other hand, there were losses in mining and transportation, and in highway and railway construction and maintenance work. Within the manufacturing group, the leather, pulp and paper, textile, chemical, iron and steel and non-ferrous metal divisions showed gains, but contractions were indicated in the lumber, vegetable food, electrical apparatus and some other classes. The 2,959 reporting employers enlarged their forces by 14,634 workers, bringing them to 375,718 at November 1; the gain amounted to 4·1 per cent. Activity was much greater than at November 1, 1938, when a considerable decline had been indicated in the 2,749 establishments furnishing information, whose staffs had numbered 337,692.

Ontario.—The trend was decidedly upward in Ontario at the beginning of November, the 5,212 firms whose data were tabulated having a combined working force of 494,488 persons, or 11,770 more than in the preceding month. This was the largest November 1 increase ever recorded; the average change at that date in the eighteen preceding years for which statistics are available has, however, been unfavourable, so that the latest advance is contra-seasonal. There were substantial gains in logging as the camps gradually opened for the winter's operations. Mining and trade showed moderate improvement from October 1, while there was very pronounced expansion in manufacturing. This took place chiefly in the textile and iron and steel divisions, but increased activity was also shown in leather, pulp and paper, rubber, chemical, clay, glass and stone, electrical apparatus, non-ferrous metal and non-metallic mineral plants. On the other hand, the food and lumber industries reported seasonal reductions in staffs; transportation and construction and maintenance also released employees, the largest losses being in work on the highways. General curtailment had been noted in Ontario at the beginning of November, 1938; the index was then 9·4 points lower than at the latest date, when it stood at 124·4. For November 1 of last year, statistics had been received from 4,808 employers with 450,092 men and women on their paylists.

Prairie Provinces.—There were seasonal decreases in employment in Manitoba, Saskatchewan and Alberta at November 1, 1939. Returns were compiled from 1,696 firms in the Prairie Provinces, having 147,137 employees, as against 151,828 at October 1. Manufacturing, logging, coal-mining, building and retail trade afforded more employment, but there were declines in communications, transportation and highway and railway construction and maintenance. Most of the gains in manufacturing occurred in food factories. On the whole, the shrinkage in this area was on a much smaller scale than that recorded at November 1, 1938, and the index then was lower, standing at 108·1, as compared with 112·7 at the date under review. Statements had been tabulated for November 1 of last year from 1,548 establishments employing 137,972 workers; this was a decrease of 6,519 from their October 1, 1938, payrolls.

British Columbia.—A seasonal contraction in employment was recorded in British Columbia; the staffs of the 1,214 employers furnishing returns aggregated 101,590, compared with 104,424 in the preceding month. The reduction (which approximated the average at November 1 in the years since 1920) took place largely in construction, manufacturing and transportation, with smaller losses in logging, mining and services. In the group of factory employment, there were important seasonal reductions in food canneries, and in non-ferrous metal plants. On the other hand, lumber and iron and steel works were brisker. Employment generally was more active than at November 1 of last year, when 1,137 establishments had reported a total working force of 92,013 persons, compared with 95,308 in the preceding month. The index then stood at 107·5, as compared with 115·5 at November 1, 1939, when it was higher than in any other November for which data are available.

Table 1 gives index numbers by economic areas.

Employment by Cities

Additions to staffs were recorded in Montreal, Toronto, Ottawa, Hamilton, Windsor and Winnipeg; in Quebec City the tendency was slightly upward, while there was a falling-off in activity in Vancouver. Except in Quebec, the volume of employment in these centres was greater than at the beginning of November 1938.

Montreal.—Further improvement of a contra-seasonal nature took place in Montreal at

November 1, when 678 persons were added to the payrolls of the 1,718 co-operating firms, who employed 171,936. Trade, building and manufacturing showed heightened activity, the largest increases being in the last-named, mainly in food, textile and iron and steel factories. On the other hand, transportation and road construction were quieter. A decrease had been noted at the same date of last year, and the index was then several points lower. Statements for November 1, 1938, had been received from 1,583 establishments providing work for 164,254 men and women.

Quebec City.—Little general change took place in Quebec, according to 211 employers of 15,523 persons, compared with 15,509 at October 1. Construction, transportation and services showed declines, which were rather more than offset by gains in manufacturing and trade; the improvement in the former was of a general character. Employment was not so active as at the beginning of November, 1938, when the 193 co-operating business enterprises had employed 16,405 workers, or 268 more than at October 1, 1938.

Toronto.—There was a substantial increase in the payrolls of 1,766 firms in Toronto, who had 150,920 men and women in their employ, a number greater by 4,223 than in their last report. This gain, and that recorded at October 1, were larger than in any preceding month of the years for which data are available, and resulted in the highest level of industrial activity since midsummer of 1930. Most of the expansion took place in manufacturing, in which chemicals, foods, printing and publishing, iron and steel and other heavy industries and textiles showed improvement, that in the last-named being most pronounced. Construction, services and trade also afforded more employment. A small advance had been registered at the beginning of November of a year ago, when the index was nearly eight points lower; the 1,626 employers making returns for November 1, 1938, had reported staffs aggregating 138,304, compared with 138,111 in the preceding month.

Ottawa.—In Ottawa, moderate improvement was shown in manufacturing, particularly in the iron and steel and pulp and paper divisions; services, building and trade were also rather brisker, while road work afforded less employment. The 230 establishments furnishing data employed 15,316 persons, as against 15,054 at October 1. Employment was in greater volume than at the same date in 1938; the trend had then been downward, according to information from 211 employers of 14,203 workers.

Hamilton.—Industrial activity greatly increased in Hamilton at November 1, when the 331 co-operating firms reported 36,771 employees, or 1,507 more than at the beginning of October. Manufacturing afforded decidedly more employment, mainly in the textile, iron and steel and electrical apparatus group. Small gains also took place in building, transportation and trade. A decline had been recorded at the beginning of November of last year, and the index was then decidedly lower. The November 1, 1938, paylists of the 304 reporting employers had included 33,311 men and women.

Windsor.—The situation in Windsor showed a further improvement; 195 establishments reported 19,414 persons in their employ, compared with 17,260 at the beginning of October. The increase took place mainly in the automobile and related industries, but transportation and building were also rather busier. A smaller gain had been indicated at the same date of a year ago, when employment was at a lower level. Statistics for November 1, 1938, had been tabulated from 191 firms, whose staffs aggregated 17,958.

Winnipeg.—Employment again advanced in Winnipeg, according to 530 employers with 43,325 workers at the beginning of November, as compared with 43,122 in their last report. Manufacturing was brisker, especially in food, leather and textile plants; trade also showed an upward movement, while communications, transportation, building and road construction released employees. Figures furnished by 498 concerns at the first of November of last year showed that they had 40,712 men and women on their payrolls; the employment index then stood at 94·7, compared with 99·3 at the date under review. This is the highest November 1 figure since that of 1930.

Vancouver.—The movement was again downward in Vancouver, where the 522 co-operating establishments had 38,361 persons on their staffs, or 329 fewer than in the preceding month. Manufacturing was more active, but transportation, construction and services showed declines. Industrial activity generally was at a higher level than at the beginning of November of last year, when greater curtailment had been reported by 476 firms, whose employees had numbered 35,972, a reduction of 1,387 from October 1, 1938.

Employment by Industries

Manufacturing.—Employment in manufactures showed marked contra-seasonal expansion at November 1, the gain being the largest of the four increases which have been indicated at that date during the nineteen years for which these monthly surveys have been made; in the remaining fifteen years, the movement at the beginning of November has been unfavourable. The 6,472 co-operating establishments reported 626,375 employees, or 12,691 more than at October 1. The index (1926=100)

rose from 119·7 in the preceding month, to 122·1 at November 1, when it was higher than in any other month of the record, being slightly above the previous maximum of 121·7 at October 1, 1937.

Since the increase was not only contrary to the usual seasonal trend, but was also extensive, the seasonally-adjusted index gained substantially, rising from 116·0 at the beginning of October, to 121·0 at the date under review.

Marked improvement was shown in textile and iron and steel plants at November 1, 1939, when the advances were greater than in any other November for which data have been compiled; indeed, they have rarely been exceeded in any month of these nineteen years. The leather, chemical, electrical apparatus, pulp and paper, electric light and power, non-ferrous metal, non-metallic mineral and other industries also afforded more employment than at the beginning of October. On the other hand, animal and vegetable food, beverage and lumber factories released employees, the declines being mainly of a seasonal nature.

For November 1, 1938, 6,217 manufacturing establishments had reported 565,332 employees, compared with 573,426 in the preceding month.

The unadjusted indexes of factory employment (calculated on the 1926 average as 100) have been as follows at the beginning of November in recent years: 1939, 122·1; 1938, 110·9; 1937, 119·0; 1936, 107·7; 1935, 103·5; 1934, 92·8; 1933, 86·5; 1932, 81·7; 1931, 88·8; 1930, 104·6; 1929, 117·2; 1928, 115·1 and 1927, 104·9.

Animal Products—Edible.—Meat-preserving plants reported greatly increased activity, but seasonal curtailment was indicated in dairies and fish-canneries. Statistics were received from 311 manufacturers, employing a staff of 28,940, as compared with 29,370 in the preceding month. This decrease, which took place largely in British Columbia, was much greater than that registered at the corresponding date last year, when employment was, however, at a lower level.

Leather and Products.—There were decided increases in personnel in all branches of this group at November 1, mainly in Quebec and Ontario. The 332 firms furnishing data reported 25,377 workers, as against 24,636 at October 1. The index was seventeen points higher than at the same date in 1938; a large decline had then been noted.

Lumber and Products.—Further seasonal contractions, involving fewer employees than were released in the autumn of last year, were indicated in the lumber group, where employment was in greater volume than in November, 1938. The shrinkage at the date under review took place principally in rough and dressed lumber mills, while furniture, vehicle and some other wood-using works showed improvement. A combined working force of 47,814 men and women was reported by the 949 co-operating manufacturers, as compared with 49,243 at the beginning of October. The most pronounced decreases were in Ontario, but the tendency was downward in Quebec and the Maritime Provinces. In Alberta and British Columbia, on the other hand, heightened activity was indicated.

Musical Instruments.—Little general change was noted in musical instrument factories, 36 of which employed 1,668 persons, or seven more than at October 1. Employment was brisker than at the beginning of November, 1938, when a loss had been recorded.

Plant Products—Edible.—Fruit and vegetable canneries reported very marked seasonal reductions in their payrolls, while the chocolate and confectionery, sugar and syrup and some other divisions of this industry showed advances. The forces of the 544 co-operating firms included 44,681 employees, or 4,160 fewer than in their last return. Employment declined in Quebec and Ontario, notably in the latter, while improvement was noted in the Maritime Provinces. The curtailment, on the whole, involved many more workers than were released at the corresponding date last year; the index number then, however, was decidedly lower than at the date under review.

Pulp and Paper Products.—The trend of employment in this group was upward, according to data from 708 establishments with 70,668 men and women on their payrolls, as compared with 69,385 at the beginning of October. Moderate improvement was recorded in printing and publishing houses, in the manufacture of paper products, and in pulp and paper mills. There were general advances, those in Ontario being most pronounced. A contraction had been indicated at the beginning of November a year ago, and the index was then over six points lower.

Rubber Products.—Employment in rubber goods showed a further but small increase at November 1; information was compiled from 53 firms with 14,442 employees, as against 14,332 in their last report. Activity was above its level at November 1, 1938, although a larger gain had then been noted.

Textile Products.—Cotton, woollen, silk, knitting, garment and some other textile factories reported heightened employment; 1,167 manufacturers enlarged their payrolls from 110,065 at October 1 to 116,633 at the date

under review. The largest increases were in Quebec and Ontario, although the trend was generally favourable. On the whole, a loss had taken place at the beginning of November last year, when the index was over eleven points lower.

Beverages.—A reduction was recorded in beverage plants, 149 of which furnished statistics showing 9,768 persons on their payrolls, as compared with 10,065 at October 1. There were moderate, general declines. Curtailment had also been indicated at the corresponding date last year, but employment was then quieter.

Tobacco.—There was a slight falling-off in tobacco manufacturing at the beginning of November, when the 45 co-operating establishments employed 8,134 men and women. No general change had been shown at November 1, 1938, but the index was then a little lower.

Chemicals and Allied Products.—In this group, statements were furnished by 317 plants employing 20,726 persons, or 842 more than in their last report. The index was many points higher than at November 1, 1938; a smaller gain had then been recorded.

Clay, Glass and Stone Products.—Seasonal curtailment was noted in brick manufacturing, but glass and stone products afforded more employment. Activity in this group generally was at a higher level than at November 1, 1938, a general contraction having then taken place. The forces of the 222 employers from whom information was received had risen since October 1 by 171 persons, to 11,201 at the beginning of November, 1939.

Electric Light and Power.—Employment in the production of electric light and power showed improvement, 236 workers being added to the payrolls of the 103 co-operating manufacturers, who employed 18,218 persons. An increase had also been indicated in this industry at November 1 of last year, but the index was then rather lower.

Electrical Appliances.—There was another advance in electrical apparatus works, 126 of which had 18,884 employees, or 377 more than at October 1, 1939. A downward movement had been in evidence at the same date in 1938, when employment was in slightly smaller volume.

Iron and Steel Products.—Automobile, agricultural implements, crude, rolled and forged, machinery, structural iron and steel, foundries and machine shops, tool and other iron and steel works showed important increases in personnel. The general gains were the largest reported at any November 1 of the record, while employment in this division reached its highest level since the end of 1937. Statements were received from 931 manufacturers whose staffs aggregated 140,796, as compared with 132,867 at October 1, 1939. Most of the advance took place in Ontario, but the tendency was also favourable in Quebec, New Brunswick, Saskatchewan and British Columbia.

Non-ferrous Metal Products.—Data tabulated from 191 firms in the non-ferrous metal group showed that they employed 26,385 workers, or 197 more than at October 1. The increase occurred largely in the manufacture of lead, tin, zinc, copper and aluminum products. The level of employment was higher than at the same date of 1938, when a general loss had been indicated.

Non-metallic Mineral Products.—There was a further advance in activity in non-metallic mineral factories, 98 of which added 384 persons to their staffs, bringing them to 13,425 at the beginning of November. The index was higher than at November 1 of last year, the tendency having then been downward.

Logging

Statistics were tabulated from 398 firms employing 60,709 men, or 26,604 more than in the preceding month. This advance was decidedly larger than that reported at November 1 in any other year of the record except 1937, greatly exceeding the average gain recorded at that date in the years since 1920. The index, at 206·4, was considerably above its level of last autumn. There were increases at the date under review in all provinces except British Columbia, those in Quebec being most extensive.

Mining

The mining of coal and of metallic ores afforded more employment, but quarrying and other non-metallic mineral production were quieter. Statements were received from 422 mine operators, with 79,444 employees, a number greater by 336 than in their last report. Of the total staff recorded at the date under review, 25,780 members belonged in coal-mining, 9,618 in the extraction of other non-metallic minerals, and 44,046 in metallic ore mining. A larger increase had been indicated at the same date in 1938, but the index then was below its level at the time of writing.

Communications

Telephones and telegraphs showed moderate, seasonal contractions; the companies and branches making returns had 23,148 workers on their payrolls, a loss of 215 since October 1. The index of employment was slightly higher than at November 1, 1938, when a larger falling-off had been noted.

Transportation

Street Railways and Cartage and Storage.—There was a small reduction in activity in local transportation, according to 293 firms whose staffs aggregated 30,787 at the beginning of November, as compared with 30,878 in the preceding month. The decline occurred chiefly in Ontario and the Prairie Provinces. Employment was in greater volume than at the corresponding date in 1938; the loss then reported had been on a much larger scale.

Steam Railways.—Statistics were tabulated from 100 divisional superintendents and other employers in the railway operation group, whose payrolls were reduced by 4,062 persons, to 62,991 at November 1. The most extensive contractions were in the Prairie Provinces. Employment was brisker than at the beginning of November, 1938, although a smaller decline had then been indicated.

Shipping and Stevedoring.—A falling-off was noted in water transportation, 122 companies employing 15,973 workers, as compared with 16,921 in the preceding month. There were moderate losses in New Brunswick, Quebec, Ontario and British Columbia. A smaller decrease had been shown at November 1 last year, and the index then stood at 94·6, compared with 86·1 at the date under review.

Construction

Building.—There was a further improvement in building, 1,373 persons being added to the forces of the 883 co-operating contractors, who had 36,400 employees; this number was greater than that reported by the firms making returns at the beginning of November, 1938, when the trend had also been favourable. There were advances at the date under review in the Maritime Provinces, Quebec and Manitoba; in Ontario and Saskatchewan, little general change took place, while in Alberta and British Columbia the tendency was downward.

Highway.—Work on highways and streets decreased in all provinces, the largest losses being in Quebec and Ontario. Statements were tabulated from 436 employers, whose staffs, standing at 80,201, were smaller by 13,854 persons than at October 1, 1939. The index, at 209·1 at the beginning of November, was lower than at the same date in 1938, despite the fact that the reported contraction had then been on a much larger scale.

Railway.—Seasonal curtailment of railway construction work was generally recorded, the most marked reductions occurring in Ontario and Saskatchewan. The forces of the 32 companies and divisional superintendents furnishing returns declined from 30,147 persons at October 1, to 25,823 at the beginning of November. This shrinkage was considerably smaller than that registered at the corresponding date in 1938, and employment was then in less volume.

Services

Hotels and restaurants were seasonally quiet, while there was a small gain in laundering and dry-cleaning, according to 595 firms employing 29,850 persons, or 201 fewer than at the

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS

(AVERAGE CALENDAR YEAR 1926=100)

[1] For explanation of term "Relative Weight", see footnote to Table 1.

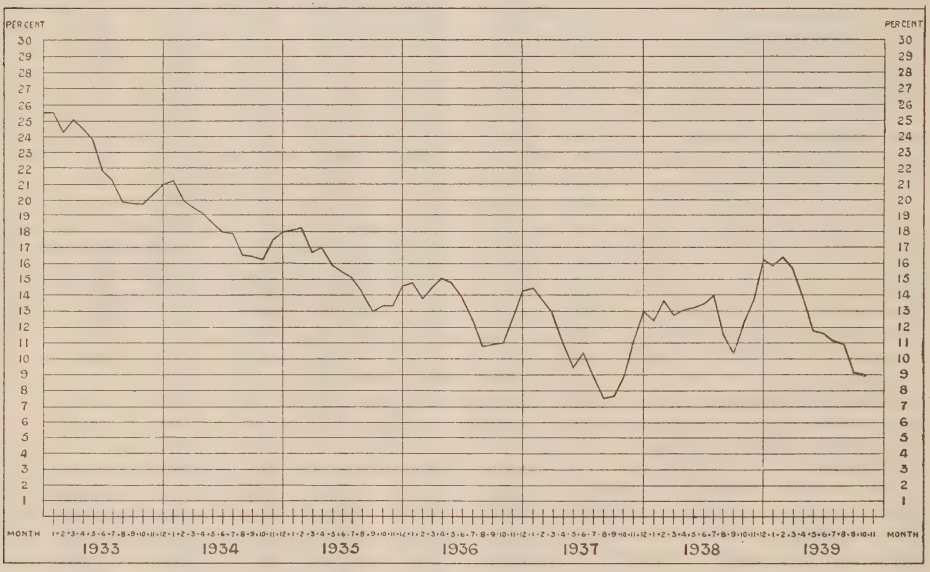
beginning of October. The index, at 135·2, was slightly higher than that of November 1, 1938; a much larger decline, on the whole, had then been indicated.

Trade

The trend of employment in trade was again seasonally upward, 1,605 workers being added to the forces of the 2,075 retail and wholesale houses furnishing returns, whose staffs aggregated 134,482. The increase took place mainly in the retail division, wholesale trade showing only a slight advance. The index stood at 140·2, compared with 135·6 at November 1, 1938, when the reported gains had not been so extensive. Further pronounced expansion in employment may be expected during the next few weeks, in

preparation for the Christmas and holiday trade.

TABLES



Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of October, 1939

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work in other than their own trades or who are idle due to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

There was scarcely any change in the volume of activity afforded local trade union members at the close of October from the previous month, the percentage of unemployment standing at 9·0 in comparison with 9·1 per cent in September. The percentage for the month under review was determined from the reports received from 1,951 labour organizations with an aggregate of 244,063 members, 22,039 of whom were without work on the last day of the month. Some fluctuation, however, was apparent in the various provinces when contrasted with September conditions, Ontario, Alberta and British Columbia unions showing a slight tendency toward increased employment, which was almost counteracted by the recessions evident in the remaining provinces. The changes with the exception of Saskatchewan, which showed an employment drop of 4 per cent, were quite small, slowing up in steam railway operation being mainly responsible for the less favourable movement noted from that province. The level of employment among trade unions showed some improvement during October over the corresponding month of last year when 12·3 per cent of the members reported were out of work. In this comparison Manitoba unions reported a noteworthy increase in activity during the period surveyed, and in Ontario and New Brunswick gains of somewhat lesser degree occurred. More moderate advancement was recorded from Alberta, Quebec and British Columbia. Nova Scotia and Saskatchewan were the only

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

provinces to indicate lessening in available work, though the variations from October, 1938, were slight.

Each month the records of unemployment for the largest city in each province with the exception of Prince Edward Island are tabulated separately. Of these Edmonton and Halifax members were afforded a moderately better volume of work during October than in September, and in Toronto, Winnipeg and Vancouver the situation tended favourably, but the changes were of minor importance. Employment losses on a small scale, however, were manifest by Saint John, Montreal and Regina unions. Winnipeg members were considerably busier during October than in the corresponding month of last year, notably in the manufacturing industries and in Edmonton also important gains occurred. More moderate improvement was evident among Saint John, Toronto and Vancouver unions. Montreal and Regina unions also showed an upward movement of employment. Restricted activity, though on a small scale, was manifest by Halifax members.

The chart which appears with this article shows the trend of unemployment by months from January, 1933, to date. The curve during October remained on much the same level as in September, what nominal change was indicated being in a favourable direction. A somewhat better trend of activity was noted also from October, 1938, when the curve remained above that of the month under review.

The manufacturing industries during October with 576 unions reporting a total of 97,522 members showed that 10,037 were unemployed on the last day of the month, a percentage of 10·3, as contrasted with percentages of 10·8 in September and 13·3 in October, 1938. Extensive employment gains from September were apparent among wood and glass workers, while conditions for fur workers were moderately improved. A more favourable tendency also obtained for jewellery, hat, cap and glove, and iron and steel workers, mill and smelter men, and papermakers. There was, however, a slight lowering in the employment volume available to leather, garment, cigar and tobacco, brewery, textile and carpet, and unclassified workers, metal polishers, printing tradesmen and bakers and confectioners. Marked employment recovery from October, 1938, in the manufacturing industries was in evidence among glass, wood, hat, cap and glove workers, mill and smelter men, and meat cutters and butchers, and improvement of noteworthy degree was recorded by iron and steel, and jewellery workers, and metal polishers. More moderate expansion was shown by garment, textile and carpet, brewery, unclassified and gas workers, bakers and confectioners, and papermakers. Leather workers, on the contrary, suffered severe losses in employment from October last year, and slight recessions were indicated by printing tradesmen, fur, and cigar and tobacco workers.

The coal mining industry during October reflected a continuation and extension of the favourable movement apparent in September, the 55 organizations from which reports were tabulated, embracing a membership of 21,228 persons, showing that 789, or a percentage of 3·7, were out of employment as compared with 6·0 per cent in the previous month. A better volume of work was afforded also than in October last year when 7·3 per cent of the members reported were idle. Activity in the Western coal fields was largely responsible for the more favourable situation noted in the industry as a whole from September, Alberta members particularly showing noteworthy advancement, while in British Columbia the increases were of more moderate proportions. In Nova Scotia there was but a fractional rise in activity. New Brunswick miners were all reported busy as in September. Both the Eastern and Western areas participated in the advancement noted in coal mining from October last year, though, as in the previous comparison, the bulk of the expansion originated in the West, Alberta and British Columbia unions showing substantial employment gains. The New Brunswick situation improved moderately and slight increases were registered from Nova Scotia.

In the building and construction trades a more favourable trend of activity was manifest during October than in the preceding month, although the change was but fractional, according to the returns compiled from 213 associations with an aggregate of 26,023 persons. Of these, 5,332, or a percentage of 20·5, were idle at the close of the month in contrast with 21·3 per cent of inactivity in September. Substantially better conditions, however, prevailed than in October, 1938, when unemployment stood at 31·8 per cent. Bricklayers, masons and plasterers, and tile layers, lathers and roofers were much better engaged during October than in the preceding month, and among bridge and structural iron workers, plumbers and steamfitters, and carpenters and joiners the increases registered were of somewhat smaller proportions. A nominally improved situation was reflected by electrical workers. Steam shovelmen, however, were much slacker than in September, while recessions of considerably lesser degree were noted by painters, decorators and paperhangers, and hod carriers and building labourers. Retarded activity on a small scale was manifest by granite and stonecutters. The improvement registered by bricklayers, masons and plasterers,

and carpenters and joiners accounted in large measure for the better situation shown in the building and construction trades as a whole from October, 1938, though pronounced gains were reflected by plumbers and steamfitters, and noteworthy advancement was evident among electrical workers and tile layers, lathers and roofers. On the other hand, bridge and structural iron workers, and hod carriers and building labourers were decidedly less active and a substantial increase in slackness was shown by painters, decorators and paperhangers. Employment for granite and stonecutters was moderately curtailed, while among steam shovelmen the recessions indicated were slight.

The transportation industries at the end of October registered a small drop in activity when compared with the previous month, as shown by the reports tabulated from 839 organizations, including 65,992 members. Of these 3,604 were unemployed at the close of the month, a percentage of 5·5, contrasted with 4·2 per cent of idleness in September. A favourable employment movement was apparent from October, 1938, when 7·8 per cent of the membership reported was without work. In the steam railway division, which constituted about 79 per cent of the entire group membership reported, and among street and electric railway employees activity declined slightly from September, though conditions were somewhat better than in October last year. Opportunities for navigation workers were considerably improved in each comparison, while among teamsters and chauffeurs approximately the same volume of activity was afforded as in September, but some slight employment curtailment was noted from October last year.

The 5 unions of retail shop clerks making returns at the close of October, with 1,364 members, showed that all were busy compared with only 0·1 per cent of inactivity in September and with a percentage of 0·3 in October a year ago.

Some falling off in work afforded was apparent among civic employees during October from both the preceding month and October, 1938, according to the reports compiled from 78 associations, with 9,603 members. Of these 355 were idle at the end of the month, a percentage of 3·7 as contrasted with percentages of 1·2 in September and 1·4 in October a year ago.

The level of employment in the miscellaneous group of trades during October remained much the same as in September, the 143 local unions forwarding reports, with a membership numbering 10,523 persons, showing an unemployment percentage of 6·2 as compared with 6·5 per cent in the preceding month. Much improved conditions prevailed, however, from October, 1938, when 14·7 per cent of idleness was recorded. The changes in the various trades in comparison with September were quite small, theatre and stage, and hotel and restaurant employees, barbers and stationary engineers and firemen showing an upward movement of employment, and unclassified workers slight declines in activity. All trades shared in the improvement reflected from October, 1938, unclassified workers indicating a decidedly better situation during the period reviewed and the remaining trades gains of much lesser importance.

A considerable drop in activity was shown by fishermen during October from September, but conditions were somewhat more favourable than in October last year. This was apparent from the reports furnished by 6 associations with 2,269 members, 364 or 16·0 per cent of whom were reported idle in com-

parison with percentages of 7·9 at the close of September and 20·1 in October, 1938.

Reports were tabulated at the end of October from 6 unions of lumber workers and loggers, embracing a membership of 2,352 persons, 487 of whom, or a percentage of 20·7 were unemployed, in contrast with 21·2 per cent of inactivity in September and with a percentage of 8·1 in October a year ago.

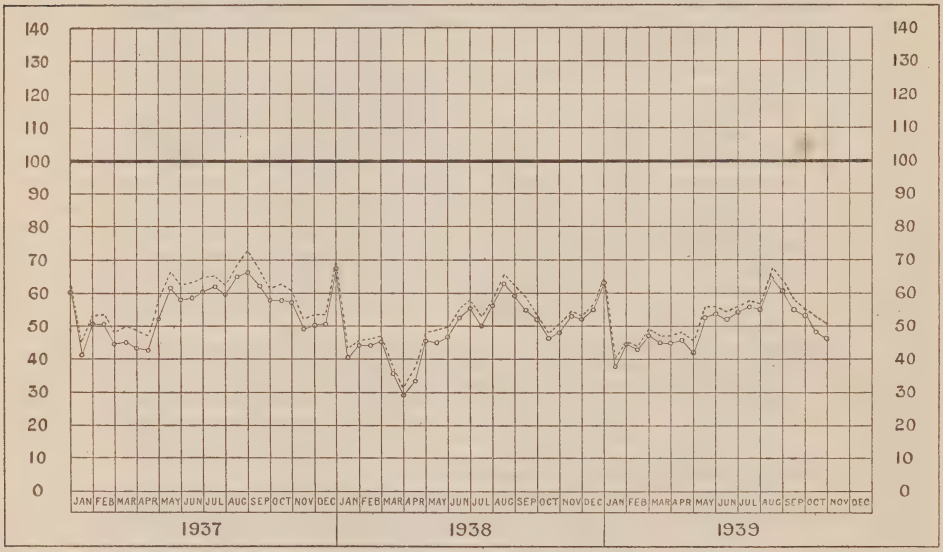

Table I shows by provinces the percentage of members who were on an average unemployed, each year, from 1929 to 1938 inclusive, and also the percentages of unemployment by provinces for October of each year from 1929 to 1936 inclusive, and for each month from October, 1937, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for October, 1939

The volume of business transacted by the offices of the Employment Service of Canada during the month of October, 1939, showed a decrease in the average daily placements of 10 per cent when a comparison was made with the report for September, 1939, but a nominal increase over that of the corresponding month a year ago. Registration of applicants, however, during the period under review was less than the number recorded during October, 1938. In comparison with September, 1939, farming and construction and maintenance showed a marked decline in employment, followed by losses of smaller amounts in manufacturing, trade, transportation and mining, with advances being reported in logging and services, the greatest of which was in the first named group. When a comparison was made with October, 1938, all groups, except construction and maintenance, farming and transportation, recorded increased placements, the most noteworthy improvement being shown in logging, services and manufacturing, but the losses recorded in construction and maintenance and farming were substantial and practically offset the gains; the decline in transportation, however, was small.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The accompanying chart shows the trend of employment since January, 1937, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be noted from the graph that the curves of vacancies and placements in relation to applications followed a downward course throughout October, the more pronounced drop taking place during the latter half of the month, when the levels reached were somewhat lower than those recorded at the close of October

last year. The ratio of vacancies to each 100 applications was 53·3 during the first half and 48·8 during the second half of October, 1939, in comparison with the ratios of 48·0 and 50·8 during the corresponding periods of 1938. The ratios of placements to each 100 applications during the periods under review were 51·1 and 46·6 as compared with 46·5 and 48·0 during the corresponding month of 1938.

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during October, 1939, was 1,487, as compared with 1,658 during the preceding month and with 1,479 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,923, in comparison with 2,928 in September, 1939, and with 2,989 during October last year.

The average number of placements made daily by the offices of the Service during October, 1939, was 1,421, of which 958 were in regular employment and 463 in work of one week's duration or less, as compared with a total daily average of 1,585 during the preceding month. Placements in October a year ago averaged 1,414 daily, consisting of 917 in regular and 497 in casual employment.

During the month of October, 1939, the offices of the Service referred 37,235 persons to employment and effected a total of 35,505 placements. Of these, the placements in regular employment were 23,937, of which 17,953 were of men and 5,984 of women, while placements in casual work totalled 11,568. The number of vacancies reported by employers was 25,106 for men and 12,051 for women, a total of 37,157, while applications for work numbered 73,057, of which 52,022 were from men and 21,035 from women. Reports for September, 1939, showed 41,433 positions available, 73,178 applications made and 39,608 placements effected, while in October, 1938, there were recorded 36,970 vacancies, 74,715 applications for work and 35,348 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service of Canada, each year, from January, 1929, to date:

Year	Placements		
	Regular	Casual	Total
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939 (10 months)	209,359	122,270	331,629

Nova Scotia

During the month of October, positions offered through employment offices in Nova Scotia were nearly 4 per cent less than in the preceding month and over 3 per cent below the corresponding month of last year. There was a decrease also in placements of over 6 per cent when compared with September and of over 4 per cent in comparison with October, 1938. The decrease in placements from October of last year was almost entirely due to a decline under construction and maintenance, as, with the exception of a nominal loss in transportation, all other groups showed improvement. The largest gains were in logging and farming. Placements by industrial divisions included manufacturing 61; logging 73; farming 69; construction and maintenance 340 and services 614, of which 489 were of household workers. During the month 374 men and 168 women were placed in regular employment.

New Brunswick

There was an increase of 9 per cent in the number of positions offered through employment offices in New Brunswick during October when compared with the preceding month and of over 8 per cent in comparison with the corresponding month of last year. There was an increase also in placements of nearly 8 per cent when compared with September and of over 7 per cent in comparison with October, 1938. An increase in services accounted for the gain in placements over October of last year, as the small improvement reported in manufacturing and logging was offset by a decline in construction and maintenance. The changes in other groups were nominal only. Placements under construction and maintenance numbered 401 and in services 750. Of the latter, 518 were of household workers. There were 56 men and 107 women placed in regular employment.

Quebec

Orders received at employment offices in the Province of Quebec during October called for nearly 8 per cent more workers than in the preceding month, but nearly 4 per cent less than during the corresponding month of last year. There was an increase of nearly 9 per cent in placements when compared with September, but a decline of nearly 7 per cent when compared with October, 1938. There was a large decrease in placements in the highway division of construction and maintenance when compared with October of last year and a moderate decline in transportation. These reductions were largely offset by a substantial gain in logging and a large increase in services. Improvement was also reported in manufacturing. Placements by industrial

divisions included manufacturing 174; logging 1,667; construction and maintenance 2,405 and services 3,484, of which 3,278 were of household workers. Placements in regular employment numbered 4,406 of men and 2,148 of women.

ONTARIO

Opportunities for employment, as indicated by orders received at employment offices in Ontario during October, were over 5 per cent fewer than in the preceding month and more than 31 per cent above the corresponding month of last year. There was a decrease of nearly 6 per cent in placements when compared with September, but an increase of nearly 28 per cent in comparison with October, 1938. With the exception of a fairly large decrease in construction and maintenance and a small loss in trade, all industrial divisions showed improvement in placements over October of last year. The most important gains were in logging and manufacturing. There were also fairly important increases in services, farming, transportation and mining. Industrial divisions in which most of the placements were effected during the month were manufacturing 1,534; logging 2,423; farming 1,211; mining 100; transportation 149; construction and maintenance 3,741; trade 326 and services 4,276, of which 2,883 were of household workers. During the month 6,505 men and 1,943 women were placed in regular employment.

MANITOBA

Positions offered through employment offices in Manitoba during October were fractionally higher than in the preceding month, but 7 per cent less favourable than during the corresponding month of last year. There was an increase of nearly 5 per cent in placements when compared with September, but a decline of 2 per cent when compared with October, 1938. A large decrease in farm placements and a small loss in services were the only declines in placements from October of last year. Of the gains in all other groups, the most important were in construction and maintenance and logging. Placements by industrial divisions included manufacturing 66; logging 304; farming 481; construction and maintenance 2,380 and services 908, of which 724 were of household workers. During the month 3,200 men and 440 women were placed in regular employment.

SASKATCHEWAN

There was a decline of 56 per cent in the number of positions offered through employment offices in Saskatchewan during October when compared with the preceding month and of over 48 per cent in comparison with the corresponding month of last year. There was a decrease also in placements of 57 per cent when compared with September and of over 46 per cent in comparison with October, 1938. The decrease from October of last year was almost entirely due to a large decline in farming, although a moderate loss was also reported in services. Small changes only were reported in all other groups, the largest of which was a gain in logging. Industrial divisions in which most of the placements were effected during the month were farming 637; construction and maintenance 156, and services 758, of which 498 were of household workers. There were 769 men and 370 women placed in regular employment.

ALBERTA

Orders received at employment offices in Alberta during October called for nearly 38 per cent fewer workers than in the preceding month, but over 2 per cent more than during the corresponding month of last year. There was a decrease of over 37 per cent in placements when compared with September, but an increase of nearly 15 per cent in comparison with October, 1938. With the exception of small losses in services and manufacturing, all industrial divisions showed gains in placements over October of last year, the largest being in logging and farming. Placements by industrial divisions included logging 190; farming 977; construction and maintenance 274; trade 67, and services 637, of which 455 were of household workers. There were 1,536 men and 346 women placed in regular employment during the month.

BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at employment offices in British Columbia during October, were nearly 13 per cent less than in the preceding month and nearly 26 per cent below the corresponding month of last year. Similar percentages of loss were reported in placements under both comparisons. The decline in placements from October, 1938, was due to a large decrease under construction and maintenance. There were minor losses also in mining and logging. All other groups showed gains, the largest being in services, manufacturing and trade. Placements by industrial divisions included manufacturing 138; farming 115; transportation 80; construction and maintenance 1,599; trade 137 and services 1,000, of which 672 were of household workers. During the month 1,107 men and 462 women were placed in regular employment.

Movement of Labour

During the month of October, 1939, the offices of the Employment Service of Canada made 23,937 placements in regular employment, 11,256 of which were of persons for whom

the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter 1,486 were granted the Employment Service reduced transportation rate, 1,286 going to centres within the same province as the despatching office and 200 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service, who may desire to travel to distant employment for which no workers are available locally.

Transfers at the reduced rate in Quebec during October numbered 19, of which 4 were provincial and 15 interprovincial. The former were issued at the Quebec City office to building construction workers going to Chicoutimi. The movement outside the province originated at Hull, from which centre 15 bushmen were carried to Pembroke. Offices in Ontario during October granted 1,197 reduced rate certificates, all provincial. These were issued for the most part to workers bound for the logging districts of the province, the Port Arthur zone receiving 901 bush workers, the Fort William zone 153, the Sudbury zone 94, the Pembroke zone 5, and the Sault Ste. Marie zone 4, a total of 1,157. A number of offices assisted in the transfer of these. From Fort William one blacksmith and one hotel employee, and from Port Arthur 31 highway construction workers, 2 carpenters, one hotel general and one domestic journeyed to employment within their respective zones. To the Fort William zone also, one electrician was transferred from Kenora. The Sudbury zone was the destination of one foreman despatched from Pembroke, and the North Bay zone of one blacksmith transferred from Timmins. Workers taking advantage of the Employment Service reduced transportation rate in Manitoba during October were 208 in number, 23 of whom were bound for provincial situations and 185 for employment outside the province. Provincially the Winnipeg office assisted in the despatch of 10 bushmen, 6 farm hands, 3 miners, 2 sawmill workers, one hotel porter and one logger within its own zone, while the interprovincial movement was also from Winnipeg and included 175 bushmen, 5 miners, 2 cooks, one blacksmith and one farm hand going to Port Arthur and one farm hand to Yorkton. In Saskatchewan during October 4 bushmen were transported at the reduced rate to Prince Albert on certificates secured at Saskatoon. Reduced rate certificates were granted in Alberta during October to 54 persons travelling to provincial employment. These were issued at the Edmonton office to 28 miners, 15 bushmen, 7 highway construction labourers, one oil refinery worker, one teamster, one millwright, and one housekeeper proceeding to various points within the Edmonton zone. In British Columbia during October 4 persons were conveyed at the reduced rate to provincial situations. Of these, the Vancouver office transferred one sawmill engineer to Kamloops, one cook-general to Nelson, and one farm hand within its own zone, while from Prince Rupert one carpenter was bound for a point within the Prince Rupert zone.

Of the 1,486 persons who travelled at the Employment Service reduced transportation rate during October, 614 journeyed over the Canadian National Railways, 870 over the Canadian Pacific Railway, one over the Temiskaming and Northern Ontario Railway, and one over the Pacific Great Eastern Railway.

In order to facilitate the movement of harvest labour within the Prairie Provinces there was in addition to the 2·5 cents rate referred to in the above, a special harvest rate afforded by the railway companies, effective from August 1st this year and terminating October 15. Under this arrangement the railway companies granted a special rate at 1·5 cents per mile to all applicants upon presentation of a certificate supplied by the offices of the Employment Service in Manitoba and Alberta, the movement being confined entirely to the localities within their respective provinces. The labour movement under this plan for August and September has been outlined in the two previous issues of the LABOUR GAZETTE. During the first fifteen days of October, however, there were transfers within Alberta of 36 harvest workers, 32 of whom travelled by the Canadian National Railways and 4 by the Canadian Pacific Railway.

(4) Building Permits Issued in Canada during October, 1939

The estimated cost of the building authorized by 58 cities during October was $5,612,269; this was an increase of $1,497,818, or 36·4 per cent, as compared with the September total of $4,114,451, but a decrease of $3,936,418, or 41·2 per cent, from the exceptionally high figure of $9,548,687 recorded in October, 1938. Although the estimated value of the building work represented by the permits issued during the month under review was lower than in the same month of last year, it was higher than in any other October since that of 1931.

The value of the construction authorized in the first ten months of the present year was $49,539,913; this was lower than the aggregate of $52,732,080 reported in the period, January-October, 1938, but with this exception was the highest recorded in the first ten months of any

year since 1931. The cumulative total in each of these years has been substantially lower than in preceding years of the record; the wholesale prices of building materials have recently been lower than in the same period of either 1937 or 1938, although they continue higher than in any of the years, 1931-1936.

Some 50 cities furnished detailed statistics, showing that during October they had issued about 580 permits for dwellings estimated to cost approximately $1,900,000, and some 2,200 permits for other buildings valued at more than $3,600,000. During September, authority was granted for the erection of about 450 dwellings and 2,100 other buildings, the estimated cost being approximately $1,500,000 and $2,290,000 respectively.

All provinces except Alberta recorded increases in the value of the building authorized as compared with September, 1939, the gains of $1,003,106, or 48·1 per cent, in Ontario and $205,509, or 200·8 per cent, in Nova Scotia being greatest. Alberta showed a decrease of $73,242, or 24·7 per cent, in this comparison.

As compared with October, 1938, there was improvement in Prince Edward Island, Nova Scotia, New Brunswick, Manitoba and British Columbia. Nova Scotia showed the most pronounced increase of $230,403, or 297·5 per cent, while the largest declines in this comparison were those of $1,886,337, or 66·8 per cent, in Quebec, and $1,462,574, or 32·1 per cent, in Ontario.

TABLE I

Year	Value of permits issued in October	Value of permits issued in first ten months	Indexes of value of permits issued in first ten months (1926=100)	Average indexes of wholesale prices of building materials in first ten months (average 1926=100)
	$	$		
1939	5,612,269	49,539,913	36·7	88·1†
1938	9,548,687	52,732,080	39·1	90·1

Montreal reported an increase in the value of authorized building as compared with the preceding month, but a decrease as compared with the same month of last year. In Toronto, Winnipeg and Vancouver there was improvement from September, 1939, and also as compared with October, 1938.

Of the other centres, Charlottetown, Halifax, Fredericton, Moncton, Saint John, Fort William, Galt, Guelph, Hamilton, Kingston, Kitchener, London, Niagara Falls, Owen Sound, Sault Ste. Marie, Welland, Brandon, Calgary, Lethbridge and Victoria reported increases over September, 1939, and also as compared with October, 1938.

Table I gives the value of the building authorized by 58 cities during October, and in the first ten months of each year since 1926, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1926 are also given (average, 1926=100).

As already stated, the aggregate for the months, January to October in 1939, though lower by 6·1 per cent than in 1938, was higher than in the same period in any of the six years immediately preceding; however, the total for each year since 1931 has been substantially below the average figure of $97,252,229 reported during the first ten months in the nineteen years, 1920-1938. The average index number of wholesale prices of building materials, though rather lower than in 1937 or 1938, was higher than in preceding years since 1930.

Table II gives the value of the building permits issued by each of the 58 cities during October, 1939, and October, 1938. The 35 cities for which records are available since 1910 are marked thus (*).

EMPLOYMENT CONDITIONS IN CANADA AT THE END OF NOVEMBER, 1939

Reports of Superintendents of the Employment Service of Canada

THE employment situation at the end of November was reported by the Superintendents of the Employment Service to be as follows:

Farmers in the Maritime Provinces had completed their season's work and were making preparations for cutting firewood. Logging in general, was quiet; the Christmas tree industry, however, was at its height, with prospects good for more business than usual. Fishing was only fair, due to unfavourable weather. Coal mines in the New Glasgow area operated from 4¼ to 6 days per week, and those in Cape Breton and vicinity from 4 to 6 days. Manufacturing showed little marked change; some idleness was reported by the iron and steel industries and confectioners were very busy preparing for the Christmas trade. Clothing factories and woollen mills, too, were working overtime. With the exception of repairs and the erection of a few dwellings, little new construction was under way, although the building of huts for the militia at Saint John and the installation of plumbing and heating afforded work in that city for a large number of skilled workmen. Transportation was about normal and wholesale and retail trade better, with collections fair. There was little demand for charworkers in the Women's Division, while the call for housemaids had increased considerably.

Farming was quiet in the Province of Quebec, but logging showed great activity. At Matane all available bushmen were working, with some difficulty experienced in securing applicants. Steady employment in this industry was also reported from other localities, although at Val d'Or the demand was somewhat less than in October. General improvement was noted in manufacturing throughout the province, particularly at Montreal, Quebec and Three Rivers. At Sherbrooke, a great demand for woollen goods was reported, as well as increased production in iron works, due to war contracts. Factories at Chicoutimi and Hull also were running at full capacity and sawmills were busy at Thetford Mines. Building, except in the Eastern Townships, was slacker, nearly 1,000 men having been released from dam construction at LaTuque and little highway work was in progress. Trade was satisfactory and requests for help in household service fairly numerous.

Farming activity in Ontario was confined chiefly to routine work, thus, the demand for help was materially reduced. With logging camps practically filled—an aggregate personnel of 2,300 working in the North Bay zone alone—production was nearing its peak, hauling being attendant on sufficient snow fall. Camps in some centres were smaller than usual, but also more numerous and as the chief requests received were only for replacements, many experienced loggers remained unemployed. Mining was very quiet, except at Timmins, where the situation was normal; nevertheless, there the demand for extra help had seasonally declined. The general industrial outlook was favourable and employment on the whole remained steady, although a shortage of

materials in various industries, particularly in the iron, steel and textile trades, had delayed progress in the filling of orders and had caused a slackening in production until materials could be obtained. Strike conditions in the United States also had reduced the output in some of the automobile factories, while others were gradually increasing their staffs. Mild weather played an important part in prolonging building operations much later than usual, with the result that the greater share of skilled tradesmen had obtained employment. Few large new contracts were being started and in some cases shortage of steel delayed progress on buildings already under way. A number of men also were employed by the Department of National Defence in the erection or renovation of quarters for military units. Highway construction was about completed. Docks were busy with inbound cargoes and the shipment of grain to the east, which at Port Arthur was the heaviest in years. Trade was fair. Calls for women in domestic service were increasing and operators were also needed in textile, rubber, leather, paper, food and hat factories, but clerical positions were largely limited to those for temporary stenographers.

In Alberta, good weather had permitted the completion of practically all threshing; there was, nevertheless, a fairly steady number of farm placements in all Prairie Provinces, although the majority of these were made under the Farm Placement Plan. Mining was not so active, strikes in Saskatchewan having lessened production there. Milder temperatures throughout the west also had held up orders in this group, as well as delaying logging operations. Manufacturing showed little change. At Winnipeg, industries were apparently waiting for expected activity in connection with national services. Increased registration was noted under the Youth Training program and many applications were received from men and women who were reporting for war work. Building construction was slack and trade in most seasonal lines, good. The Women's Division was generally quiet, with the usual difficulty found in obtaining experienced household help.

Little demand existed in British Columbia for farm help. Apple packing houses, however, were working double crews filling orders for export. Weather conditions hindered logging operations, mainly disrupting haulage. Certain sawmills in the Alberni district were curtailing operations and in other localities working short time; those at Prince George were active. Coal mines were busy, but metal mines quiet, although returning placer miners reported a profitable summer. Building construction was brisk and at Victoria employment in this line had reached a higher peak for the month of November than in any similar period over a number of years. This was accounted for by a large number of Defence projects. Registration for individual war work also was heavy, the majority of persons applying for public assistance being those of the unskilled group, whose wages were not sufficient for a winter lay-over. Shipyards were quiet at Prince Rupert and the movement of grain from Alberta to the local elevator continued, although other waterfront work was slack. At Victoria, clearance of ships had not been so frequent and no extra men had been needed, but shipyards were busy, most metal mechanics being employed. Trade was fair. A good demand existed for household domestics, although registration of new applicants increased daily, many of whom came from the Prairies.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, November, 1939, summarized the employment situation as follows: Employment at October 16, 1939, showed some decline, on the whole, as compared with September 11. The decline occurred largely in certain industries which normally experience a seasonal recession at this period of the year, but the increases in unemployment this year were greater than those which normally occur between September and October in those industries. At October 16, 1939, the total number of persons on the registers of Employment Exchanges in Great Britain showed an increase of 99,710 as compared with September 11. Part of this increase, however, was due to the registration of women offering their services for work in connection with the war; a large proportion of these women had not previously been in insured employment.

Of the total increase in October, much the greater part occurred in the London and Southern Divisions. There were decreases in unemployment in the Midlands and North Midlands Divisions; in the East and North of England, Scotland and Wales the increases in unemployment were smaller than in London and the South of England.

The industries showing the most marked increases in the numbers unemployed included building, public works contracting, hotel and boarding house service, the distributive trades, the printing industry, laundry

service, local government service, road transport, dock and harbour service, and agriculture, horticulture, etc. On the other hand there were substantial decreases in unemployment in coal mining, the textile and clothing industries, metal goods manufacture, the furniture trade, the fishing industry and the entertainments, sport, etc., industries.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at October 16, 1939, was 9·4, as compared with 9·0 at September 11, 1939, and 12·3 at October 17, 1938. For persons insured under the general scheme the corresponding percentages were 9·7 at October 16, 1939, 9·2 at September 11, 1939, and 12·7 at October 17, 1938. For persons within the agricultural scheme the percentages were 3·9, 3·4 and 4·3 respectively.

United States

In a press release dated November 29, Miss Frances Perkins, United States Secretary of Labor, announced that preliminary figures for mid-November indicated a further gain in factory employment. In making this announcement Miss Perkins stated that normally factory employment showed a decline of 1·8 per cent in November. However, this year even after allowing for seasonal curtailment in the canning and apparel industries, there was an estimated net gain between mid-October and mid-November of 25,000 in the number of workers who returned to jobs in American factories. This estimate is exclusive of changes in employment in the automobile industry for which figures are not available.

The following paragraphs taken from the official press release indicate the employment situation in the United States to be as follows:—

The current increase, combined with the succession of gains shown in the five preceding months, represents an aggregate increase of 850,000 in the number of factory workers between May and November. The gain from October to November, although substantially smaller than those which occurred between August and September and between September and October, is at a greater rate, with allowance for seasonal factors, than in any month during the period of rising employment in 1936-37, except December, 1936.

Between September and October nearly 400,000 workers were returned to jobs in non-agricultural occupations. In addition to a greater-than-seasonal gain of 250,000 workers in manufacturing, concentrated largely in the durable goods industries, substantial gains were reported in wholesale and retail trade and in mining. Wholesale establishments took on approximately 30,000 additional workers in October and retail stores added 52,000 workers to their staffs. Anthracite and bituminous coal mines employed approximately 40,000 more workers than in the preceding month and metal mines added 2,700 to their forces.

Class I steam railroads expanded their forces for the tenth consecutive month, reports of the Interstate Commerce Commission showing an increase of 34,406 workers between September and October. Employment in the construction industry showed a seasonal decline. Reductions were also reported in crude petroleum producing, telephone and telegraph, and laundries.

Factory Employment.—Employment in manufacturing industries expanded for the fifth consecutive month. The employment gain between September and October was 3·3 per cent or 250,000 wage earners. Weekly pay rolls rose by 8·2 per cent or $14,600,000. Of the 90 industries surveyed, 75 showed employment gains and 76 pay-roll increases. The October gains in factory employment and pay rolls exceeded the October increases reported during any of the preceding 20 years.

The factory employment index for October, which stood at 103·3 per cent of the 1923-25 level, was 11·8 per cent above the figure for October, 1938, and the pay-roll index, at 101·3 per cent of the 1923-25 average, was 20·3 per cent above a year ago. Both indexes are at the highest level since the autumn of 1937.

The most marked increases from September to October were in the durable-goods group of industries—6·8 per cent for employment and 13·1 per cent for pay rolls. The corresponding increases for the non-durable-goods group were 0·4 per cent and 3·4 per cent. Employment in the durable-goods group was 19·8 per cent higher than a year ago, and pay rolls were 32·7 per cent higher. For the non-durable-goods group the gains over the year interval were 5·7 per cent and 9·5 per cent.

The aircraft industry reported a gain of 6·2 per cent or 2,500 in the number of wage earners, marking the thirteenth consecutive monthly increase. The employment index for this industry is at an all-time high with about three times as many people employed as in 1929.

Only 3 of the durable-goods and 12 of the non-durable-goods industries reported employment declines in October.

Employment in Non-Manufacturing Industries.—Retail establishments increased employment between mid-September and mid-October by 1·5 per cent and pay rolls by 2·6 per cent. The October employment gain,

although slightly smaller than the average October increase reported for the last 10 years, follows a greater-than-seasonal increase between August and September. The increase in retail-trade employment since July was greater than that shown for the same period in 1938 and 1937. Between October, 1938, and October, 1939, the employment and pay-roll gains were 3·1 per cent and 4·8 per cent, respectively.

Wholesale trade establishments increased the number of their employees by 2·1 per cent, a much larger gain than the average October increase for the last decade of 0·8 per cent. The employment index, 92·4 per cent of the 1929 average, stood at the highest point since December, 1937. Pay-rolls also showed a substantially greater-than-seasonal rise of 2·9 per cent. Assemblers, country buyers, and other dealers in farm products increased their forces seasonally by more than 20 per cent.

Anthracite mines took on 5 per cent more workers than were employed in mid-September, and increased pay-rolls by 30·2 per cent. Bituminous coal mines, which also stepped up production in response to increased demand, expanded their working forces by 9·6 per cent and their pay-rolls by 21·8 per cent, both greater-than-seasonal October gains, which have averaged 1·5 per cent and 10·3 per cent for the last 10 years. Metal mines also reported a better-than-seasonal employment pick-up of 3·9 per cent.

Employment in Private Construction.—Employment in private building construction remained virtually unchanged and pay-rolls decreased 1·3 per cent from September to October, according to reports from 12,484 contractors employing 127,407 workers. The reports on which these figures are based do not cover construction projects financed by the Works Progress Administration, the Public Works Administration, and the Reconstruction Finance Corporation or by regular appropriations of the Federal, State, or local governments.

Employment on Public Works.—In order to care for the heavier relief load coming at this season of the year, employment was increased in October on projects operated by the Work Projects Administration. There were 1,826,000 persons at work during the month, 107,000 more than in September but 1,419,000 less than in October a year ago. Pay-rolls of $98,200,000 were $7,845,000 more than in September and $72,213,000 less than in October, 1938. Five thousand more workers were employed on Federal agency projects under the Work Projects Administration than in the preceding month.

Increased employment was reported on work projects of the National Youth Administration. Because of expanded activity on school projects, employment on the Student Aid Program rose from 62,000 in September to 400,000 in October.

Decreased employment on construction projects financed from regular Federal appropriations was caused by the seasonal contraction of operations on Federal-aid roads.

Employment on construction projects financed by the Public Works Administration dropped 24,000 during the month ending October 15. The 223,000 at work, however, was 84,000 more than in October a year ago. Wage payments of $20,900,000 were $2,086,000 less than in September.

Estimate of Cost of Industrial Unemployment in U. S. A.

According to an article appearing in the November issue of the *Monthly Labor Review* published by the United States Department of Labor, the unemployment of men and machines during the years 1930 to 1937 is estimated by the United States National Resources Committee to have caused a loss of real income of more than $200,000,000,000. This is the estimated amount of potential real income not produced because of unemployment. The amount in 1932 alone was about $37,100,000,000 and even in 1937, about $19,500,000,000. These estimates do not assume that full employment would have been required to produce the estimated additional amounts of income, for allowances were made in the estimates for "residual employment" of about 2,000,000 workers. Nor do the estimates assume a fuller use of machines and equipment than was prevalent in predepresison years. The figures are based wholly on depression unemployment. The real national income produced in 1937 was about the same as in 1929, but the extent of employment of men and machines prevailing from 1923 to 1929 would have produced a much larger income.

In discussing its estimate of potential real income not actually produced because of depression unemployment, the National Resources Committee states:

"The significance of this figure of 200 billion dollars is hard to grasp, but some idea can be obtained by considering what 200 billion dollars would mean in terms of concrete goods. If all the idle men and machines could have been employed in making houses, the extra income would have been enough to provide a new $6,000 house for every family in the country. If instead, the lost income had been used to build railroads, the entire railroad system of the country could have been scrapped and rebuilt at least five times over. Of such is the magnitude of the depression loss in income through failure to use available resources. It meant a lower standard of living for practically every group in the community."

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada, which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if their were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages Scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 are amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Wair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

> "All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;
>
> The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

This Act, like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, and certain other works being carried out under agreement with the provinces which are also assisted by grant of federal funds, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of

wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen, the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provided that "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work, and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation.

NATIONAL HARBOURS BOARD

Replacement of the 4-ply built-up roofing and metal flashings on Shed 2, Montreal Harbour, P.Q. Name of contractors, Roofers, Inc., Montreal, P.Q. Date of contract, November 14, 1939. Amount of contract, $7,475, A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 70
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Roofers, felt and gravel: patent	0 45
Sheet metal workers	0 70
Tinsmiths	0 70
Watchman	0 35

Replacement of the 4-ply built-up roofing and metal flashings on Shed 5, Montreal Harbour, P.Q. Name of contractors, Messrs. Douglas Brothers, Montreal, P.Q. Date of contract, November 14, 1939. Amount of contract, $5,590. The preceding fair wages schedule was also included in this contract.

DEPARTMENT OF PUBLIC WORKS

Construction of a temporary office building on Wellington Street, Ottawa, Ont. Name of contractors, Guinane Construction Co.,

Ltd., Toronto, Ont. Date of contract, November 14, 1939. Amount of contract, $127,800 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 70
Carpenters and joiners	0 85
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 70
Gasoline or electric	0 55
Drivers	0 45
Driver, horse and cart	0 60
Driver, team and wagon	0 80
Electricians (inside wiremen)	0 80
Engineers, operating, steam:	
Single or double drums	0 70
Three or more drums	0 80
Fireman, stationary	0 50
Hoist operators—tower (gasoline or electric).	0 55
Linoleum layers	0 60
Labourers	0 45
Lathers (metal)	0 70
Motor truck drivers	0 50
Motor truck driver and truck	1 45
Painters (spray)	0 85
Painters and glaziers	0 70
Plasterers	0 85
Plasterers' helpers (mixing and tempering material)	0 50
Plumbers and steamfitters	0 95
Roofers, felt and gravel: patent	0 50
Roofers, sheet metal	0 85
Sheet metal workers	0 85
Tile setters (asphalt, mastic)	0 80
Tile setters' helpers (all men assigned to help tradesmen)	0 50
Watchman	0 40

Construction of additions and alterations to the public building at Port Hope, Ont. Name of contractors, M. Sullivan & Son, Ltd., Arnprior, Ont. Date of contract, October 21, 1939. Amount of contract, $3,979 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 55
Brick and hollow tile layers	0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 45
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Drivers	0 35
Electricians (inside wiremen)	0 65
Labourers	0 35
Lathers (metal)	0 60
Lathers (wood)	0 55
Motor truck drivers	0 40
Motor truck drivers and truck	1 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel—patent	0 40
Roofers, sheet metal	0 65
Sheet metal workers	0 65
Stonecutters	0 70
Stonemasons	0 80
Stonemason's Helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Hoist operators—tower (gasoline or electric).	0 45
Fireman—stationary	0 40
Watchman	0 30

Construction of repairs to the assembly wharf at Port Alberni, B.C. Name of contractors, Victoria Pile Driving Co. Ltd., Victoria, B.C. Date of contract, November 2, 1939. Amount of contract, approximately $5,086.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourer	$0 45
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver men	1 00
Pile driver firemen	0 68¾
Pile driver boomman	1 00
Pile driver bridgeman	1 00
Watchman	0 45

Construction of rock rip rap bank protection at North Bank of the North Arm of the Fraser River, B.C. Name of contractors, Gilley Bros., Ltd., New Westminster, B.C. Date of contract, October 19, 1939. Amount of contract, approximately $18,582. A fair wages schedule was included in the contract as follows:—

	Per month
Tugboat captain—Class A	$200 00
Tugboat captain—Class B	190 00
Tugboat captain—Class C	180 00
Tugboat engineer—Class A	190 00
Tugboat engineer—Class B	180 00
Tugboat engineer—Class C	170 00
	Per hour
Tugboat fireman	0 56½
Tugboat deckhand	0 54
Derrick engineer	1 12½
Derrick fireman	0 68¾
Derrick men	1 00
Steam shovel engineer	1 12½
Steam shovel cranemen	0 90
Steam shovel fireman	0 74⅓
Steam shovel oilers	0 60
Shovel operator—gasoline	1 12½
Labourers	0 45
Launch operator (work boat)	0 50
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver fireman	0 68¾
Pile driver bridgeman	1 00
Pile driver boomman	1 00
Pile driver man	1 00
Watchman	0 45

Construction of an extension to the wharf at Ile aux Coudres, Charlevoix Co., P.Q. Names of contractors, Ernest Boies and Napoleon Tremblay, La Malbaie, P.Q. Date

of contract, October 25, 1939. Amount of contract, approximately $9,390. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Carpenters and joiners (in connection with building concrete forms)	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Labourers	0 35
Machinists	0 60
Machinists' helpers	0 40
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchmen	0 30

Construction of a wharf at Cole Harbour, Guysborough Co., N.S. Name of contractor, Mr. Roland M. Myers, Cook's Cove, N.S. Date of contract, November 6, 1939. Amount of contract, approximately $5,948.05. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Hoist operators, tower (gasoline or electric	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck driver	0 40
Motor truck driver and truck	1 35
Timbermen and cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

Construction of alterations to Place d'Armes Post Office, Montreal, P.Q. Name of contractors, J. J. Shea & Co., Montreal, P.Q. Date of contract, December 4, 1939. Amount of contract, $29,000. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixand tempering mortar)	0 45
Carpenters and Joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Firemen, stationary	0 50
Engineers, operating, steam:	
Single or double drums	0 65
Three or more drums	0 75
Engineer on steel erection	0 75
Labourers	0 40
Lathers—Metal	0 75
Wood	0 65
Linoleum layers	0 55
Marble setters	0 90
Marble setters' helpers (all men assigned to help tradesmen)	0 45
Motor truck driver	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 66
Painters and glaziers	0 66
Plasterers	0 80
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 75
Sheet Metal Workers	0 70
Structural Steel Workers	0 75
Terrazzo layers	0 70
Terrazzo finishers and helpers	0 55
Tile setters (Ceramic)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchman	0 35
Waxers and polishers (floor)	0 45
Welders and burners on steel erection	0 75

Construction of a public building at Merritt, B.C. Name of contractors, Marwell Construction Co., Ltd., Vancouver, B.C. Date of contract, October 31, 1939. Amount of contract, $18,766 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Compressor operators (gasoline or electric)	0 50
Drill runners	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Engineers, operating, steam:	
Single or double drums	0 70
Three or more drums	0 75
Engineers on steel erection	1 12½
Firemen, stationary	0 45
Labourers	0 40
Lathers, metal	0 70
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Ornamental iron workers	0 75
Painters and glaziers	0 65
Plasterers	0 90
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Roofers, felt and gravel: patent	0 45

	Per hour
Roofers, sheet metal	0 65
Sheet metal workers	0 65
Stonecutters	0 80
Stonemasons	0 90
Stonemasons' helpers (mixing and tempering mortar)	0 45
Structural steel workers	1 12½
Tile setters (ceramic)	0 90
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Watchman	0 40
Waxers and polishers (floor)	0 45
Welders and burners on steel erection	1 12½

Construction of a public building at Sutton West, Ont. Name of contractor, Mr. Duncan McDougall, Bluevale, Ont. Date of contract, November 1, 1939. Amount of contract, $10,638 and unit prices. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	0 80
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters and joiners	0 60
Cement finishers	0 55
Cement and concrete mixer operators:	
Steam	0 65
Electric	0 45
Drivers	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 65
Electricians (inside wiremen)	0 65
Labourers	0 35
Lathers:	
Metal	0 60
Wood	0 55
Marble setters	0 80
Marble setters' helpers (all men assigned to help tradesmen)	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 40
Ornamental iron workers	0 55
Painters and glaziers	0 55
Plasterers	0 75
Plasterers' helpers (mixing and tempering material)	0 40
Plumbers and steamfitters	0 65
Roofers, felt and gravel	0 40
Roofers, sheet metal	0 65
Sheet metal workers	0 65
Stonecutter	0 70
Stonemasons	0 80
Stonemasons' helpers (mixing and tempering mortar)	0 40
Structural steel workers	0 80
Terrazzo layers	0 75
Terrazzo finishers and helpers	0 60
Tile setters (asphalt tile)	0 75
Tile setters' helpers (all men assigned to help tradesmen)	0 40
Watchman	0 30
Waxers and polishers	0 40
Welder and Burners—acetylene or electric	0 60

Reconstruction of Quinze Dam, Angliers, Temiskaming Co., P.Q. Name of contractors, Dominion Construction Corporation Ltd., Toronto, Ont. Date of contract, October 31, 1939. Amount of contract, approximately $174,747.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Boatmen (rowboats)	0 35
Carpenters	0 55
Cement finishers	0 50
Cement and concrete mixer operators:	
Steam	0 60
Gasoline or electric	0 45
Compressor operators (gasoline or electric)	0 45
	Per day
Diver (full day's pay to be allowed whether employed full or part time)	$14 00
Diver's tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Driver	0 35
Driver, horse and cart	0 50
Driver, team and wagon	0 60
Drill runners	0 45
Electricians, inside wiremen	0 60
Electricians, linemen	0 60
Engineers on steel erection	0 75
Engineers, operating, steam:	
Single or double drums	0 60
Three or more drums	0 70
Engineers, crane (steam, gasoline or electric)	0 40
Firemen, stationary	0 40
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Machinists	0 60
Machinists' helpers	0 40
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Painters (spray)	0 65
Painters and glaziers	0 55
Pipe fitters (surface—temporary work)	0 50
Plumbers and steamfitters	0 60
Pumpmen	0 45
Riggers (general)	0 45
Rodmen (reinforcing steel)	0 45
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Structural steel workers	0 75
Timbermen or cribmen (measuring, scribing and by use of the axe, adze, etc., cutting and fitting timber)	0 42
Tractor operators	0 45
Watchmen	0 30
Welders and burners—acetylene or electric	0 55
Welders and burners on steel erection	0 75

Construction of a retaining wall at Laurensons Creek, Kenora, Ont. Name of contractors, Rayner Construction Ltd., Leaside, Ont. Date of contract, October 31, 1939. Amount of contract, approximately $20,214. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 60
Blacksmiths' helpers	0 45
Compressor operators (Gasoline or electric)	0 50

	Per day
Divers (full day's pay to be allowed whether employed full or part time)	$14 00
Divers' tender (full day's pay to be allowed whether employed full or part time)	5 00
	Per hour
Drivers	0 40
Driver, team and wagon	0 70
Drill runners	0 50
Engineers, operating, steam: single or double drums	0 65
Firemen—stationary	0 45
Hoist operators—tower (gasoline or electric)	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck	1 45
Pile driver and derrick men (rigging, setting setting and signalling)	0 55
Pile driver and derrick foremen	0 75
Pile driver and derrick engineers	0 65
Pile driver and derrick firemen	0 45
Pile driver and derrick labourers	0 45
Powdermen	0 50
Shovel operators (gasoline)	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Timbermen and cribmen (measuring, scribing, and by use of the axe, adze, etc., cutting and fitting timber)	0 50
Tractor operators	0 50
Watchmen	0 35

Construction of harbour improvements (repairs to north breakwater), Dingwall, Victoria Co., N.S. Name of contractors, J. P. Porter & Sons, Ltd., Montreal, P.Q. Date of contract, October 26, 1939. Amount of contract, approximately $8,500. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Carpenters	0 55
Compressor operators—gasoline or electric	0 45
Drivers, team and wagon	0 60
Drivers, horse and cart	0 50
Drivers	0 35
Drill runners	0 45
Hoist operators—tower (gasoline or electric)	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck drivers	0 40
Motor truck driver and truck	1 35
Powdermen	0 45
Road grader operator—horse drawn	0 40
Road grader operator including team	0 60
Road grader operator—gasoline	0 45
Steam shovel engineers	0 85
steam shovel cranemen	0 65
Steam shovel oilers	0 50
Steam shovel firemen	0 55
Shovel operators—gasoline	0 85
Timbermen and cribmen (measuring, scribband, by the use of adze, axe, etc., cutting and fitting timber)	0 42
Watchman	0 30

Construction of repair and extension to wharf at Port Renfrew, Nanaimo District, B.C. Name of contractors, Victoria Pile Driving Co., Ltd., Victoria, B.C. Date of contract, November 2, 1939. Amount of contract, approximately $11,345.25. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 45
Pile driver foreman	1 25
Pile driver engineer	1 12½
Pile driver man	1 00
Pile driver Boomman	1 00
Pile driver bridgeman	1 00
Pile driver fireman	0 68¾
Pile driver derrick engineers	1 12½
Pile driver derrick men	1 00
Pile driver derrick firemen	68¾
Wharf and Dock Builders	1 00
Watchman	0 40
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Carpenters and joiners (to be used in connection with construction of shed)	0 70
Cement finisher	0 60
Compressor Operator—gasoline or electric	0 50
Cement and concrete mixer operator: Steam	0 65
Gasoline or electric	0 50
Drill runners (machine)	0 50
Powdermen	0 50

Construction of an extension to Albion Dyke No. 2, Fraser River, Steveston, B.C. Name of contractor, Mr. Wm. Greenlees, Vancouver, B.C. Date of contract, October 30, 1939. Amount of contract, approximately $43,292.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Derrick scow engineer	$1 12½
Labourers	0 45
Pile driver and derrick foreman	1 25
Pile driver and derrick engineer	1 12½
Pile driver and derrick man	1 00
Pile driver boomman	1 00
Pile driver and derrick fireman	0 68¾
Pile driver bridgemen	1 00
Watchman	0 45
Wharf and dock builders	1 00

Construction of a reinforcing block at the wharf at Clarke's Harbour, Shelburne Co., N.S. Name of contractors, Ralph Parsons and Arthur Parsons, Walton, N.S. Date of contract, October 20, 1939. Amount of contract, approximately $8,934.50. A fair wages schedule was included in the contract as follows:—

	Per hour
Blacksmiths	$0 55
Blacksmiths' helpers	0 40
Boatmen (rowboat)	0 35
Driver, horse or ox and cart	0 50
Driver, team of oxen and wagon	0 60
Drivers	0 35
Hoist operators—gasoline or electric	0 45
Labourers	0 35
Motor boat operators	0 40
Motor truck driver and truck	1 35

	Per hour
Motor truck driver	0 40
Timbermen and cribmen (measuring, scribing and, by the use of the axe, adze, etc., cutting and fitting timber)	0 42
Watchman	0 30

DEPARTMENT OF TRANSPORT

Construction operations at New Glasgow, N.S. Name of contractors, George S. Grant Construction Co., Ltd., Toronto, Ont. Date of contract, November 24, 1939. Amount of contract, $13,000. A fair wages schedule was inserted in the contract as follows:—

	Per hour
Axemen	$0 40
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Drivers	0 35
Driver, horse and cart	0 50

Brown serge jackets.	The Workman Uniform Co., Ltd., Montreal, P.Q.
Cardigan jackets.	Bates and Innes, Ltd., Carleton Place, Ont.
Moleskin sheep-lined vests.	Acme Glove Works, Ltd., Ottawa, Ont.

ROYAL CANADIAN MINT

Wooden coin boxes.	James Davidson's Sons, Ottawa, Ont.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

Industrial agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Fur, Leather and Miscellaneous Animal Products

Toronto, Ontario.—Certain Shoe and Slipper Manufacturers and the United Shoe Workers of the Congress of Industrial Organizations.

Agreements to be in effect from various dates in November (one agreement from September 24), 1939, to October 25, 1940. A strike to obtain one of these agreements occurred in one establishment, as noted on page 1219 of this issue.

Only union members to be employed and new employees are to be secured through the union, if available. The union representative may visit the factories, and the union may appoint a shop chairman and shop committees. In five of the seven factories parties to these agreements, it is also provided that the firm deduct union dues from wages and pay same over to the union.

Hours: 8½ per day, 4 on Saturdays, a 46½ hour week.

Overtime not to be in excess of 6 hours per week.

Wages: minimum rate for experienced female operator $13.50 per week of 46½ hours. "Boys doing minor or unskilled jobs to be paid and governed on the same principle as the Ontario Minimum Wage Act which governs female help . . . . ." Increases in wages were provided in all agreements, effective on or before January 1, 1940. In some cases the wage scales were attached; in others percentage increases varying from 5 to 15 per cent were provided (from 5 to 20 per cent for one firm). In all cases it was further provided that should a rise in the cost of living necessitate an adjustment in wages, a request for such an adjustment in prices may be presented.

No strike or lockout to occur during the terms of these agreements.

Service: Public Administration

Regina, Saskatchewan.—City of Regina and Regina Civic Employees' Association, Local No. 21.

Agreement to be in effect from July 1, 1939, until terminated on three months' notice from either party.

The hours and other conditions of this agreement are similar to those of the agreement previously in effect and summarized in the Labour Gazette, December, 1938, page 1419. (One difference is that for the administrative staff, a three weeks' vacation is now granted). The wages published in that issue were, through a misunderstanding, those of a proposed schedule which was not finally adopted. In order to record the correct wage rates for 1938, in the new wage schedule given below, the 1938 figure is shown in each case in brackets after that effective from July 1, 1939.

Light and Power Department

Wages per hour for outside electrical workers: linemen from 69½ cents (69½ cents) during first year to 83½ cents (81 cents) during third year, journeymen 88½ cents (84 cents), journeymen with cable experience 93 cents (85½ cents), mechanics and utility men 63½ cents (63 cents), groundmen 55 cents (54½ cents), street light attendants 67 cents (65½ cents), substation operator 73 cents (67½ cents), substation firemen 57½ cents (57½ cents), janitor 54½ cents (54½ cents); meter testers and repairmen from 62 cents (60½ cents) during first year to 73½ cents (70½ cents) during third year and 78½ cents (73½ cents) for senior men, meter installers from 61 cents (60½ cents) during first year to 73 cents (67½ cents) during third year.

Wages per hour for power house employees: operating engineers from $165 ($150) to $185 ($165) per month, boiler room operators $145 ($130) and $155 ($145) per month, coal and ash conveyor attendants 65 cents (62½ cents) per hour, assistants 57½ cents (57½ cents) per hour, boiler cleaners 57½ cents (54½ cents) per hour, room cleaners 54½ cents (54½ cents), plant electricians $185 ($155) per month; leading mechanics and leading machinists 78 cents (72½ cents), leading carpenters 75 cents (72½ cents); mechanics, machinists and carpenters 68 cents (62½ cents), electricians' assistants 62½ cents (58½ cents), mechanics' and fitters' assistant 57 cents (50 to 52 cents).

Health Department

Wages: motor broom operators $5.50 ($5.50) per day. Wages per hour: truck drivers 55 cents (52 cents), truck helpers 45 cents (45 cents), teamsters 52 cents (50 cents), street cleaners 45 cents (45 cents), repairman 65 cents (65 cents), other classes 45 to 58 cents (45 to 55 cents).

Engineer's Department

Wages per month: patrolmen $125 ($115), mechanic and welder $135 ($125). Wages per hour: foremen and rollermen 70 cents (64 cents), boilerman thawing sewers and catch basins 70 cents, other classes 50 and 55 cents (50 and 55 cents); skilled and regular seasonal employees not less than 45 cents (45 cents).

Sewage Disposal Works

Hours: the 9 hour day is still in effect, but from November 1, 1939 it is provided that 50 hours constitute a week's work.

Wages per month: operators $125 (formerly pumpmen at $116), utility men $120 ($106), labourers 45 cents (45 cents) per hour.

Parks Department

Wages per month: nursery lead man $120 ($120), bath house attendant $100 ($100), mechanic $135 ($125), carpenter $120 ($115), boulevards lead man $115 ($105), parks lead man $107.50 ($105), truck driver $114 ($114), gardener $110 (plant grower $100), night watchman $70 ($70). Wages per hour: teamsters 50 cents (50 cents), grave diggers 52 cents (52 cents), spare truck driver 55 cents (55 cents) parks policeman $105 per month (50 cents per hour), labourers 45 cents (45 cents) per hour.

Waterworks Department

Wages per month: meter mechanics $125 ($110), night standby man $105 and $110 ($105 and $110). Wages per hour, mechanics and truck driver 55 cents (55 cents), skilled labour 52 cents (52 cents), labourers 45 cents (45 cents).

Administrative Staff

Instead of the grades of annual salaries shown in the previous agreement, a scale of salaries for certain classes of office employees (accountants, clerks, stenographers, etc.) is included in the agreement, salaries ranging from $60 to $170 per month.

Collective Labour Agreements Act, Quebec

The following agreement and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Men's and Boys' Clothing Manufacturing Industry, Province (amendment).

Can, Container and Metal Utensil Manufacturing Industry, Province (amendment).

Paint Manufacturing Industry, Province, (amendment).

Building Trades, Montreal (amendment).

Building Trades, Hull (amendment).

Garages and Service Stations, Montreal.

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Soft Furniture Industry, Toronto and District.

SASKATCHEWAN

Carpenters, Regina.

Barbers, Rosetown.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May, 1938, issue of the LABOUR GAZETTE, page 503. Amendments to the Act are noted in the LABOUR GAZETTE, June, 1939, page 576. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum

wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and noted in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issue beginning May, 1938.

Recent proceedings under the Act include the extension of an agreement governing garages and service stations at Montreal and the amendment of five other agreements, all of which are summarized below. In addition, Orders in Council were published in the *Quebec Official Gazette,* November 18, approving the constitution and by-laws of certain joint committees and others authorizing the levying of assessments by other joint committees, is listed below.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' CLOTHING MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 16, and published in the *Quebec Official Gazette,* November 25, amends the previous Order in Council for this industry (LABOUR GAZETTE, December, 1937, page 1385), the amendment to become effective December 4, 1939, and to remain in effect for the duration of the original Order in Council.

Wages: It is provided that, except for the manufacture of infants' and children's clothing (from birth to 6 years and not exceeding size 24) and except for the manufacture of sportswear and of girls' clothing up to the age of 14 years, all employers in the industry are to pay to all employees governed by the original Order in Council either: (*a*) in addition to the wages earned by the employees (whether on an hourly, week-work or piece-work basis) a sum equivalent to 10 per cent of the fixed minimum hourly rate of pay for the operation performed by the employee; or (*b*) a flat increase of 10 per cent on the wages earned, whether employees work on an hourly, week-work or piece-work basis. Employers are to elect either of the above alternatives and to notify the joint committee not later than December 15. Failing such notification, they shall be bound by the second alternative, (*b*).

In the original Order in Council it is provided that special wage rates below the ordinary minimum may be set by the joint committee for a worker whose productivity is below the average, or for a worker who performs more than one operation or for one who is learning a higher paid operation. The present amendment provides that for all such employees who thus receive less than the regular minimum wage fixed by the decree, an increase of 10 per cent is to be made on the sums earned by them as of December 4, 1939, and that all future adjustments made by the joint committee for such employees shall when so adjusted be increased by 10 per cent.

Manufacturing: Metal Products

CAN, CONTAINER AND METAL UTENSIL MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 10, and published in the *Quebec Official Gazette,* November 18, amends the previous Orders in Council for this industry (LABOUR GAZETTE, November, 1938, page 1298 and January, 1939, page 96).

The amendment provides that any employee in any classification, (except boys and apprentices) being trained for a higher classification is to be classed as a "probationer" and may be employed for a trial period of three months, at his former minimum rate, in another division or class of a higher minimum rate. At the end of three months, the probationer will either be returned to his former classification or his minimum rate will be increased by not less than 2½ cents per hour. At the end of each succeeding six months his minimum rate is to be increased by at least 2½ cents per hour until he attains his new classification, this probationary period not to exceed two years and three months in duration. There shall not be more than one probationer to each fifteen employees in the plant. The case of each employee classed as a probationer must be reported to and ratified by the joint committee.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved November 10, and published in the *Quebec Official Gazette,* November 18, amends the previous Order in Council for this industry (LABOUR GAZETTE, January, 1938, page

103) by providing that the agreement terminate on December 31, 1939.

Construction: Buildings and Structures

BUILDING TRADES, MONTREAL.—An Order in Council, approved November 10, and published in the *Quebec Official Gazette,* November 18, amends the previous Orders in Council for these trades (LABOUR GAZETTE, July, 1939, page 729, September, page 951 and October, page 1066).

In the original Order in Council it was provided that repair and maintenance works for which the cost including both wages and material does not exceed $1,200, when performed on private properties on which the buildings do not exceed a municipal estimate of $15,000, are not subject to the terms of the Order in Council. This amendment provides that this $15,000 comprise both the building or buildings and the land on which they are erected, so that the limit of $15,000 applies to the combined municipal estimate of the building and the land on which such building is erected.

BUILDING TRADES, HULL.—An Order in Council, approved November 10, and published in the *Quebec Official Gazette,* November 18, amends the previous Order in Council for these trades (LABOUR GAZETTE, July, 1938, page 798, November, page 1300, March, 1939, page 335 and October, page 1066) by removing sprinkler fitters from the wage schedule. (Sprinkler fitters in this district are governed by the Order in Council for building trades in the Montreal district, as summarized in the LABOUR GAZETTE, July, 1939, page 729 and September, page 951.)

Trade

GARAGES AND SERVICE STATIONS, MONTREAL. —See below under "Service: Custom and Repair."

Service: Custom and Repair

GARAGES AND SERVICE STATIONS, MONTREAL. —An Order in Council, approved November 10, and published in the *Quebec Official Gazette,* November 18, makes obligatory the terms of an agreement between La Section de l'Automobile du district de Montréal de l'Association des Marchants détaillants du Canada, Inc. (The Automobile Section of the district of Montreal of the Association of Retail Merchants of Canada, Inc.) and Le Syndicat National de l'Auto-Voiture, Inc. (The National Union of Automobile Workers Inc.) and Le Conseil National du Travail des Employés de Garage de Montréal (The National Labour Council of Garage Employees of Montreal).

Agreement to be in effect from October 1, 1939 to March 1, 1941. (The previous agreement was summarized in the LABOUR GAZETTE in June, July and November, 1938, September and October, 1939.)

The territorial jurisdiction include two zones: Zone I consists of the Island of Montreal, Ile Jésus and within a radius of 10 miles from their limits. Zone II consists of the following electoral districts: St. Hyacinthe, Rouville, Iberville, Saint-Jean-Napierville, Joliette, Argenteuil, Huntingdon, Montcalm, Berthier, l'Assomption; Zone II also includes all municipalities not entirely situated in Zone I which are in the following electoral districts: Richelieu-Verchères, Chambly, Châteauguay-Laprairie, Beauharnois, Vaudreuil-Soulanges, Deux-Montagnes, Terrebonne.

The agreement governs employers and employees in garages, gasoline stations, service stations and parking grounds, (even if these are operated by a commercial or industrial establishment or apartment house). However, commercial establishments doing tire rebuilding and operating workshops according to the standards of the manufacturers and doing work very much different from the small repairs made by garages and service stations are not subject to this Order in Council.

Hours and overtime for journeymen (wheelwright, body worker, electrician, blacksmith, machinist, mechanic, joiner, painter, upholsterer, radiator repairer, welder, glazier) and apprentices to these trades: 9 per day, 54 per week. During the day, working hours to be between 7 a.m. and 6 p.m.; during the evening, hours to be between 6 p.m. and 11 p.m. for which 10 per cent above regular wage rates is to be paid; during the night, hours to be between 11 p.m. and 7 a.m., for which 50 per cent, above regular wage rates is to be paid. In case of shift work, the shift from 6 p.m. to 3.30 a.m. to be paid at 10 per cent over the regular wage, and the shift from 3.30 a.m. to 7 a.m. at 50 per cent over the regular wage rate. Should a minimum of 40 hours of work be guaranteed, 54 hours may be worked at regular rates provided the hours are between 7 a.m. and 11 p.m.; hours in excess of 54 to be paid at 10 per cent above the regular rates. Should a minimum of 54 hours be guaranteed, 68 hours may then be worked at regular rates if these hours are between 7 a.m. and 11 p.m; hours in excess of 68 will then be paid at 10 per cent over regular rates.

Hours and overtime for all employees except journeymen and apprentice journeymen: 60 per week of 6 days for day work, and 72 hours per week of 6 days for night shift; overtime at time and one half.

With the exception of service men and night watchman, no employee to work on Sunday or on six specified holidays. All employees to be entitled to a day of rest (24 hours) each week, and any work done on their weekly day of rest to be paid at time and one half.

Workers required for only part of a day to be paid for at least four hours, and if called for a certain hour and obliged to wait to be put to work, waiting time to be paid for. This guarantee of four hours' pay in a day and payment for waiting time does not apply to employees guaranteed a minimum of 30 working hours for six days; employees with such a guarantee are to be present during at least 48 hours per week of 6 days.

Minimum wages per hour for workers working individually or belonging to a shift or partnership: for work between 7 a.m. and 6 p.m., for body work, upholstering, welding, painting or radiator repair $1.25 per hour in Zone I and $1 in Zone II; and for all other repair work, $1 per hour in Zone 1 and 85 cents in Zone II; after 6 p.m., these rates to be increased by a percentage equivalent to that applying to employees' wages.

Minimum wages per hour for piece work: greasing of a motor vehicle $1 each in Zone I, 85 cents in Zone II; washing of a motor vehicle $1 per hour in Zone I and 75 cents in Zone II.

Minimum hourly wages for employees: journeymen body worker, upholsterer, radiator repairer, welder, for first class 60 cents in Zone I, 45 cents in Zone II, for second class 50 cents in Zone I and 40 cents in Zone II, for third class 40 cents in Zone I and 35 cents in Zone II; journeymen wheelwright, blacksmith, machinist, electrician, mechanic, joiner, glazier and painter, for first class 50 cents in Zone I and 43 cents in Zone II, for second class 45 cents in Zone I and 38 cents in Zone II, for third class 40 cents in Zone I and 34 cents in Zone II, apprentices except apprentice service men, for first six months 10 cents in Zone I and 9 cents in Zone II, for third class after six months 15 cents in Zone I and 13 cents in Zone II, for second class 20 cents in Zone I and 17 cents in Zone II, for first class 30 cents in Zone I and 25 cents in Zone II; service man 25 cents in Zone I and 20 cents in Zone II; apprentice service man, for second class 15 cents in Zone I and 13 cents in Zone II, for first class 20 cents in Zone I and 17 cents in Zone II; wax polisher 30 cents in Zone I and 25 cents in Zone II; night watchman $15 per week in Zone I and $13 in Zone II. (A service man is defined as an employee driving motor vehicles, selling gas, washing motor vehicles, cleaning or heating the establishment, changing tires or batteries, greasing motor vehicles, performing different emergency works such as replacing fan belts, spark plugs or any other motor vehicle accessories or demolishing motor vehicles). It is provided in municipalities of Zone II not classified as cities or towns, employers may pay wage rates 10 per cent lower than those established for Zone II provided they do not require the services of more than two wage earners.

Wages higher than the above minimum may not be reduced.

Tips are the property of the employee and not part of wages.

Apprenticeship: in each establishment, not more than one apprentice allowed to each three journeymen or service men except in establishments where less than three journeymen or service men are employed, where one apprentice is allowed. Apprentices to be between 16 and 23 years of age when beginning their apprenticeship. When the certificate of competency shall be in force under the bylaws of the joint committee, all apprentices may at any time after one year of practical experience take the examination of the board of examiners of the joint committee and ask for their certificate of competency.

No employee to be held responsible for the evaporation of gas.

Half the cost of the special uniform required by the employer to be paid by him and half by the employee. Other uniforms required by the employer such as overalls and special smocks and special uniforms for apprentices to be provided and cleaned by the employer and the employee, each paying half the cost, except for employees receiving higher wages than stipulated in this Order in Council.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the *Quebec Official Gazette,* November 18:

Longshoremen (ocean navigation), Quebec.

Checkers (ocean navigation), Quebec.

Checkers and coopers (ocean navigation), Montreal.

Retail stores, Magog.

Notices were published in the *Quebec Official Gazette,* November 18, that authorization was given by Orders in Council for the joint committees to levy assessments on employers and employees, parties to the following agreements:

Bakers, Montreal.

Building Trades, St. Hyacinthe.

Building Trades, Sorel.

Paint Manufacturing Industry, Province of Quebec.

Retail Stores, Magog.

Barbers and Hairdressers, Quebec.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario and Saskatchewan

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare, Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issues of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, May, 1938, page 501, and June, 1939, page 574; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, June, 1938, page 633, and June, 1939, page 567; Nova Scotia, in June, 1936, page 604, and July, 1939, page 671; Saskatchewan, in the issue of June, 1937, page 635, May, 1938, page 507, and June, 1939, page 581. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Similar legislation is in effect in Part II of the Fair Wage Act of Manitoba for certain industries (LABOUR GAZETTE, May, 1938, page 499, and June, 1939, page 570) and in the Industrial Standards Act of New Brunswick, 1939 (for the construction industry), in effect since August 10. Up to the end of November, however, no schedules had yet been made obligatory in these two provinces.

Ontario

Manufacturing: Miscellaneous Wood Products

SOFT FURNITURE INDUSTRY, TORONTO AND DISTRICT.—An Order in Council, dated November 9 and published in *The Ontario Gazette*, November 18, makes binding the terms of a schedule for the soft furniture industry in the city of Toronto and neighbouring townships, from December 1, 1939 "during pleasure."

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, April, 1939, page 436, with these exceptions:—

Overtime permits in the previous schedule were only to be granted in the production of custom made soft furniture, but now may be granted in the production of all soft furniture.

The minimum hourly wage rates are increased 5 cents per hour to be as follows: upholsterers 70 cents; cutters, springers, operators, cushion fillers, finishers and trimmers 60 cents; labourers 45 cents.

Saskatchewan

Construction: Buildings and Structures

CARPENTERS, REGINA.—An Order in Council, approved November 7, and published in *The Saskatchewan Gazette*, November 15, corrects the previous Order in Council (LABOUR GAZETTE, October, 1939, page 1069, and November, page 1185) by a change in wording which does not alter the summary as given in the LABOUR GAZETTE.

Service: Business and Personal

BARBERS, ROSETOWN.—An Order in Council, approved October 30, and published in *The Saskatchewan Gazette*, November 15, amends the previous Order in Council for this trade (LABOUR GAZETTE, October, 1938, page 1176).

Hours: for the previous conditions as to hours, there is substituted a new section under which the working period for all employers and employees in the barbering industry is as follows: from January 1 to March 31 inclusive, from 8 a.m. to 6 p.m. except Wednesdays when the shops are closed at 12 noon; from April 1 to August 15 inclusive, from 8 a.m. to 6 p.m. except Wednesdays when shops are closed at 12 noon and except Saturdays when shops are closed at 11 p.m.; from August 16 to December 31, from 8 a.m. to 6 p.m. except Saturdays when shops are closed at 11 p.m. During the entire year, when a holiday is observed, the hours during which shops may be open on the day previous to the holiday is from 8 a.m. to 11 p.m.

A slight change is also made in the scale of prices.

PRICES, RETAIL AND WHOLESALE IN CANADA, NOVEMBER, 1939

Cost of Living, Prices of Staple Articles and Index Numbers

IN retail prices the cost per week of a list of staple foods, fuel and lighting and rent entering into a family budget was somewhat higher at the beginning of November than at the beginning of October due to the continued advance in the cost of foods and fuel. In wholesale prices the weekly index number calculated by the Dominion Bureau of Statistics again moved gradually higher during November due in large part to higher prices for grains, raw textiles and livestock.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of average retail prices in sixty-nine cities was $8.83 at the beginning of November as compared with $8.77 for October and $8.07 for September. The increase between the beginning of September and November was, therefore, somewhat more than nine per cent. In 1914 the increase in the cost of the same list in November as compared with the pre war figure was slightly more than seven per cent. The advance in the month under review as compared with the previous month was due mainly to advances in the cost of eggs, butter, cheese, beans and sugar which more than offset declines in meats, flour and potatoes. In the previous month all the items advanced except milk, bread and vinegar the most important increases being in the cost of meats, butter, eggs, lard, flour, potatoes, beans, coffee and tea. Including the cost of fuel and rent with that of foods the total cost was $17.77 at the beginning of November as compared with $17.69 for October; $16.93 for September; $17.29 for November, 1938; $17.58 for November, 1937; $15.41 for June, 1933 (the low point in recent years); $22.03 for November, 1929; $21.60 for November, 1921; $26.92 for July, 1920 (the post war peak); $14.36 for November, 1914; and $14.17 for July, 1914. In the fuel group anthracite and bituminous coal were higher at November 1 than one month earlier. Rent was unchanged. In 1914 fuel changed little during the early months of the war but rent declined substantially particularly in western cities.

In wholesale prices the Dominion Bureau of Statistics weekly index number at the end of November was about 1½ per cent higher than at the beginning and 10 per cent higher than at the beginning of September. Comparative figures are 80·2 for the week ended December 1, 79·0 for the week ended November 3, and 72·8 for the week ended September 1. The latest figures available on a monthly basis are for October when the index was 79·3 as compared with 73·5 for November, 1938; 83·1 for November, 1937; 77·2 for November, 1936; 63·5 for February, 1933 (the low point in recent years); 95·7 for November, 1929; 98·3 for November, 1921; 164·3 for May, 1920 (the post war peak); 67·2 for November, 1914; and 64·4 for July, 1914. The advance during November, 1939, was due mainly to higher prices for grains, raw textiles and livestock but there were increases in the prices of many other commodities, of which the most important were meats, certain fabrics, hides, coal, scrap iron, furniture and petroleum products. Of the eight principal groups all advanced with the exception of Non-ferrous metals which was unchanged. The largest increase was in Textile Products but there were important increases in Vegetable Products, Animal Products, Iron Products and Chemical Products.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of November of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget

of a family of five is calculated in terms of the average prices in the cities for which reports are received, and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of food tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in Other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended December 1, 1939; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

(Continued from page 1284)

Retail Prices

Meat prices at the beginning of November were down somewhat in the average following the advances in the previous month. Sirloin steak averaged 28·7 cents per pound as compared with 29·9 for October 1. Round steak also was 1 cent per pound lower for November at 24·5 cents per pound. Mutton declined from 24·6 cents per pound to 24·2 cents; fresh pork from 24·5 cents to 23·8 cents and breakfast bacon from 32·4 cents to 31·7 cents. Lard was slightly higher at 13·7 cents per pound. Fresh eggs were generally considerably higher except in cities in British Columbia where there were some declines. The Dominion average price was up from 38 cents per dozen to 41·9 cents. Milk was fractionally higher at 10·9 cents per quart. Creamery butter advanced in the average from 31·9 cents per pound to 32·6 cents. Cheese averaged ½ cent per pound higher at 22·8 cents. Flour was fractionally lower at 3·4 cents per pound in November following a substantial advance at the beginning of October. The price of canned vegetables was again higher, tomatoes averaging 11·7 cents per tin in November, 11·3 cents in October and 10·6 cents in September. The price of beans averaged 6·9 cents for November 1, 6·4 for October and 5·1 cents for September.

Potatoes per 100 pounds were lower in most of the cities following the advances the previous month. The Dominion average price was $1.66 for November; $1.73 for October and $1.51 for September. Granulated sugar was nearly ½ cent per pound higher at 7·2 cents per pound. The price of coffee averaged 34 cents per pound in September, 40·2 cents in October and 42·4 cents in November. Anthracite coal rose in several localities the Dominion average price being up from $14.57 per ton to $14.83. Bituminous coal also was higher averaging $9.63 per ton as compared with $9.55 the previous month.

The following are the prices per ton reported for Welsh coal "cobbles" and "French nut" at the beginning of November: Halifax $15.50; Charlottetown $14.50-$15.50; Saint

John $14.50; Quebec $14; Three Rivers $15.50 and $14.50; Sherbrooke $14.75; St. Hyacinthe $15; Thetford Mines $17.50; Montreal $15 and $15.25; Ottawa $16.75; Kingston $16; Belleville $16.50; Peterborough $17.50; Oshawa $15.50; Toronto $15; St. Catharines $15.75; Hamilton $15.50 and $15; Galt $16-$16.50; St. Thomas $16; Cobalt $19.50; Timmins $19.75; Port Arthur $18; Fort William $18; Winnipeg $20.50.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and other countries. Tables giving the official and certain other index numbers of cost of living, retail and wholesale prices, in Great Britain and certain of the principal industrial and commercial countries appeared in the October issue of the Labour Gazette.

Since these monthly notes are all compiled from British and foreign sources the information contained therein usually deals with conditions prevailing some months previous to the date of publication in the Labour Gazette. In Great Britain both wholesale and retail trade are now subject to government control, the main objects of which are to conserve supplies of vital materials and to protect the public from unwarranted increases in prices. In order to achieve these ends the government of the United Kingdom has fixed retail and wholesale prices of some articles and is controlling the entire trade in some commodities, including importation and exportation.

In most of the continental European countries some measure of control over prices and distribution has been put in force with consequent effects upon prices. In some of these countries the publication of price data has been suspended and in the case of Germany direct information will henceforth be unobtainable although information contained in the official publications of neutral countries and in the press will be noted.

Great Britain and Northern Ireland

Wholesale Prices.—The Board of Trade index number on the base 1930 = 100, was 110·7 for October as compared to 105·2 for September, an increase of 5·2 per cent for the month. As in September, each of the eleven groups making up the "all items" index showed increases. The index for the combined food and tobacco groups was up 8·4 per cent for the month, there having been increases of 6·6 per cent in the index of cereals, 4·5 per cent in that for meat, fish and eggs and 12·4 per cent in other food and tobacco. The index for the combined industrial materials and manufactures groups showed an increase of 3·6 per cent, the most important increase being one of 10·2 per cent in textiles (other than wool and cotton); wool prices increased 8·3 per cent and cotton prices increased 4·2 per cent. The index for chemicals and oils increased 5·2 per cent. Comparing the "all items" index for October, 1939, with that for October, 1938, we find that there has been an increase of 11·7 per cent.

Cost of Living.—The Ministry of Labour index number on the base July, 1914 = 100, was 169 at the beginning of November as compared with 165 a month earlier, an increase of 2·4 per cent. The index of food prices increased from 150 to 154 or 2·7 per cent during the month. During October there was an increase in the retail prices of bacon, and a seasonal rise in the prices of eggs. There were also slight increases in the average retail prices of cheese, butter, tea, meat, potatoes and milk. On the other hand there was a reduction in the prices of fish (which had risen sharply during September) and the average price of margarine declined slightly due to the introduction of a standard blend. The index of clothing prices increased 1·1 per cent, that for fuel and lighting materials increased 1·4 per cent and that for sundries increased 2·7 per cent. The index of rents was unchanged.

Eire

Cost of Living.—The cost of living index number of the Department of Industry and Commerce on the base July, 1914 = 100, was 173 at mid-August as compared with 172 at mid-May. During the quarter the index of food prices increased from 157 to 158 while those for clothing and for fuel and light were unchanged at 225 and 180 respectively.

United States

Wholesale Prices.—The Bureau of Labor Statistics index number on the base 1926=100, was 79·1 for September as compared with 75·0 for August, an increase of 5·5 per cent for the month. Each of the ten groups making up the index showed advances during the month which followed the outbreak of the European war. The index of farm products increased 12·6 per cent, while that for foods increased 11·8 per cent; the index for the hides and leather group rose 6·3 per cent during the month and that for textile products was up 5·8 per cent. Other increases were

less than 5 per cent. Compared with the corresponding figure for September, 1938, the September index was up 1·0 per cent.

COST OF LIVING.—The index number of the Bureau of Labor Statistics on the base 1913 = 100, was 144·2 on September 15, 1939, showing an increase of 1·2 per cent over the figure for June 15, which was 142·5. During the quarter the index of food prices rose from 120·9 to 125·3, that for fuel and lighting materials, from 158·4 to 159·6, that for furniture, from 174·4 to 175·0 and that for sundries from 196·4 to 196·8. The index of rent declined from 113·2 to 113·1 while that for clothing was unchanged at 145·3.

The index number of the Industrial Conference Board on the base 1923 = 100, was 85·8 for October as compared with 85·9 for September, a decrease of 0·1 per cent for the month. The food group (which is based on the food price index of the United States Bureau of Labor Statistics for October 17, 1939) showed a decrease of 0·7 per cent and sundries declined 0·2 per cent. The index of prices of fuel and lighting materials rose 0·9 per cent, due to an increase of 1·6 per cent in the price of coal. The index of clothing prices was up 0·6 per cent while that for housing was up 0·1 per cent. The general index for October, 1939, was exactly the same as that for October, 1938.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Saskatchewan Farm Labourer awarded Damages for Accident

Damages of $800 and medical and other expenses as well as costs of the action were awarded by Mr. Justice Embury of the Saskatchewan Court of King's Bench in August to the plaintiff, a farm labourer, for an injury in the course of employment.

The accident occurred while the plaintiff was feeding into a fodder-cutting machine straw which was pushed towards him by the defendant employer. There was evidence that the latter pushed forward the straw too rapidly to permit the plaintiff to give proper attention to the machine. The lack of a safety device for shutting off the power was considered the likely cause of a more serious injury than might otherwise have occurred. These factors were held to constitute negligence on the part of the employer. The Court rejected the arguments that there had been contributory negligence and assumption of risk on the part of the plaintiff. *Mazurkewich v. Bawkowy* (1939) 3 Western Weekly Reports 63.

Alberta Licensing of Trades and Businesses Act, 1937 Declared intra vires

On September 8 Mr. Justice Ewing of the Alberta Supreme Court dismissed with costs the application of the plaintiff company to have declared ultra vires the Alberta Licensing of Trades and Businesses Act, 1937. Mr. Justice Howson of the same Court had previously dismissed an action by the same plaintiff for judgment on validity of this and other Acts. (LABOUR GAZETTE, January, 1939, p. 114). Its purpose being to regulate business within the province, the Act was held to be intra vires and to apply to a wholesale company importing and exporting goods from and to other provinces.

The company, which has since 1922 carried on this business, had refused to apply for a licence and pay the fee required of wholesalers by an order of the Minister of Trade and Industry issued under the Licensing of Trades and Businesses Act, 1937. It claimed that the provincial Legislature had no power to compel a company incorporated under a Dominion law to take out a licence and the Minister had no authority to make the order.

The Court reviewed several decisions of the Privy Council in cases involving the question of the power of the provincial Legislature to impose licences and also the position of Dominion corporations in their relation to provincial laws. From these it was obvious that the province may validly regulate businesses within the province through licences or impose licences for revenue purposes. Further, as to companies incorporated under the Dominion Companies Act, the Court pointed out that Privy Council judgments lay down in effect, that while "provincial legislation cannot validly destroy the status and powers conferred on a Dominion company by Act of the Parliament of Canada,. . . . the powers of a Dominion company cannot be exercised in contravention of the laws of the province restricting the rights of the public generally in the province" and "the complete destruction of the trade of a Dominion company in a province may be an incidental result of valid provincial legislation." The opinion of Mr. Justice McGillivray of the Appellate Division of the Alberta Supreme Court in a similar case in 1932 was that the question is whether the legislation "is aimed at and affects Dominion company powers as distinguished from being aimed at and affecting a trade or business in the province which Dominion companies may happen to be engaged in in common with provincial companies and natural persons."

The Licensing of Trades and Businesses Act here in question appeared to the Court to have no other purpose than the regulation of business in the province. It applies to trades, businesses, industries, and occupations carried on in Alberta, whether carried on by individuals or companies incorporated under either provincial or Dominion law.

As regards the argument that the Act is "beyond the competence of the Legislature because it delegates legislative powers to the Minister" it was held that only administrative or quasi-judicial powers were granted and they were ancillary to the purpose of the Act.

The argument was also held to fail that this statute is part of a general scheme of legislation of which Social Credit is the basis, and that as The Alberta Social Credit Act, 1937, has been declared invalid this statute being an integral part of that scheme is also invalid. An Act called the Department of Trade and Industry Act which gave to the Lieutenant-Governor in Council similar powers to those now vested in the Minister of Trade and Industry was passed before "Social Credit" became an inssue. *Motor Supply Company v. Attorney-General for Alberta and Minister of Trade and Industry,* (1939) 3 Western Weekly Reports 65.

Contractor Ordered to Pay Overtime Rate Fixed by Collective Agreement in Quebec

On May 17, Mr. Justice Demers of the Superior Court of Montreal allowed the action of the joint committee in the building trades to compel the defendant contractor for the construction of a church to pay his workmen the overtime rate of time and a half fixed by the collective agreement which had been made binding under the Collective Labour Agreements Act for the building trades in the district. The penalty fixed by the Act of "20 per cent of the difference between the wage made obligatory and that actually paid" was also allowed.

The defendant could not avail himself of the section of the agreement which permits payment at the regular rate for overtime on urgent or special work which, for sufficient reasons, cannot be performed during the regular hours because he had no authorization from the joint committee as the section requires.

Although the claim was for $421.34 plus $84.27 penalty, the Court calculated the unpaid wages to be $371.99 which with the penalty of $74.40 brought the amount of the judgment to $446.39, the defendant to pay the costs. *Comité Conjoint des Métiers de la Construction v. Boileau* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure, 422.

Penalty Imposed on Quebec Contractor who Paid Rates Fixed in Collective Agreement only when Claimed by Joint Committee

Mr. Justice Boyer of the Superior Court of Montreal on September 15 allowed the claim of a joint committee of the building trades for $135.65 being the statutory penalty of 20 per cent of the difference between the wage made obligatory and that actually paid in cases where the rate made binding under the Collective Labour Agreements Act was not paid.

The defendant admitted that the hourly rate fixed in the agreement was not paid until a letter was received from the plaintiff asking for the balance of wages due plus the penalty. He then paid the wages owing but not the penalty. The Court held that the offence was not wiped out by complying at that late date. The defendant had been given an opportunity to avoid the costs of action and could not be allowed to profit by delaying payment contrary to the terms of the Act. *Building Trades Joint Committee v. Elie,* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure, 453.

Operator of One-Man Shop not Liable to Pay Assessment under Quebec Collective Agreements Act

On October 3 Mr. Justice Guerin of the Superior Court of Montreal dismissed an action by the joint committee for the shoe-repairing industry to collect from the defendant operating a one-man shop the assessment levied on employers or on employers and employees to pay the expenses of the committee in enforcing the agreement made obligatory for the industry under the Collective Labour Agreements Act. The complaint did not specify whether the defendant was assessed as an employer or as an employee but it was claimed that if he was not an employer he must be an employee and in either case he was liable to pay the assessment. With this the Court disagreed. Since the defendant employed no workmen, he was not an employer within the meaning of the Act and, even if he was an "employee" as defined by the Act, authority to collect the levy from an employee is given only when it is also collected from his employer. *Comité Conjoint de l'Industrie de la Réparation des Chaussures v. Kotik,* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure, 412.

Montreal Employer Fined for Employing Women in Clothing Factory After 6 p.m.

A fine of $20 and costs with the alternative of eight days' imprisonment for violating the provisions of the Industrial and Commercial Establishments Act by allowing women to work after 6 o'clock at night was imposed by Mr. Justice Guerin of the Superior Court of Montreal on Charles Rothman, manager of the Rose Dress Manufacturing Company.

The defence contended (1) that the action which was brought in the first place against the Rose Dress Manufacturing Company should fail since the latter was not a legal person and (2) that the standard time of the alleged offence was actually not after 6 p.m. The Standard Time Act provided that when any question as to time arose, the time referred to or intended was standard time but a 1928 amendment makes it clear that a municipality may alter standard time. The Court held that the legal time in Montreal was daylight saving time as fixed by the City Council. As to the designation of the defendant, it was agreed that it had been defective but since counsel had appeared to act for the company and no objection had been raised at the time of entering the statement of defence or until the evidence for the prosecution was completed and since the plaintiff had not been prejudiced in any way, objection to the form could not later be sustained in view of the provisions of the Summary Convictions Act. *Rex v. Rose Dress Manufacturing Company* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure, 418.

Quebec Stationary Engineman Allowed Wages Fixed by Fair Wage Order

A claim for wages under an order of the Quebec Fair Wage Board was allowed by Mr. Justice Mackinnon of the Superior Court of Montreal on May 12 in the action of a fourth-class stationary engineman for $527.99, the balance of wages due, plus interest and costs, for work done during 1938 while he was employed in a hospital.

The Court refused to accept the defence that the Fair Wage Act and Order 6 relating to stationary engineers did not apply to persons employed in hospitals and other charitable institutions during the period of the plaintiff's employment. An order in council of February 24, 1939, (LABOUR GAZETTE, April, 1939, p. 397), which expressly repeals, from January 1, 1939, that part of Order 6 which applies to hospitals was referred to as evidence that the Order originally applied to such places. The defence that the Act and the order are ultra vires as regards hospitals and other charitable institutions could not be considered as no notice of this plea had been given the Attorney-General. *Collins v. Homoeopathic Hospital of Montreal,* (1939) 77 Rapports Judiciaires de Québec, Cour Supérieure, 404.

PRICES IN CANADA AND OTHER COUNTRIES DURING 1938*

Wholesale prices in many of the principal countries declined during 1938, continuing the downward movement which commenced about the middle of 1937, following the irregular recovery in prices from the low levels of the depression. The decline during the last eighteen months was due mainly to lower prices for certain farm products, notably grains and raw textiles, and for certain other raw materials. A significant factor in the movement was the increase in world stocks of primary commodities in this period. Important exceptions to the downward movement were recorded in France and Japan, where prices have continued to rise for a number of years, and in Germany and Italy, where changes were slight in 1938. The recovery in prices from the low levels commenced in 1933, except in those countries whose currencies remained on a gold basis, some until 1935 or 1936. Retail prices and the cost of living remained relatively stable in most countries during the year, except in France and Japan where there was considerable advance.

The Movement of Retail Prices and Cost of Living in Canada during 1938

The index number of changes in the cost of living on the basis of prices in 1913 as 100, was 131 in December as compared with 132 in January, this latter figure continuing throughout the year until November except for an increase to 134 in August due chiefly to a seasonal advance in the price of potatoes. In 1937 the index number had risen from 129 in January to 133 in December in continuation of the recovery which began in June, 1933, when the index number was 120. The changes during the year were chiefly in the food and rent groups, the former falling from 118 in January to 113 in December while rent rose from 142 in January to 148. Clothing fell slightly in December and fuel showed a small increase in November.

At the end of the year, therefore, the index for all items was about nine per cent higher than in the summer of 1933 when the low point during the depression was recorded. The recovery since 1933 was most pronounced in the food group though rent and clothing also advanced substantially while fuel and sundries were little changed. In spite of the advance in the cost of living since 1933 the index number in December, 1938, was still 18 per cent lower than in December, 1929, the figures being 131 and 160 respectively.

The food group has recorded considerably greater changes than the other groups in recent years and having the greatest weight in the construction of the index number has therefore been the most important factor in its movement since 1929. The index number for the group declined from 120 in December, 1937, to 116 in May, 1938, and then advanced to 120 in August. Since August the movement was downward to the end of the year, the figure 113 in December being about six per cent lower than in December, 1937, and 30 per cent lower than in December, 1929, but 24 per cent higher than the lowest level recorded in the depression in 1933. Of the twenty-nine items included in the list of foods 17 were lower in cost at the end of 1938 than at the end of 1937, seven were higher and five were unchanged. In this comparison the largest declines were recorded in lard, butter, bread and flour and the only advance of importance was in potatoes.

Rent for workingmen's houses advanced about four per cent during the spring of 1938, continuing the movement in progress since the autumn of 1934. The advance from the low point in 1934 down to the end of 1938 was nearly 16 per cent. The index is now about 6·5 per cent lower than in 1929.

In the fuel and light group the movement in 1938 was slight, as in recent years, there being a seasonal fall in the price of coal and wood in the spring and an advance in the autumn. The index for the group, now about 10 per cent lower than in 1929, has changed little in recent years, being however somewhat lower than in 1933 in contrast to advances in other groups.

The index for the clothing group changed little during the year, being one per cent lower in December than at the end of 1937. The advance in this group since 1933 was about 10 per cent. It is still 25 per cent lower than in 1929.

Table I brings down to the end of 1938 the index number of the cost of living in Canada, based on prices in 1913 as 100, and shows the percentage changes in the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the list of staple foods, fuel and lighting,

*The Dominion Bureau of Statistics issues reports on prices with comprehensive figures, as follows: weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and other countries).

* The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

and rent entering into a weekly family budget published each month in the LABOUR GAZETTE. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, as differences in rates in the various cities are greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Tables II and III show the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget in terms of average retail prices for the Dominion by groups for each province.

Retail prices of meats were higher during the first half of the year than in the corresponding months of 1937 but for the closing months of 1938 were about the same as in 1937. The price of sirloin steak averaged 26·6 cents per pound in 1938 as compared with 26·2 cents in 1937, 23·1 cents in 1936, 21 cents in 1933 and the pre-depression level of 36·3 cents in 1929. The average price in December, 1938, was 24·9 cents per pound as compared with 25 cents in December, 1937. Fresh pork roast averaged 24·1 cents per pound in 1938 as compared with 22·2 cents in 1937, 15·1 cents in 1933, and 30 cents in 1929. The price in December, 1938, was 22·7 cents per pound and in December, 1937, was 21·9 cents per pound. Beef cattle prices were considerably lower in 1938 than in the previous year following an advance from the levels in 1936 while the prices of bacon hogs toward the end of 1938 were about the same as in 1937 but during the first half of 1938 were higher than in 1937. Exports of cattle and meats were substantially lower in 1938 than in 1937. The numbers of beef cattle on the farms have been declining since 1936 and the numbers of hogs at June 1, 1938, were materially lower than at the same date in 1937. Sales of live stock at the stock yards were much lower during 1938 than in the previous year and inspected slaughterings were also less. The price of lard in December at an average of 14·4 cents per pound was about 2·5 cents per pound lower than in December, 1937.

The price of fresh eggs averaged slightly lower in 1938 than in 1937 and showed the usual seasonal movement, declining from 45 cents per dozen in December, 1937, to 25·9 cents in May, 1938, and advancing to 44 cents in December. The production of creamery butter during the first eleven months of 1938 was the highest on record and about 10 per cent greater than in the same period of 1937. Stocks in cold storage at the end of the year were about 40 per cent greater than at the end of 1937. The usual seasonal advance in prices during the autumn did not materialize in 1938 and in December the price 26·7 cents per pound was at the lowest level recorded in more than two years as compared with 39·7 cents per pound in April, 1938, which was the highest level recorded since 1930. The average price for the year 1938 at 32 cents per pound was slightly higher than in 1937 as compared with 25·3 cents in 1932, the lowest yearly average in recent years, and 47 cents in 1929. The price of milk averaged 10·9 cents per quart in 1938, 10·8 cents in 1937, 9·3 cents in 1933 and 12·3 cents in 1929.

The price of flour reflecting to some extent the much lower prices for wheat declined from an average of 4·5 cents per pound in December, 1937, to 3·2 cents in December, 1938. The yearly average price was 4 cents per pound in 1938, 4·5 cents in 1937, 3·6 cents in 1936, 2·9 cents in 1933 and 5·1 cents in 1929. The price of bread declined gradually since August averaging 6·7 cents per pound at the end of the year as compared with 7·3 cents at the end of 1937. The price of potatoes, $1.18 per 90 pounds, in December, 1938, was the highest recorded during the year with the exception of August when the price was $1.41 for 90 pounds with the marketing of the new crop. From January to July the price ranged between 90 cents and $1. Comparative prices in 1937 were 95 cents for 90 pounds in December and a range between $1.45 and $1.95 from January to August. The crop in 1938 was estimated to be about 15 per cent smaller than in 1937. Onions were 5·2 cents per pound in January, 1938, and 3·9 cents in December. Canned vegetables averaged gradually lower during the year, tomatoes, peas and corn each declining about 10 per cent. The price of United States anthracite coal averaged $14.62 per ton in December, 1938, as compared with $14.18 in July, $14.42 in December, 1937, $14.03 in July and $14.77 in January.

Wholesale Prices in Canada, 1938

The accompanying tables V, VI and VII show the index number of wholesale prices in Canada calculated by the Dominion Bureau of Statistics, the commodities being arranged

TABLE II.—COST PER WEEK (IN TERMS OF THE AVERAGE RETAIL PRICES IN SIXTY-NINE CITIES IN RENT ENTERING INTO

‡‡ An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent.
† Kind most sold since October, 1922.

according to "chief component materials" in table V, "purpose" in table VI and "origin" in table VII.

This index number moved gradually downward month by month throughout 1938 continuing the movement which commenced in July, 1937. In this period of about a year and one-half nearly all of the advance of the preceding fourteen months was lost. Certain comparative figures are 73·3 for December, 1938; 82·7 for December, 1937; 87·5 for July, 1937, the peak during recent years; and 71·8 for May, 1936. At the end of 1938 the index number was about 15·5 per cent higher than in February, 1933, the low point during the depression. It was, however, 24 per cent lower than in December, 1929. The decline during the last eighteen months was due in large part to lower prices of fruits, grains, live stock, hides, raw textiles and certain other farm products as well as in non-ferrous metals, flour and other milled products, leather, pulp, pig iron and steel billets. The decline in certain of the non-ferrous metals and raw textiles occurred to a large extent toward the end of 1937.

The prices of many primary products declined more than the prices of finished

products and as a group lost the relatively favourable position gained in 1936 and 1937. Since the recovery in prices commenced from the low levels recorded during the depression in 1933 the index of "raw and partly manufactured goods" moved from a level 23 per cent lower than that of "fully and chiefly manufactured goods" to a point about 7·5 per cent above it in July, 1937, and then downward to nearly 12 per cent below it in December, 1938.

The index for Canadian farm products declined 23 per cent during the year under review, field products being down 35 per cent and animal products two per cent. The index for "producers' goods" was 68·4 in December, 1938, as compared with 82·7 in December, 1937, and 90·3 in July, 1937. The index for "consumers' goods" was 76 in December, 1938," 79·1 in December, 1937, and 81·1 in July, 1937. The decline in the former group during the year was due mainly to lower prices for certain building materials, as well as for materials for the milling industries, for the furs and leather goods industries, for the meat packing industries and for miscellaneous producers materials. In "consumers' goods" the decline was due mainly to lower prices

* Coal, wood and coal oil, no allowance is made for the varying extent to which these are used in the different provinces.
† Including also laundry starch.

for certain foods chiefly flour and milled products, and milk products.

In the grouping according to chief component materials the Vegetable Products group declined much more than any of the other seven principal groups the index being down from 85·3 in December, 1937, to 60·2 in December, 1938, influenced to a great extent by lower prices for grains, milled products, bakery products and vegetable oils. The Animal Products group declined from 78·2 in December, 1937, to 72·9 in December, 1938, mainly because of lower prices for furs, leather, livestock and milk products. The Iron and Its Products group was 104·1 in December, 1937, and 98·1 in December, 1938, the decrease being due mainly to lower prices for pig iron and steel billets also for rolling mill products. In the Textile Products group the largest declines were in raw wool and in certain woollen products. Raw cotton and raw silk were slightly higher at the end of the year than at the beginning following the decline in these two commodities in the last half of 1937. The Non-Ferrous Metals group was slightly higher at the end of 1938 than at the end of 1937 following a substantial decline between August and December, 1937.

Prices in Great Britain and Other Countries

The accompanying tables numbered VIII to XXV give index numbers of retail prices of foods and cost of living and of wholesale prices in several of the principal commercial and industrial countries for 1938 and for preceding dates to show the movements of prices in comparison with those in Canada. The information in the following tables is obtained for the most part from publications of the governmental or other authority constructing the index number, but in some cases from the Monthly Bulletin of Statistics of the League of Nations, Geneva, which publishes figures for many countries. The quarterly supplement to Prices and Price Indexes issued by the Dominion Bureau of Statistics, Ottawa, also contains index numbers for many countries.

Great Britain and Northern Ireland

Cost of Living.—The Ministry of Labour's index number (Table X), based on the prewar standard of living of a workingman's family, was 159 at the first of January, 1938, and 155 at the end of December, 1938. The lowest point for the year was that of April, which was 154 or 3·1 per cent below the year's high point. Within these limits monthly fluctuations were comparatively small. Between June, 1936, when this index was at 144 and December, 1937, when it was at 160 no decrease was shown for any month but during 1938 there were small variations in both directions. The index of food prices was 145 on January 1, 1938, and 138 on December 31, the low point being 137 in April. Food being given a weight of 60 per cent in the index of total expenditure, the fluctuations of this index were similar to those of the all items index.

Wholesale Prices.—The index number of wholesale prices published by the Board of Trade (Table XI) stood at 98·3 for December, 1938, as compared with 107·7 at the first of the year, a decline of 8·7 per cent for the twelve month period. With the exception of two months in each of which there were increases less than one per cent, this index has shown decreases each month since July, 1937, when it was 111·5. The index of food prices was 105·0 at the beginning of the year and 91·8 for December, a decrease of 12·6 per cent. With four minor exceptions the decrease has been steady from month to month since October, 1937, when it was 105·3. The index for industrial materials and manufactures declined from 109·0 in January to 101·3 in May, recovering to 102·5 for November and again declined to 101·7 for December.

France

Cost of Living.—The latest available figures showing cost of living fluctuations in France are those compiled by the Central Statistical Office for the third quarter of 1938 (Table XII). The general index for that quarter was 689 as compared with 630 for the third quarter of 1937. During the same period the food index rose from 649 to 723. The index for heating and lighting materials was 674 for the third quarter of 1937, rose to 769 for the first quarter of 1938, declined to 765 for the second quarter, and rose to 781 for the third quarter. The index of rents rose from 375 to 420 during the last four quarters for which figures are available while the sundries index rose from 713 to 757 and clothing prices declined from 717 to 702.

Wholesale Prices.—The general index of wholesale prices compiled by the General Statistical Office (Table XIII) rose from 605 in January, 1938, to 678 in November. As noted in previous issues of this supplement prices in terms of national currency have risen considerably since France left the gold basis in 1936. During 1938, the index in terms of gold on the base 1914=100 (not shown in this table) declined from 61 in January to 53 in November.

Germany

Cost of Living.—The index of the cost of living compiled by the Federal Statistical Office (Table XIV) was 124·9 for January, 1938, rose to 126·8 in July, declined to 124·9 in October and was 125·0 for November. The index for food which was 121·2 at the first of the year also reached its high point, 124·3, in July and declined to 120·7 in October. Indexes for heat and lighting materials, rent and sundries fluctuated within narrow margins showing practically no change over the eleven months. Unlike the other sub-groups making up the general index clothing prices have shown a small but steady increase for some years rising from 128·3 to 131·7 during 1938.

Wholesale Prices.—The index number of wholesale prices published by the Federal Statistical Office (Table XV) was 105·6 for January, 1938, and 106·3 for December which was the high point for the year; the low point was 105·4 in May. The index of agricultural prices was 105·0 at the first of the year and 107·2 for December, the increase being due to increases in the price of cattle for slaughtering and in animal foods. The index of raw materials and semi-manufactured goods was 94·4 for January and 94·2 for November, all

(Continued from page 13)

its sub-groups having moved within narrow limits. The index for manufactured goods was 125·9 for January and 125·5 for November.

Italy

COST OF LIVING.—The index of the Central Institude of Statistics, on the base June, 1928=100, was 99·1 for January, 1938, and 99·5 for November. The high point for the year was reached in May when the index was 99·7.

WHOLESALE PRICES.—The index compiled by the Central Institute of Statistics, on the base June, 1928=100, was 95·2 for January, 1938. After declining to 93·7 in February it showed an increase each month, with one exception, rising to 97·2 for November.

United States

COST OF LIVING.—The latest available index number of cost of living compiled by the Bureau of Labour Statistics (Table XXIV) is that for September 15, 1938, at which time the index for all items was 144·2 as compared with 148·2 for the corresponding date in 1937, a decrease of 2·7 per cent during the year. The largest decrease during the year was in foods which declined 8·3 per cent; furniture declined 3·8 per cent and clothing 2·8 per cent. Rent increased 2·2 per cent, fuel and lighting materials 0·8 per cent and sundries 0·6 per cent.

WHOLESALE PRICES.—The latest available index numbers of wholesale prices published by the Bureau of Labour Statistics (Table XXV) are those for November, 1938, when the all commodity index stood at 77·5 as compared with 80·9 for January. Each of the groups making up this index showed decreases during the portion of the year for which figures are available.

THE LABOUR GAZETTE

Since its inception the LABOUR GAZETTE has maintained a continuous record of industrial, social and economic conditions in Canada as reflected in legislation, employment and unemployment, price trends, labour disputes, industrial relations programs, conventions and recommendations of labour bodies, etc.

One of the particular functions of the department is the promotion of industrial harmony, and prominence is therefore given in the LABOUR GAZETTE to proceedings under the Industrial Disputes Investigation Act and the Conciliation and Labour Act.

Complete information is also given with respect to proceedings under other measures administered by the department, including the Employment Offices Co-ordination Act, the Combines Investigation Act, the Technical Education Act, the Government Annuities Act, the Relief Acts, the Fair Wages and Eight Hour Day Act, etc.

Included in the statistical information published is a monthly analysis of prices, wholesale and retail, in Canada, indicating trends in the cost of living, the prices of staple articles, and index numbers of price movements over a series of years.

*For electric street railways, by cities, see Table I (*d*).

WAGES AND HOURS OF LABOUR IN CANADA

1929, 1937 and 1938*

THE present bulletin, the twenty-second in the series on Wages and Hours of Labour, contains data for the years 1929, 1937 and 1938, but the tables on building, printing, metal trades and electric street railways give figures for 1920, 1926, and 1930 to 1938, while the table on steam railways is for the years 1920 to 1938, inclusive. In the appendices information is given as to minimum wage rates under provincial legislation, wages and hours of labour under collective agreements and schedules of wages and hours made obligatory by orders in council in certain provinces, and also as to the federal government fair wage policy. There are also tables giving wages in agriculture in 1937 and certain previous years, average earnings of steam railway employees in recent years with numbers employed in 1937, average earnings of coal miners with numbers employed and days worked from 1921 to 1937, and also average earnings of employees in merchandising and service establishments in 1937.

The table of index numbers of rates of wages contains figures showing changes in a number of occupational groups, from 1901 to 1938, and for certain other groups from 1911 to 1938, the base year being 1913. Index numbers for other groups have not been calculated as figures back to 1913 have not been compiled and published.

Changes in Wages

The recovery in wages, which first appeared in logging and sawmilling and in common factory labour in 1934 and extended to all groups in 1935, continued during 1936, 1937 and 1938.

The increases averaged over 4 per cent in logging and sawmilling, in coal mining and on steam railways; 3 per cent in miscellaneous factory trades; 2 per cent for common factory labour and building trades; over one per cent for metal and printing trades and electric railway employees. The average increase for all groups (weighted according to the approximate number of employees) was 4 per cent. In manufacturing industries the greatest increase was in silk factories, 10 per cent, but wage rates advanced over 5 per cent in woollen mills, pulp and paper mills, in sheet metal, shipbuilding, and boot and shoe industries. Increases of over 4 per cent occurred in establishments producing knitted goods, shirts, ready-made clothing, furniture, tobacco and cigarettes. In automobile and auto parts plants, and in electric, radio and rubber factories the increases averaged about

* The first report in this series was issued as a supplement to the LABOUR GAZETTE for March, 1921, and contained figures as to wages and hours of labour for certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. It also contained samples of wage rates for common labour in factories, miscellaneous factory trades in a small number of industries, and wages in lumbering from 1911 to 1920, with index numbers. Subsequent reports, in most cases issued as supplements to the LABOUR GAZETTE for January each year, brought these figures down to date with extensions from time to time to include additional industries and classes of labour.

The present report includes data as to wages and hours on steamships on the Atlantic and Pacific coasts and on the Great Lakes and St. Lawrence river, a transportation industry first covered in Report No. 21, with data for 1929, 1936 and 1937.

Certain of these reports, however, contained special features. Report No. 5 (1923) dealt with Hours of Labour in Canada and Other Countries. Report No. 3 (January, 1922) included an appendix with statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts. Report No. 7 (January, 1925) included an appendix with figures for agriculture from 1914 to 1923. Report No. 11 (January, 1928) contained an appendix on wages of employees of steam railways, considerably increasing the information for the years since 1917 with a more extensive record from 1901 to 1927 and also a new series of index numbers. Each report from No. 7 (January, 1925), to No. 14 (January, 1931), contained data not only for the previous year but back in 1920, except that figures for 1922, 1923 and 1924, the years of least change, were omitted from some of the tables owing to lack of space. Report No. 15, issued in January, 1932, contained data for the years 1926, 1930 and 1931, with figures for 1920 also in some cases. Report No. 16, issued in January, 1933, afforded figures for 1930, 1931 and 1932 with figures for 1920 and 1926 also in some tables. Subsequent reports in each case have included figures for the calendar year just ended, for the preceding year and for 1929.

In Report No. 15 (January, 1932) the number of cities for which data were given in Table I as to building trades and electric railways was increased to approximately forty, and in the case of printing trades to fifteen, and these cities have since been covered in subsequent reports. Previously this table covered only thirteen cities, except that data for building trades in Windsor, Ont., were included, beginning with the report for 1928. Sheet metal workers employed in building and construction have been included with building trades since 1927, while sheet metal workers in factories have been included in the table on manufacturing industries. The section of the table on metal trades previously given was omitted from Reports Nos. 15 and 16 for 1931 and 1932 but figures for these trades appeared in the tables of sample rates of wages and hours in the sections of Table X on foundries and machine shops and other metal manufacturing industries. This section of Table No. 1 was, however, included in Report No. 17 with figures for 1920, 1926 and 1930 to 1933 and has been continued in subsequent reports. As in previous reports figures on wages for the metal trades in mines and on railways appear in the tables on those industries.

The appendix on wages and hours under provincial minimum wage legislation, included in recent years beginning with Report No. 12, issued in January, 1929, was enlarged in Report No. 18, January, 1936, and in subsequent reports, to include also data as to wage rates in certain collective labour agreements enforceable under legislation in several of the provinces. Report No. 20, January, 1937, contained a section on hours of labour under provincial legislation.

69799—1½

3 per cent. In most of the other manufacturing industries the increases averaged 2 per cent.

In the industries for which index numbers have not been calculated the most important changes were increases averaging 5 per cent in metal mining in 1937, and increases of five to fifteen dollars per month in 1937 and 1938 for steamship employees.

For previous years it will be seen from the table of index numbers that by 1920 wages had reached levels about 100 per cent higher than in 1913, in some groups the increase being over one hundred per cent while for building and printing trades the increases were appreciably less, being only about 80 per cent. After 1920 all groups showed some decreases, although printing trades and coal mining reached the peak in 1921 instead of 1920, declining somewhat thereafter. The decreases in coal mining in 1925 were comparatively steep and tended to reduce the average for the six groups averaged for the period back in 1901. From 1925 to 1930 the movement was upward in each group.

In 1930 the index numbers for most of the groups were slightly higher but that for lumbering declined slightly. In 1931 all groups were downward except printing trades and coal mining. In 1932 and 1933 all groups were down, the greatest decreases being in lumbering and building trades.

TABLE OF INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA
1901-1938
(Rates in 1913=100)

* Average of previous six columns.
** Weighted according to average numbers of workers in each group in 1921 and 1931.
† Including some increases effected near the end of the year.
‡ Including a ten per cent decrease for certain classes toward the end of the year.
(a) Seven trades from 1901 to 1920, eight from 1921 to 1926, nine for 1927 to 1938, 13 cities to 1927, 14 cities to 1930, thereafter 31 to 42 cities.
(b) Five trades from 1901 to 1926, four for 1927 to 1938.
(c) Two trades from 1901 to 1920, four for 1921 and 1922, six from 1923 to 1938.
(d) Two classes from 1901 to 1920, five classes 1921 to 1938.
(e) Twenty-three classes.
(f) Four classes 1901 to 1920, twelve classes 1921 to 1938.
(g) The number of samples (and industries) increased from time to time since 1920; machine operators, helpers, etc., also included.

In 1934 lumbering showed substantial increases, factory labour also advanced appreciably and coal mining slightly while the other groups were lower. In 1935 all groups were appreciably higher and the upward movement continued during 1936, 1937, and 1938.

The weighted index number (with wage rates in 1913 as 100) for all groups in 1938 at 199·4 was higher than in 1929 and in 1930 at 196·0 and 197·1 respectively, but lower than in 1920 at 207·7.

Building Trades

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10 cents per hour were general and in 1922 decreases of 5 cents per hour were numerous. In 1923, 1924 and 1925, while there were upward movements in the average, it was due to increases in particular trades and in certain cities, and not to a general upward movement for most of the trades and localities. From 1926 to 1930, the upward movement was somewhat more general. During 1931 there were numerous decreases, in some localities the reduction being general while in others it was confined to certain trades. During 1932 and 1933 the decreases were general, averaging about 10 per cent, while in 1934 there were decreases in some trades in certain cities but no general downward tendency appeared. In some cases there were increases so that the average decrease was about 3 per cent. In 1935, increases occurred chiefly in Quebec and Ontario, some of them due to agreements which established minimum wages under provincial legislation as outlined in Appendix E. In 1936 the upward movement continued with, however, decreases in certain trades in a few localities. In 1937 there were increases in several of the localities and in 1938 increases became fairly general.

Metal Trades

In the metal trades the increase in wage rates from 1915 to 1918 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases occurred. In 1923 and 1924 some recovery was experienced, in 1925 there was practically no change, from 1926 to 1930 there were some slight changes upward, but during 1931 the changes were downward, while during 1932 and 1933 the decreases averaged 5 per cent and 3 per cent respectively. In 1934 there were comparatively few decreases, with some increases, so that the average was down less than one per cent. In 1935 wages recovered, being slightly higher than in 1934, and this slight recovery continued in 1936 and became substantial in 1937. In 1938, however, the advance was slight.

Printing Trades

In the printing trades up to 1920 increases were somewhat less than in most of the other industries but in 1921 when many of the three or five-year agreements between employers and the unions expired, rates were advanced and hours were reduced in many cases. Increases appeared each year thereafter down to 1931. During 1932 decreases of 10 per cent were general in the western provinces and were made in some cities in the east. In 1933 the decreases were general, averaging 5 per cent. In 1934 while there were further decreases, there were some increases, the average being down less than one per cent. In 1935, 1936, 1937 and 1938 there were a few increases.

Electric Street Railways

In electric railway service, rates had almost doubled by 1920, but declined slightly in 1921 and 1922, recovering somewhat in 1923 and very gradually each year thereafter until 1931 after which reductions occurred until 1934.

Since 1930, on many of these railways, with reduced traffic, operating costs were lowered to some extent by reducing hours per day, and therefore daily wages, instead of reducing hourly rates. In 1934 very few changes in wages were made so that the index number was practically unchanged. In 1935, 1936, 1937, and 1938 there were a few increases.

Steam Railways

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921, decreases averaging about 12 per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made, averaging about 10 per cent. In 1926, at the end of the year, wages of conductors, trainmen, brakemen, baggagemen, and yardmen were advanced about 6 per cent, that is, by half the amount of the reduction in 1921, and during 1927 similar increases were made in rates for other classes. In 1929, increases were secured by shop and maintenance of way employees and by certain classes of train crews on some lines. In 1931, while practically all classes were to a great extent on short time, changes in rates were not made until the end of the year when a 10 per cent deduction from each employee's pay was made for train, engine and telegraph service employees from December first. In the early months of 1932 the same deduction was applied to other classes.

In 1933, earnings of employees in engine, train and telegraph services were subjected to a deduction of 20 per cent from May to October, inclusive, and 15 per cent thereafter. The deduction for most of the other classes was increased to 15 per cent in December.

Toward the end of 1934 amendments to the agreements between the railway companies and the employees provided that the general deduction of 15 per cent would be changed to one of 12 per cent on January 1, 1935, and to 10 per cent on May 1, 1935. Early in 1937 an amendment to each agreement provided that the deduction would be as follows: February 1, 9 per cent; April 1, 8 per cent; June 1, 7 per cent; August 1, 6 per cent; October 1, 5 per cent; December 1, 4 per cent; February 1, 1938, 2 per cent; April 1, 1938, none.

Coal Mining

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in Nova Scotia and Vancouver Island and in 1923 and 1924 slight decreases occurred in the latter. A substantial decrease occurred in Alberta and southeastern British Columbia in 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia. Slight increases, however, were provided for a number of classes in some of the mines in Alberta toward the end of the year. In 1926, reductions were effected in Nova Scotia but wages in the other fields were practically unchanged. Slight increases were made in some mines in Alberta in 1928. In Nova Scotia in February, 1930, rates for labourers were changed by increases of 5 cents to 15 cents per day and certain other datal classes were slightly increased. During 1931 rates of wages were steady but the industry suffered greatly from short time, that is, collieries were operated less than six days per week to a great extent. In 1932 in Nova Scotia rates were reduced 10 per cent in March, except that a minimum of $3.25 per day was provided for in the principal mines. In the other districts rates were reduced only in a few of the smaller mines. In 1933, wages in the Drumheller district in Alberta were reduced more than 10 per cent. In Nova Scotia, rates were unchanged in the principal mines but there were reductions of about 15 per cent in certain mines of medium size. In 1934 partial restorations of these reductions were made in some Nova Scotia mines, while decreases occurred in New Brunswick. In 1935, increases of about 5 per cent were made in Nova Scotia and in Alberta in the Drumheller and Edmonton districts. In 1937 datal rates in several of the principal mines in Nova Scotia were increased by nearly 10 per cent. In 1938 the rates were increased 5 to 10 per cent in the various districts in Alberta and in the Crow's Nest Pass district in British Columbia. In the principal mines in Vancouver Island in British Columbia average increases of 7 per cent were made.

The index number for 1901 to 1934 does not include New Brunswick, Saskatchewan and the Princeton district in British Columbia. The inclusion of these figures for 1934, when weighted according to numbers of miners employed, made no change in the result.

Factory Labour

Factory labour had shown almost the greatest percentage increases up to 1920, both for common labour and for the various trades, but steep decreases appeared from 1921 to 1923 after which the trend was upward until 1931 when a considerable number of decreases occurred. In 1932 decreases in rates were numerous and steep in some cases. There was, however, a pronounced tendency to reduce hours per week or per day or both, frequently on a short time basis, with relatively small reductions in hourly rates. In some cases, where hours per day were reduced more than daily wages, the hourly rate became higher. In 1933, rates were again generally downward but less steeply. In 1934 there were numerous increases in nearly all of the manufacturing industries but comparatively few decreases so that the index number rose by nearly 3 per cent. In 1935 the upward movement continued. In Ontario and Quebec this was due to some extent to agreements establishing minimum rates in various localities and industries under provincial legislation. In 1936 wages were increased in many establishments in all manufacturing industries and in 1937 and 1938 the upward movement continued.

Logging and Sawmilling

In logging and sawmilling steep increases in wages appeared up to 1920, followed by particularly steep decreases in 1921, after which substantial increases occurred in 1923 and 1924, with a decrease in 1925 and slight increases each year thereafter until 1930 when more decreases than increases appeared. During 1931 decreases were general, and again in 1932, wage reductions of 20 per cent being quite common. In 1933, wages were still downward but there was a pronounced upward trend toward the end of the year for the ensuing season. In 1934, substantial increases in wages were general both in logging and in sawmills so that the index number rose by about 20 per cent. Provincial regulations as to wages in logging in New Brunswick and

Quebec came into force that year. In 1935 the increases averaged 5 per cent. In 1936 wages were again upward, the increases averaging nearly 9 per cent. In 1937 the average increase was over 13 per cent and in 1938 was 5 per cent.

Nature and Scope of Report

The main object of these reports is to show the changes in wage rates and in hours of labour during the periods covered. The figures given in each report afford a continuous record for the years included, the data being from the same sources as far as possible. Whenever a new source of information becomes available, the figures for previous years are secured, if possible, and the record is revised accordingly.

Information is compiled from reports secured annually from representative employers and trade unions, and also from union agreements. The information is obtained in June for building trades, civic employees, steamships, trucking and cartage, longshoremen, logging and sawmilling, pulp and paper mills, and for iron and steel products, including automobiles, parts and accessories. For other trades and industries the information is secured chiefly in September. For the classes covered in June, later information is frequently received and used.

Figures are secured from practically all the large establishments in the various industries and from a representative number of the smaller establishments. These reports are supplemented by figures obtained by officers of the Department and by resident correspondents of the Labour Gazette in the principal industrial centres.

Wages in manufacturing are shown by samples numbered one, two, etc., each sample showing the predominant rate in a certain establishment; in some cases, for large establishments two or three samples are given; in other cases where the same rate is paid by a number of firms a sample may represent several such firms in order to avoid repetition. Additional samples of rates above or below the predominant rates have been included where an appreciable number of workers were receiving such rates; where it appears to be preferable a range of predominant rates is used. For common labour in factories, sample rates are given by localities for the principal manufacturing centres. The locality in each case is not given as it would in many instances make possible the identification of the particular establishment.

For the following industries wages are given in the form of samples as in the case of factory labour: steamships, grain elevators, electric current production and transmission, telephones, laundries, logging and sawmilling, and metal mining.

Figures for particular localities are given for building, metal, and printing trades, electric railways and civic employees in Tables I and II, and for trucking and cartage, and longshoremen in Table III, also for common labour in factories in Table IX.

The statistics as to building trades show the prevailing rates of wages and hours of labour for nine classes of labour for the years 1920, 1926, and for 1930 to 1938 inclusive, for the building season beginning in the spring of each year. During the year 1931, however, changes occurred later in the season more extensively than is usual, and the rates in effect at the end of the year were therefore obtained and included. For 1933 a similar survey was made again toward the end of the year in several cities. As in all previous years, changes in rates reported down to the end of the year, from the sources mentioned above, are included. In Nova Scotia, Quebec, Ontario, Saskatchewan and Alberta, the rates include agreement rates made obligatory on all employers affected under provincial legislation as to collective agreements and industrial standards; in British Columbia they include minimum rates for the construction industry under the Male Minimum Wage Act, and in Manitoba under the Fair Wages Act. Such rates of wages and hours of labour are given in Appendix E.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the employees, members of the organizations of railway employees, the principal railways having the same rates for nearly all the principal classes. The figures published are taken from these agreements.

In water transportation the organization of various classes of employees negotiate scales of wages, hours and working conditions with many of the steamship companies although agreements are not always signed; other operators tend to pay about the same rates.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in most cases represented by unions and in others by committees of employees. The figures published from 1920 to 1933 were taken from such agreements. The figures for average earnings of contract miners, however, were received from representative employers in each district. In some of the mines in these districts the wages of unorganized employees are somewhat lower than the rates in the agreements. For Report No. 18, and subsequent reports, statements as to wage rates

and hours of labour have been requested from the operators of all the larger mines throughout Canada and the figures so secured have been compiled by provinces or districts. The resulting figures include those for many mines not operated under agreements as to wages and working conditions, and cover the mines in New Brunswick, Saskatchewan and the interior of British Columbia for which figures were not previously published.

In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada, secured from representative employers.

In logging, Table VII, the data each year is for the season beginning in the autumn and ending in the spring in Eastern Canada.

Data as to Hours

In earlier reports the hours of labour shown throughout were the standard or regular hours per week, per day, etc., and did not indicate the hours actually worked either overtime or on short time. During 1931 a number of estblishments in many of the manufacturing industries reported operations on a short time basis. In the report for that year, No. 15, covering the years 1926, 1930 and 1931, standard or full-time weekly hours were shown as before, with full-time weekly or daily earnings where hourly wages were not used.

In Report No. 16, with figures for 1930, 1931 and 1932, in the tables on manufacturing industries, the hours of labour for these years were those reported by employers, whether short time or regular hours, and the wage rates were brought to an hourly basis, except in certain industries, clothing, bread, cake, biscuit, candy, brewing and paper box making for which regular hours were reported chiefly, employees being usually paid by the week. The same procedure has been followed in subsequent reports except that wages for boot and shoe manufacturing are given on a weekly basis with the hours shown as reported. In this industry, as in some instances in clothing manufacturing, the hours actually worked by individual piece workers are usually not reported and the hours shown are those on which the department or factory is operated.

Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the relative changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentage changes in rates from year to year prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers for the six groups the simple arithmetical averages were taken, no allowance being made for the importance of each trade or group by using a system of weighting. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the index numbers of hourly rates from 1901 to 1921 have been reproduced, with figures since 1921 calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily wages in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 has been calculated in the same manner as those for the other groups. The index numbers for metal trades, previously calculated from Section *b* in Table I, omitted for 1931 and 1932, were calculated from the average percentage changes in the samples for such trades in Table X for those years.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering (logging and sawmilling) calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. These figures have been brought down to 1938 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of index numbers for the period 1901 to 1938 are, in the main, skilled trades; and practically all of these classes, including the unskilled, are organized to a great extent in trade and labour unions. The index numbers for these six groups therefore show the trend of wage rates in a number of organized occupations whose members, except coal miners and steam railway employees, work chiefly in cities. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages in factories show the trend of wages for labour in manufacturing industries in which there are many establishments in small centres as well as in cities. The figures for lumbering cover sawmilling in both large and small centres and logging in the principal districts.

Weighted Average Index Numbers

Beginning with Report No. 19, in addition to the simple average for the six groups with figures from 1901 to 1937, weighted averages have been calculated for these six groups and also for all nine groups in those years for which figures are available. The index number for each group is weighted by the average number of wage-earners in the industry represented, as shown by the decennial or the annual industrial census of 1921 and of 1931, the average of the figures for these two dates being taken in each case.

The weights were as follows (in thousands): building trades 143; metal trades 131; printing trades 25; electric railways 18; steam railways 161; coal mining 28; common factory labour 110; miscellaneous factory trades 363; logging and sawmilling 77.

It will be observed that this weighting has most effect in modifying the effect on the general averages of the figures for coal mining and lumbering in which from time to time since 1920 the changes have been quite different from those in the other groups.

Weighting, within groups, although desirable, has not been done. In such groups by occupations or industries weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, Common Factory Labour, Miscellaneous Factory Trades, and Logging and Sawmilling, the index numbers, being calculated from samples, the averages are automatically weighted by the number of samples which vary according to the number of workers in the various occupations and industries.

TABLE I.—RATES OF WAGES AND HOURS OF
(a) Building

* Rate and hours approved under Industrial Standards Act, Nova Scotia, 1936.

** Beginning in 1934 agreements approved by Order in Council under the Collective Labour Agreements Extension Act, Quebec, 1934, established minimum rates of wages for various trades in cities, towns and other defined jurisdictional territory throughout the province. On May 1, 1937, the Collective Labour Agreements Extension Act, Quebec, 1934, was replaced by the Act entitled an Act Respecting Workmen's Wages. On March 18, 1938, the Act respecting Workmen's Wages was replaced by an Act entitled The Collective Labour Agreements' Act. In 1935, 1936, 1937, and 1938 the minimum rate in each range is that approved under these Acts.

* Maximum rates based on length of service: in most cities bus drivers, on lines operated in connection with street railways receive the same maximum rates of wages as one man car operators.

‡ Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

† Including armature winders, wiremen, etc.

§ Including troublemen, and groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

§§ Where a range appears, figures represent predominant rates.

(a) Deduction from earnings, 10 per cent.

(b) Deduction from earnings; 10 per cent in 1932 and 1933; 15 per cent in 1934; 10 per cent in 1935 and 1936; starting Feb. 1, 1937, rate of reduction reduced by 1 per cent every two months (Oct. 1, 1938 full wages again).

(c) Deduction from earnings, 5 and 7½ per cent.

(d) In summer 54 cents per hour, two men cars, 59 cents, one man cars, 42 hours per week.

(e) Deduction from earnings: in 1932, 5 per cent and up; in 1933, 6 per cent and up; in 1934, 1935, 1936, 4 per cent and up; in 1937 and 1938, 3·3 per cent and up.

(f) Deduction from earnings: in 1932, 4 per cent; in 1933, 1934 and 1935, 10 per cent; in 1936, 7 per cent; in 1937, 5 per cent; in 1938 up to 3 per cent.

(g) Deduction from earnings: in 1932, 4 to 8 per cent and up; in 1933 and 1934, 4 to 10 per cent; in 1935, 4 to 9½ per cent.

(h) Deduction from earnings, Dec. 1, 1932, also 1933, 1934, 5 per cent; 1935, 2½ per cent.

(j) On Oct. 1, 1920.

(k) On Oct. 1, 1920, 50 cents per hour.

(l) On June 1, 1920, 50 cents per hour.

(m) No two men cars in operation in Regina since 1921; in Calgary very few.

(n) Per month.

Mechanics' helpers, per hour	cents	51½	44	43	44	46	48
Signalmen, non-interlocked crossings, per hour	cents	46½	38	33	36	38	40
Pumpmen, per month	$	110.00–116.00	92.66–98.66	82.46–88.46	87.00–93.00	91.00–97.00	96.00–102.00
Engineers, pile driver, hoist, etc., per day	$	5.90	5.10	4.70	4.85	5.00	5.15
§*Locomotive and Car Shops—*							
†Mechanics, per hour	cents	85	77	70	70	74	79
‡Other carmen, etc., per hour	cents	80	72	63	63	67	72
Helpers, per hour	cents	62*a*	54*a*	47*a*	47*a*	51*a*	56*a*
Electrical workers, electricians, per hour	cents	85	77	70	70	74	79
Electrical workers, linemen, per hour	cents	81	73	66	66	70	75
Electrical workers, groundmen, per hour	cents	75	67	60	60	64	69
Electrical workers, operators, etc., per hour	cents	68	60	53	53	57	62
Coach cleaners, per hour	cents	50	42	38	38	42	44
Shop labourers, per hour	cents	48½	40	35	38	40	40–42

* For electric street railways by cities, *see* Table I (d).. ** Differentials on certain lines or divisions above these rates. Nearly all classes are on the basic 8-hour day with time and one-half for overtime, but in some cases some other consideration has been arranged.

† Machinists; boilermakers; blacksmiths; plumbers, etc.; sheet metal workers; cabinet makers; carpenters, coach, locomotive and bench; welders, etc.. ‡ Freight car carpenters; freight car painters; car inspectors, car repairers, etc. §Since 1918 employees are allowed one minute extra, for checking in and out, for each hour actually worked, thereby increasing earnings approximately one cent per hour.

(a) On Western lines Port Arthur and west, until 1929 in addition to these rates boilermakers' helpers received 5½ cents; blacksmiths' helpers, 4 cents, and other helpers 3 cents; since May 1, 1929, the differentials on western lines were boilermakers' helpers 4 cents, other helpers 2 cents.

(b) Deductions from each employee's earnings on basic rates effective as follows. Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1933; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 16, 1933, with certain exceptions. Deduction amended for all classes effective as follows: Jan 1, 1935, 12 per cent; May 1, 1935, 10 per cent. In 1937: Feb. 1, 9 per cent; April 1, 8 per cent; June 1, 7 per cent; Aug. 1, 6 per cent; Oct. 1, 5 per cent; Dec. 1, 4 per cent; Feb. 1, 1938, 2 per cent; April 1, 1938, none.

† Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight hour day.

* The figures given for contract miners are the average earnings at piece rates and for some mines the figures include helpers and loaders on piece work; the figures given for machine and hand miners are rates per day.

† Higher rates are paid in two or three mines for some of these classes; also in the large mines for certain positions.

‡Electric hoist.

* In Yukon Territory a few hundred tons of coal have been mined each year employing two to four miners, usually from 50 to 100 days; in 1933 wages averaged $12.38 per day for 51 days, four miners; in 1934 wages averaged $7.04 per day for 71 days, three miners; in 1935 wages averaged $7.00 per day for 50 days, three miners; in 1936 wages averaged $10.90 per day for 44 days, three miners; in 1937 wages $10.00 per day for 10 days, two miners. For 1921 the figures were included with British Columbia. In Manitoba, coal mining operations were commenced in 1931 employing 38 men for an average of 23 days, wages averaging $3.46 per day; in 1932 the average number of miners was 6, averaging $2.84 per day, 1,128 man working days; in 1933 the average number of miners was 10, average wage $2.10 per day, 2,055 man working days; in 1934 the average number of miners was 12, average wage $2.03 per day, 3,132 man working days; in 1935 the average number of miners was 12, average wage $1.15 per day, 2,571 man working days; in 1936 the average number of miners was 15, average wage $1.22 per day, 3,212 man working days; in 1937 the average number of miners was 10, average wage $1.71 per day, 2,193 man working days.

† Prolonged dispute during year.

‡ Figures calculated by dividing number of man days worked into total wages paid.

§ Prior to 1933 the figures for Nova Scotia included certain employees handling coal at a distance from the mine.

APPENDIX D

Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1937

A report issued by the Dominion Bureau of Statistics entitled "Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1937," affords data as to the average weekly earnings of employees with numbers employed for three classes of establishments: independent retail stores, chain stores, and wholesale trade. The first two reports of this nature covered the years 1935 and 1936, and a summary table of the figures was given in Appendix D in Reports No. 20 and No. 21. Figures for motion picture theatres were given in the report for 1935 but not in those for 1936 and 1937. The figures as to independent retail stores are chiefly from those which had an annual business of $20,000 or more in 1930 as shown in the census of 1931. This section includes department stores, restaurants, gasoline stations, garages, as well as retail businesses of various kinds. The information on chain stores was secured from all companies operating four or more units in the same or similar lines of trade and included earnings of store managers, clerks, cashiers, delivery and any other store employees but not for head office staff, warehouse and transportation employees. For the section on wholesale trade, information was secured from all the larger wholesale dealers and from a number of sales offices and distribution branches maintained by manufacturers.

In addition to the data as to the numbers of employees and average weekly earnings the report contains tables showing the percentages of employees in each kind of business by provinces whose weekly earnings fell within specified ranges: under $6, $6 to $6.99, etc., up to $100 and over. Figures as to earnings are tabulated in various other categories.

The accompanying table shows the average weekly earnings and numbers of employees, male and female by kinds of business and by provinces. The figures as to each kind of business by provinces are not included.

AVERAGE WEEKLY EARNINGS AND NUMBER OF FULL-TIME EMPLOYEES IN MERCHANDISING AND SERVICE ESTABLISHMENTS IN CANADA, 1938

Kind of Business and Locality	Male Employees		Female Employees	
	Average weekly earnings	Number	Average weekly earnings	Number

APPENDIX E

WAGES AND HOURS OF LABOUR IN FEDERAL GOVERNMENT CONTRACTS AND UNDER PROVINCIAL LEGISLATION

Legislation providing for the regulation of wages or hours of labour or both has been enacted in all provinces but the scope and application of the statutes and the method of regulation vary. The Dominion Government regulates wages and hours of persons employed on public works and imposes conditions as to wages and hours in the manufacture of government supplies.

A special publication on Legislation concerning Hours of Labour in Canada is expected to be published shortly. Where information as to hours is necessary for an understanding of wage regulation, it is given briefly in this section.

Federal Government Contracts

In accordance with a Resolution of the House of Commons in 1900, the Fair Wages Policy of the Federal Government has provided for the observance of rates of wages generally accepted as current for competent workmen in the district where the work was performed or, in the absence of current rates, for fair and reasonable rates. This policy applied to building and construction work and to the manufacture of government supplies.

In 1922 the application of this policy by the various departments of the government was standardized under an Order in Council, setting forth the labour conditions to be inserted in contracts for building and construction and for the manufacture and supply of mail bags, letter boxes, and other postal stores, fittings for public buildings, harness, saddlery, clothing and other equipment for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees.

On December 31, 1934, the labour conditions previously applicable to contracts for the manufacture of various classes of Government supplies as listed above, were rescinded and new conditions substituted (Labour Gazette, January, 1935, page 24).

The requirement for the payment of wages at not less than current rates, or fair and reasonable rates if there are no current rates, is retained, but it is also provided that males and females under 18 years of age will be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces. In certain of the Maritime Provinces where such minimum scales are not in effect, the contractors are required to pay the males and females under 18 years of age wages not less than those provided for women and girls under the Minimum Wage Act of the Province of Nova Scotia.

It is also provided that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents per hour, or for female workers 18 years of age and over, 20 cents per hour, but in any cases where the provincial minimum wage laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contract work. For instance, for a 50-hour week on a Federal Government contract a male 18 years of age and over, whether experienced or inexperienced, must be paid not less than $15 and a female $10 even if the provincial minimum scale may provide $6, $7, $8, etc., but if the provincial minimum scale is in excess of $15 in the case of a male and $10 in the case of female workers then the provincial scale must prevail.

The Fair Wages and Hours of Labour Act, 1935, gives statutory effect to the Government's wage policy with respect to public works. This statute replaced the Fair Wage and Eight Hour Day Act, 1930. It provides for the observance of current rates of wages and stipulates also that wages shall in all cases be such as are fair and reasonable. It requires an eight-hour day and 44-hour week on building and construction under federal government contracts and on works towards which federal aid is granted by way of subsidy, loan, etc., as before, but extends the list of such works to include those carried out by any provincial and municipal authority if financial aid is given by the federal government, "unless the grant or payment is by statutory authority or by agreement with the Government of Canada excepted." It is also provided that regulations may be made to require the furnishing of any necessary information to ensure the enforcement of the statute. Any contract may be exempted from the Act by order in council before being entered into.

Minimum Wages for Female and Male Employees under Provincial Legislation

Minimum wage legislation providing for the establishment by a government board of minimum rates of wages is on the statute books of every province but Prince Edward Island. These Acts applied at first only to female workers but at the present time all but that of Nova Scotia apply or may be applied to males also. In Alberta and British Columbia there are separate statutes relating to each sex. In New Brunswick the Minimum Wage Act applying to women was never put into effect. The New Brunswick Fair Wage Act, 1936, now incorporated in the Labour and Industrial Relations Act, 1938, enables minimum rates of wages to be established for both male and female workers but the only orders made under the Act apply to particular establishments.

Boards administering minimum wage laws have power to fix special rates for handicapped workers and in some provinces such workers have to be licensed. Lower rates which are increased at specified intervals are established for learners or inexperienced workers by the orders applying to some occupations but abuse of this provision is usually guarded against by a restriction on the proportion of inexperienced workers that may be employed at such rates. In some cases, inexperienced workers are classified according to age and those over 18 years of age have higher minimum rates than those under 18.

Under the first Minimum Wage Acts in Alberta, British Columbia, Manitoba and Saskatchewan, the administrative board had power to limit hours of labour and the orders as to hours were to supersede the provisions of any existing statute. In other provinces the board could only specify the number of hours to which the minimum rates applied but in both cases overtime rates could be established. At the present time in Manitoba and Saskatchewan and in Quebec and New Brunswick, maximum hours of work may be fixed. In Ontario the statute specifies the hours to which the rates apply and in Nova Scotia, as before, the board may declare the minimum rates to apply to a certain work period. In Alberta, since the enactment of the Hours of Work Act, 1936, applying to all employment except farm work and domestic service, there has been no authority under the Minimum Wage Acts to limit hours. In British Columbia where the Hours of Work Act, 1934, applies only to industrial undertakings, shops, hotels and restaurants and certain other specified occupations, the Female Minimum Wage Act gives power to the Board of Industrial Relations to limit hours but no similar authority is granted by the Male Minimum Wage Act. In Ontario and New Brunswick under the factory law, hours of women and young persons in factories are limited to 10 a day and 60 a week and in Quebec to 10 a day and 55 a week with provision in all cases for limited overtime on not more than 36 days in the year. In Ontario the same limitations apply in shops. In Quebec women and young persons may not be employed more than 60 hours a week in shops in cities of over 10,000 population. There is no restriction on hours in factories and shops in Nova Scotia. In Saskatchewan weekly hours of women and young persons in factories are restricted to 48 a week and in Manitoba to a 9-hour day and 54-hour week. In Manitoba Minimum Wage orders put a further limitation on hours in factories.

The provisions in Minimum Wage orders concerning hours and the rates for overtime and part-time work are set out below under each province. In all provinces, workers required to wait on the premises must be paid for the time so spent and if the employer requires uniforms to be worn, as in hotels and restaurants, he must furnish them and pay for laundry. Special provision is made in Quebec for uniforms made to measure.

Apart from the special statutes providing minimum wage-fixing machinery, minimum rates of wages may be fixed for certain classes of workers under other legislation in several provinces, such as lumber workers and truck or bus drivers. Minimum wages and maximum hours are established also under the Manitoba Fair Wage Act, the Collective Labour Agreements Act of Quebec and the Industrial Standards Acts of Alberta, Nova Scotia, Ontario and Saskatchewan. The last five named statutes are dealt with in a separate section later in this Appendix.

The minimum rates established are set out in the following tables and a brief summary of the provisions in so far as they affect wages is given for each province. For full information it is necessary to refer to the orders as issued by the provincial authorities. Fairly complete summaries have been published in The Labour Gazette when the orders were gazetted.

PRINCE EDWARD ISLAND

The Charlottetown Incorporation Act as amended in 1936 empowered the city council to make a by-law prohibiting any labourer or workman being hired at less than 35 cents an hour for any work done in the city by or under a contractor or of the kind usually done by contractors if directed by any person other than the owner of the property on which the work is done. Such a by-law was passed on May 14, 1936.

NOVA SCOTIA

The Nova Scotia Minimum Wage for Women Act enables the Minimum Wage Board to fix minimum rates of wages, except in agriculture or domestic service, for female workers in any trade or occupation in cities and towns.

Minimum rates have been established for experienced and inexperienced female workers under 18 and over 18 in laundries and dry-cleaning establishments; bakeries and places making food products; hotels and restaurants; textile and needle trades, including boots and shoes; telephone operators; factories not covered by another order, bookbinding, paper-box making and other paper trades; shops; beauty parlours; and offices. Except in offices, the number of inexperienced adults or young girls or of both is limited to 25 per cent of the total number of females in the establishment.

The length of the learning period varies with the occupation but under all orders, except those applying to shops, beauty parlours and hotels and restaurants, it is limited to one year for persons over 18 years of age and to 18 months for those under 18. For office work, only a three months' learning period is required if the employee holds a satisfactory diploma from a business school. For beauty parlours and hotels and restaurants, no distinction is made by reason of age. For beauty parlours there is a "beginner's rate" applying to the first six months, then rates for "inexperienced" employees for 12 months. Employees who have paid for at least three months' training in a school or beauty parlour may not be required to start at the beginner's rate. In hotels and restaurants there is a learning period of three months. In shops, including millinery, dressmaking or fur-sewing connected with a shop, there is a probationary period of three months for which no wages need be paid and a subsequent learning period of 18 months for all workers, the rates varying according as the worker is over or under 18 years of age.

Piece-workers under the miscellaneous factory and paper trades order must be paid the specified weekly minimum for the first six months, after which it is sufficient if only 80 per cent receive the prescribed minimum.

As regards hours of labour, the minimum rates apply to a week of from 44 to 50 hours except in beauty shops and offices where they relate to a 48-hour week or the normal work-week if less than 48. Overtime after the specified hours and short time for less than 44 or 48 hours, as the case may be, must be paid *pro rata*. Special provisions for shops permit a 60-hour week from December 15 to 31, require time and one-half to be paid for work in excess of 50 hours, prohibit any reduction from the minimum wage for a statutory holiday and require the rates for experienced workers to be paid to all part-time and casual employees in shops.

Wages must be paid in cash in shops and beauty parlours and no deductions may be made. The order governing shops requires wages to be paid at regular intervals not exceeding one month, while that relating to beauty parlours stipulates that the cash must be given in a sealed envelope bearing the employee's name, the amount enclosed, the date of the week or fortnight she worked, the number of hours worked and the hourly rate. As required for factories and laundries by the Factories Act, the order for offices stipulates that one hour daily must be allowed for lunch.

Where board or lodging or both are provided by the employer, the amounts that may be taken from wages in payment thereof are limited to $2 a week for lodging and $4 for board except for workers in laundries. The latter may be charged not more than $4.50 for board and lodging in Halifax and other towns except Sydney and Glace Bay where a maximum of $4.50 for board and $1.50 for lodging may be deducted. In no case may more than 25 cents be deducted for a single meal.

69799—9½

MINIMUM WAGE RATES IN NOVA SCOTIA

Female Employees

Industries and Occupations	Minimum per Week		
	Experienced workers	Inexperienced workers over 18	Girls under 18

All towns under 17,000 population	10.00	6.00– 9.00	6.00– 9.00

NEW BRUNSWICK

The Minimum Wage Act, 1930, applying to female workers, has not been put in effect. The Labour and Industrial Relations Act, 1938, which reproduces the provisions of the Fair Wage Act, 1936, provides for a Fair Wage Board with powers to establish minimum wages, maximum hours and overtime rates. No orders of general application have been issued.

Forest Operations

Under the Forest Operations Act, 1934, a Forest Operations Comission was constituted with powers to make final decisions in labour disputes, subject to the approval of the Minister of Lands and Mines, and to fix minimum wage scales for the industry. The Act does not apply to work on Christmas trees or firewood operations. It permits the employment of men inexperienced or physically unfit for a full day's work at wages below the minimum rates established, if agreements approved by the Commission are signed by the employers and the men concerned.

From March 20, 1937, the Commission established, for stream driving, an average rate of wages of $3 per day and board or its equivalent in the case of piece work, but the wages paid to cooks were not to be included in determining the average rate. Foremen, book-keepers and clerks are not within the scope of the Act and their wages are not considered in determining the average. For booming and sorting, the minimum rate is 28 cents per hour without board, provided, however, that where board is furnished by the employer, not more than 50 cents per day may be charged the employee.

From October 1, 1938, for cutting, yarding and hauling, the average wage rate paid by any employer must be at least $34 per month and board and the minimum rate for each employee $30 per month and board. Piece-workers must not be paid less than an average of $34 with board. If board is not furnished by the employer, wages must be increased by 50 cents a day. Wages paid to cooks and truck drivers and the amounts paid to employees for piece-work are not to be included in determining the average wage.

QUEBEC

The Fair Wage Act, 1937, replacing the Women's Minimum Wage Act, empowers the Fair Wage Board to fix minimum rates and maximum hours for any employees except farm labourers and domestic servants and workers covered by a collective agreement under the Collective Labour Agreements Act.

Two basic orders fix minimum wages in commercial and industrial establishments. Order 1-2-3 applies, outside cities and towns, to female employees and to males in the same occupations in retail and wholesale stores and in factories. Order 4 applies to employees of both sexes in commercial and industrial establishments of any kind, to road transport, hotels, teachers and other classes in cities and towns. The Order regulates overtime, part-time, piece-work, home-work, payment in cash and other matters. For a full summary of this Order, see The Labour Gazette, May, 1938, p. 512.

Subsequent orders deal with special industries or occupations which would otherwise be covered by one or both of the basic orders. In some cases, they relate only to a limited area. Those in effect on December 31, 1938, apply to: silk textiles; stationary engineers and firemen employed on the Island of Montreal and within a five-mile radius; manufacture of shoe counters; cotton textile industry excluding persons paid by the month; office workers; those engaged exclusively in rayon operations; teachers in Verdun; milk industry on the Island of Montreal and within five miles; hospital employees except in the Cities of Quebec and Levis and neighbouring counties and excluding religious orders and maintenance men; building trades in the County of Arthabaska; match factories; maintenance men in buildings used for offices, warehouses, industrial and commercial establishments or apartment houses, but not hotels or restaurants, on the Island of Montreal and within a five-mile radius; packing and grading waste paper; wholesale and export trade in butter and cheese on the Island of Montreal; laundries, dry cleaning and dye-works employing more than five persons on the Island of Montreal and within a five-mile radius; funeral casket manufacture, etc.; full-fashioned hosiery; tanning and dressing of hides and leather; and brick and tile manufacture.

The accompanying tables show the minimum rates established for the principal classes of workers by these orders except in cotton textiles, teachers in Verdun, hospital employees, building trades in Arthabaska County and match factories. The cotton textile order which continued in effect the rates of wages fixed by an agreement between the Dominion Textile Company and the National Catholic Textile Unions is being revised. The rates fixed applied to a 54-hour week. Teachers in Verdun had the scale of salaries raised to that adopted by the Catholic School Board of Montreal. The hospitals order provided for

increases over the existing salary or wage rates. All match factories in the province are to be considered as falling within Zone 2 as defined in Order 4 for the purpose of determining the minimum rates.

Different rates are set for the zones into which the province is divided by most orders. Certain orders require not less than a fixed percentage of the employees to be paid one minimum rate and the rest at lower minimum rates. Apprentices in most of the classes under Order 4 may not exceed 10 per cent of the total number of employees in the establishment and they may be paid not more than 10 per cent less than the rate for the class. Under the special orders apprenticeship is usually limited and separate rates are fixed.

Hours of labour are not limited by the orders except that a maximum of 72 hours a week is established for male workers by Order 4. Hours of females and boys under 18 in industrial establishments and in shops are restricted by statute to 60 a week except with special permit. In almost all cases the minimum rates of wages apply to a specified number of hours. Overtime, which must be paid for at the rate of time and a half except when the Board permits otherwise and under certain other conditions, is defined for most classes of workers as work in excess of 12 hours a day, or in excess of 10 hours a day if the specified weekly hours are worked or in excess of the weekly hours named. In silk textiles, however, the overtime rate is 5 per cent above the minimum and some special workers in other industries are paid *pro rata* or at a fixed rate. Overtime is not payable to persons earning a minimum of $30 a week in the Montreal district, $25 or $20 in the other zones, or, unless the hours are increased by more than 10 per cent, to those paid at a rate of 15 per cent above the minimum and given two weeks holidays in a year and two weeks sick leave with pay.

For less than 30 hours work in a week employees under Order 4 must be paid at least 15 per cent above the ordinary minimum for the class and they must be paid for at least three hours work in a day.

For board and lodging supplied by the employer, Order 4 limits the amount that may be deducted per week from wages to $5 in the Montreal District, $4 in Zones 2 and 3 and $3.50 in Zone 4. For board only, the maximum deductions are $4, $3 and $2.50 and for room only $1.50, $1.25 and $1. Separate meals are 20 cents, 15 cents and 12 cents. In the milk industry and in mining and construction camps, the rates for board and lodging are higher.

Wages in Forest Operations

Under the Act to Assure Reasonable Wages for Workmen engaged in Forest Operations, 1937, an order in council, approved August 30, 1938, makes it obligatory on all employers engaged in forest operations except on private lands belonging to farmers or settlers to pay to all workers a minimum wage of $45 per month of 26 days, with the exception of inexperienced youths from 18 to 20 years of age, incapacitated persons and men of 60 years or over for whom the minimum is $30 per month of 26 days. It is, however, provided that in no case may the number of such men in a shanty paid less than $45 per month exceed 12½ per cent of the total number of workers. The employment of any person under 18 years is prohibited. In addition to the above wage rates, board and suitable lodging must be supplied free of charge to the worker. For those on piece work, minimum prices for such work are set and they may be charged 70 cents per day for board and lodging, but all piece workers must receive at least $45 per month of 26 days in addition to board and lodging. No deduction may be made from wages for medical assistance, cots, blankets, etc., and prices for goods sold to workers are subject to regulation. Regular hours are limited to 60 per week, with time and one-quarter for overtime and time and one-half for indispensable work on Sundays except for necessary work by cooks, cookees, stablemen and carters.

(a) For 10-hour day and 50-hour week. Minimum and average rates per hour are fixed for several classes of employees in various departments. Only the lowest and highest rates are given. Average rates are required to be determined at least every 8 weeks.

(b) 55-hour week.

(c) 8-hour shift, 7-day week.

ONTARIO

The Minimum Wage Act of 1920 applied directly only to females but as amended in 1934 stipulated that males replacing female employees must be paid at least the minimum fixed for the latter. The Minimum Wage Act, 1937, repeals the 1920 Act. It applies to both sexes in any business, trade or occupation except agriculture and domestic service but the one order made under its authority is one relating to the textile industry.

Orders under the earlier statute remain in neries; jewellery trades; laundries, telephone systems; dyeing and dry cleaning works; retail stores; custom millinery; hotels and restaurants; beauty shops; shoeshine parlours; offices; elevator employees; theatres and places of amusement. Custom tailoring in the five largest cities, Toronto, Hamilton, London, Ottawa and Windsor, falls within the factory order. The retail stores order does not apply to office and restaurant workers employed in connection with a shop.

The learning period varies with the industry and, in some cases, with age. There is no learning period for workers in theatres or places of amusement, hotels, restaurants or shoeshine parlours. In beauty shops and in custom tailoring in the five cities mentioned there is no prescribed minimum for the first three months nor in the case of elevator operators for the first two weeks. In factories and offices, except where the worker has a business college diploma, the learning period is one year for a girl over 18, and 18 months for one under 18. In offices in towns or villages of less than 4,000, there is no distinction on the ground of age and the learning period is 18 months in places of more than 1,000 population and 12 months in smaller places. In jewellery trades a worker is entitled to the full minimum after 18 months if she is over 18 years of age and after two years if under that age. In shops, except in small places, girls over 18 have a learning period of one year and if under 18, two years. Employees reaching 18 years of age without selling experience in the five cities named must be paid at least $11 a week for the first six months, then the full minimum. In laundries, the learning period is nine months; in beauty shops, two years; in telephone offices, one year; and in custom millinery, three years.

The minimum rates are declared to apply to a specified number of hours per week, which varies according to the size of the municipality, or to the usual number of hours worked in the establishment if less than the specified number. The Industry and Labour Board, which administers the Act, has no power to fix maximum working hours but may fix special rates for work in excess of the stipulated hours. In municipalities of over 50,000 persons the specified number of hours is 48; in municipalities with 10,000 to 50,000 persons, 50 hours, and in other municipalities or places without municipal organization, 54 hours.

All the orders in effect that were made under the earlier Act required overtime to be paid for at proportionate rates but minimum hourly rates, instead of weekly, were established for canning factories operating seasonally and hotels and restaurants. Special overtime rates have been fixed in the textile industry by the Industry and Labour Board. For the first two hours' work in excess of regular daily hours, 31¼ cents an hour must be paid to girls and women over 18, 27½ cents an hour to girls of 17, and 22½ cents to girls under 17 years of age. For males the rates for the first two hours of overtime in any day range from 27½ cents an hour for those under 17 to 40 cents for those over 21, the lower rate increasing by 2½ cents with each year of age. All other overtime must be paid for at the rate of time and one-half. Employees who receive more than the weekly minimum for the regular work-week must be paid time and one-quarter for the first two hours overtime in any day and time and one-half for all other overtime.

The provisions as to payment for part-time and short-time vary. The textile order requires part-time workers employed for at least 40 hours a week to be paid the prescribed minimum wage for a week and those working for less than 40 hours to be paid an hourly rate equal to one-fortieth of the minimum. Workers temporarily on short time must be paid at least their regular hourly rate.

The proportions of inexperienced workers that may be employed is limited in shops and laundries to 40 per cent of the total number of female employees and in custom millinery, exclusive of temporary help, in the four largest cities to 33⅓ per cent.

All beginners, including piece-workers in factories, must be paid the weekly minimum for the first six months and in laundries for the first three months. Afterwards and at all times in the textile industry, it is sufficient if 80 per cent of the piece-workers receive the prescribed minimum. In the seasonal fruit and vegetable industry only 60 per cent of the piece-workers need be paid the minimum.

For board in hotels and restaurants in Toronto, not more than $5 a week may be charged to employees nor more than $2 for lodging. Elsewhere in the province and in seasonal canning factories the maximum deduction for lodging is $1.50 a week and for board $4.50. Not more than 25 cents may be charged for a single meal.

The Commercial Vehicle Act, 1936, gives the Lieutenant-Governor in Council power to fix minimum rates of pay for drivers of goods vehicles. This provision was made by the Public Commercial Vehicle Act, 1934, now repealed, but no minimum rates have been established.

MANITOBA

The Manitoba Minimum Wage Act applies to any person employed in a mail-order house, office, place of amusement, shop or factory in any city in the province and orders made or proposed to be made under it may be extended by Order in Council to persons employed in any trade, industry or calling in any part of the province.

Minimum Wage orders in effect relate throughout the province to both sexes in factories, retail and wholesale stores, hotels and restaurants, and employees 18 years of age or over not covered by another order; and in cities to males and females working in department stores and mail-order houses. Employees not otherwise covered do not include farm workers or domestic servants. Two orders applying to males only govern boys under 18 in certain manufacturing industries in Winnipeg and men performing work usually done by boys. Certain other orders apply to females and boys under 18 in cities only, except where otherwise specified.

The Act stipulates that in any industry where a minimum wage is established, no person 18 years of age or over may be employed at less than 25 cents per hour except where regulations provide for different rates. The Board may issue a permit granting modification of or exemption from any provisions of the orders in case of exceptional conditions.

The rates vary with experience and, in some cases, with age. Learners' rates apply for one year to employees over 18 years of age in factories, department stores and mail-order houses and in dressmaking, and for six months in fur sewing and offices. For office workers, a business college diploma entitles a girl over 18 to the minimum for experienced workers. For those under 18, minimum weekly rates of $8, $9 and $10 are fixed for boys and girls 15, 16 and 17 years of age respectively and of $10.50 for one who is 17 years and 6 months. An employee who has completed a business course is entitled to the minimum rate for a person one year older. The learning period for workers under 18 in dressmaking and fur-sewing is two years and 18 months respectively, but if a girl becomes 18 before completing the term in fur sewing she is required to serve only half the remainder before being entitled to the full minimum wage. In dressmaking after serving one year, she must be paid the rate for inexperienced adults when she reaches the age of 18. In factories, department stores and mail-order houses, employees under 18 who have put in one year or more are entitled to the full minimum rate when they reach the age of 18. Boys under 18 employed in hotels and restaurants, except bell boys, must be paid the full minimum rate after two years' experience.

The number of learners and employees under 18 years of age may not exceed 25 per cent of the total number of employees within the scope of an order. In offices, however, the number of female employees paid at the rates for inexperienced or minor employees and the number of boys under 18 together may not be more than 25 per cent of the total staff, male and female. The learning period is fixed, without regard to age, at two years in tailoring, 18 months in beauty parlours but with no prescribed minimum for three months prior to this period, 16 months in retail and wholesale stores, three months for females in hotels and restaurants, and four seasons of 10 weeks each in millinery. In the two orders applying to males only, the highest minimum fixed must be paid after one year.

As in the other western provinces, the Minimum Wage Board may limit working hours and this has been done in the case of female workers and boys under 18 and in certain work-places for males over 18. Maximum weekly hours for females and boys under 18 are 50 in dressmaking, tailoring and millinery, 48 in factories, department stores, mail-order houses, retail and wholesale stores, fur-sewing, places of amusement, beauty parlours and, except for female cooks, in hotels and restaurants, and 44 in offices. Daily hours may not exceed 10 in beauty parlours, barber shops and hotels and restaurants, nine in department stores and mail-order houses, retail and wholesale stores (except on Saturdays), fur-sewing and tailoring, places of amusement and for boys under 18 in factories in Winnipeg. In dressmaking and millinery, the maximum working day is eight and a half hours and for females employed in factories and offices, eight hours.

Overtime for a limited period may be worked in most cases under special permit but no overtime may be worked by persons under 16 in department stores or mail-order houses or under 17 in shops or by persons under 18 in factories.

In retail and wholesale stores, the minimum rates for male workers over 18 apply to a nine-hour day (10½ hours on Saturday) and a 48-hour week, and overtime for males and females must be paid for at five cents an hour more than the minimum rate except where the wage is above the minimum plus the amount for overtime. In hotels of 100 or more rooms male employees have a maximum 54-hour week but the minimum rates apply to a 48-hour week for all males over 18 and time in excess of 48 hours must be paid *pro rata*. In factories, the overtime rate is 30 cents an hour for females and boys under 18 and for males over 18 in Greater Winnipeg, unless the wages paid are at the no other order applies and for men performing work usually done by boys, for whom no maximum work-week is established, apply to a 48-hour week.

Part-time work in stores for less than 16 hours a week must be paid for at the minimum hourly rate for experienced workers. In places of amusement, ticket sellers and ushers must be paid at least 30 cents an hour when working less than 40 hours a week. In department stores and mail-order houses experienced employees have a minimum of 25 cents an hour for part-time work and inexperienced workers must be paid the rate for inexperienced adults. Except in shops, factories and places of amusement, part-time workers must be paid for not less than four hours on any day they are required to report for duty. In factories only two hours need be paid for.

Maximum deductions permitted from wages for board and lodging are $2 per week for lodging, $4.50 for board or $6 for both in the case of those employeed in fur-sewing, dressmaking, tailoring, millinery and in beauty parlours; $2.50 for lodging and $4 for board in hotels and restaurants and for employees not covered by special orders and 25 cents for single meals in shops. No reduction may be made from the minimum wage for statutory holidays in beauty parlours, shops, department stores, mail-order houses or factories.

Under the Highway Traffic Act, the Municipal and Public Utility Board has established a minimum wage rate for drivers of public service vehicles certificated for passenger transportation of $20 per week for a 6-day week for drivers employed by the week, or $80 per month for drivers hired by the month; those employed otherwise than by the month or week to be paid at least at the same rate. If wages are proposed to be paid on any other basis than that provided for, the scale must be approved by the Board. Hours are limited to nine per day for driving, 12 per day in any capacity, with a six-day week.

The Taxicab Act applies only to taxicabs in Greater Winnipeg. It limits hours on duty to 12 a day on not more than 6 days a week. A minimum wage of $17.50 per week was fixed for drivers employed by the week from February 15, 1937. For a driver employed otherwise than by the week, a minimum of $1.60 per day must be paid for each day he is on duty. If he is on duty for more than four hours on any one day, he must be paid at least $1.60 and, in addition, not less than 40 cents an hour for each hour in excess of

four. From May 1, 1937, it was stipulated that a driver employed by the year or month rate of 30 cents an hour for the hours actually worked. The rates for employees to whom must be paid a wage equal to what he would receive if paid by the week; that where he is hired by the week, he must be paid the prescribed minimum for the week whether he has four, five or six days of work, unless he is absent through illness or by arrangement.

Fair Wage Act

The Fair Wage Act, 1916, as amended, enables the Minister of Public Works, on the recommendation of the Fair Wage Board, to fix minimum wages and maximum hours each year for workmen employed in public construction and certain private construction, the rates and hours, unless otherwise declared by the Board, to be based on agreements between employers and employed or to be in accordance with prevailing conditions. The schedule effective June 15, 1938, applies to public and private works, and the rates, except for truck drivers on public and private works other than public roads and bridge work, are similar to those in force from June 1, 1937, to June 1, 1938. Rates for such truck drivers formerly varied with the capacity of the vehicle driven by the employee, but in the new order a flat rate is established. "Public work" includes work, authorized by the Minister of Public Works for which a contract or contracts have been made between the Minister and an employer, consisting of construction, including remodelling, demolition or repairing or painting of buildings in Manitoba and highway, road, bridge or drainage construction outside the Greater Winnipeg Water District. "Private work" means the building, construction, remodelling, demolition or repairing of a building or construction work for which a contract or contracts have been made exceeding $100 within the Greater Winnipeg Water District or any city or town of a population over 2,000 or any other part of the Province to which the provisions of the Act are extended by the Lieutenant-Governor in Council. The term does not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant, if no more than three men are employed in addition to the regular maintenance staff, and if such work is not undertaken with a view to the sale or rental of the property. Neither does it include work which is done by a maintenance man, or men, employed by the month. The accompanying tables show the minimum wage rates so established.

As amended in 1938 the Fair Wage Act also provides for fixing wages and hours in certain industries by a procedure similar to that laid down in the Industrial Standards Acts of other provinces. These industries, listed in Part II of the Act, are barbering, hairdressing, printing, engraving, dry cleaning, and any branch or combination of these. The Lieutenant-Governor in Council may declare, on the recommendation of the Minister, any industry not covered by Part I, that is private and public construction to be within Part II.

MANITOBA FAIR WAGE RATES FOR ROAD AND BRIDGE CONSTRUCTION

Occupation	Minimum per hour	Maximum hours per week
	$	
Labourers	.30	48
Teamsters	.30	48
Teamster and two horse team	.55	48
Teamster and four horse team	.80	48
Grader and tractor operators (excepting permanent municipal employees)	.60	48

Truck drivers	.45	.40	48

* All men hired in Winnipeg to go into the country to work on buildings must be paid the city schedule rate excepting where other definite agreements are made.

(a) It was agreed between the Winnipeg contractors and tradesmen that 40 hours per week only be worked during July and August, 1938.

(b) For wood lathers, work may be paid for on a square yard basis at not less than 6 cents per square yard.

(c) Engineers in charge of hoisting engines of three drums or more operating any type of machine; or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over; or operating drop hammer pile drivers; in all cases irrespective of motive power.

(d) Engineers in charge of hoisting engines having only two drums or of single drum if used on a building of three stories and over, used in handling building material; or steam shovels and draglines not specified in Class "A" hereof; irrespective of motive power.

(e) Engineers in charge of any steam operated machine not specified in class "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provisions of "The Steam Boiler Act"; or air compressor delivering air for the operation of riveting guns on steel erection work, or pumps in caissons, or concrete mixers of over 1/3 yard capacity; irrespective of motive power.

(f) Operators of gas or electric engines for machines not otherwise specified in class "A", "B" or "C" hereof, or men firing boilers of machines classified in class "A", "B" or "C" hereof or assisting engineers in charge of same.

(g) If employed on the construction or demolition of the building by owner, contractor or sub-contractor.

SASKATCHEWAN

The Minimum Wage Act, 1919, applying to females employed in shops and factories in cities was amended in 1936 to enable its extension to other parts of the province and to male employees. Existing orders apply to all workers in factories and shops in cities and towns and within a five-mile radius. A "shop" is defined to include a mail-order house, hotel, restaurant, barber shop, beauty parlour, tobacconist's and news agent's business and all parts of a building used in connection with the sale of goods by retail.

The Minimum Wage Board may limit hours of labour but since the Act was applied to male workers, the former restrictions on hours have been rescinded. Overtime, however, is defined as work in excess of 60 hours a week for bell boys, porters and elevator operators in hotels and restaurants and in excess of 48 hours a week for all other workers and is required to be paid for at a minimum hourly rate of 20 cents for delivery boys in stores, inexperienced minors in beauty parlours and barber shops, and dish washers, elevator operators, bell boys and porters in hotels and restaurants, 30 cents for other experienced workers and 25 cents for inexperienced workers. Employees working less than 43 hours a week are on part-time. Part-time employees must be paid for at least two hours and up to 43 hours a week must be paid the same hourly rates as for overtime.

The minimum rates for inexperienced workers apply for 18 months in most cases, increasing each half-year, but the learning period in hotels and restaurants except for bell boys, elevator operators and porters, is one year, in the transfer and storage business except for office help and messengers, six months, and for boys delivering parcels for shops, three months. In places of amusement and for messengers in the transfer and storage business, there is no learning period fixed. Only in beauty shops and barber shops is any distinction made between adult and minor employees in the matter of wages. Those under 21 in such workplaces may be paid a minimum of $6 a week for the first six months after which they must be paid at the rate for inexperienced adult employees and, irrespective of length of experience, on reaching the age of 21 years, they are to be paid the rates for inexperienced workers. Apprenticeship contracts approved by the Board may fix minimum rates for apprentices.

The number of inexperienced workers is limited except in beauty parlours, barber shops, theatres and amusement places, to 25 per cent of the total number of workers. The number of part-time employees, excluding casual workers, is limited also to 25 per cent in stores and to 33⅓ per cent in factories and in hotels and restaurants. In beauty parlours and barber shops, not more than one indentured apprentice or inexperienced worker may be employed for every experienced worker.

In hotels and restaurants where a special uniform other than white is required and not supplied by the employer, the rates are to be increased by 50 cents per week. If lodging and 21 meals in a week are furnished by the employer, the minimum weekly rates are $5.50 for experienced workers, $3.50 for those with from six to twelve months' experience and for dish washers, and $1.50 for workers with less than six months' experience and for bell boys, porters and elevator operators. Where meals only are supplied, the corresponding minimum rates are $7.50, $5.50 and $3.50 per week and where only lodging is given, $10, $8 and $6 a week. If less than 21 meals or 7 days' lodging is furnished, the minimum rates must be increased by 20 cents for each meal and 30 cents for each day's lodging for which the employee is responsible.

MINIMUM WAGE RATES IN SASKATCHEWAN

MALE AND FEMALE EMPLOYEES

Workplaces and Occupations	Minimum per Week	
	Experienced Workers	Inexperienced Workers

Theatres and dance halls:		
Managers, cashiers, doormen, ushers and cleaners	12.00	12.00

The Coal Mining Industry Act, 1935, empowers the Lieutenant-Governor in Council to establish standards as to hours of labour and wages of persons employed in the industry, but no such regulations have been made. Hours are limited to eight in a day by the Coal Miners' Safety and Welfare Act as amended in 1932, except when otherwise agreed between employer and employee.

The Public Service Vehicles Act grants the Highway Traffic Board the power to regulate the wages and hours of drivers of public service and commercial vehicles. No regulations under this Act have been issued.

ALBERTA

The Minimum Wage Act, 1925, as amended, applies to women in any trade or occupation, except domestic service, in the province. Orders under this Act cover factories; telephone exchanges of more than 100 lines; shops; theatres and places of amusement; beauty shops; garages, service stations and elevator operators; restaurants; laundries and dry-cleaning establishments and offices.

The Male Minimum Wage Act, 1936, applies to all male workers except farm labourers and domestic servants. A general order fixes minimum hourly rates throughout the province for male employees and there are two special orders applying to certain classes: boys under 18 employed in delivering merchandise from shops and men employed in saw mills, box factories and other woodworking plants and in logging and the railway tie industry in rural districts. The general order does not apply to indentured apprentices, employees governed by schedules of wages and hours under the Industrial Standards Act or by codes drawn up under the Department of Trade and Industry Act, or to persons paid on a commission basis and hired by a contract approved by the Board of Industrial Relations, workers hired for temporary work not for the purpose of the employer's business, persons engaged in fighting prairie or forest fires or those exempted by the Board of Industrial Relations.

Lower rates are fixed for female learners. The learning period is 18 months in bookbinding, embossing, engraving and printing, 12 months in wholesale and retail stores, mail order houses, laundries and dry-cleaning and dyeing establishments and six months in restaurants. It varies from 9 to 12 months in factories. In dressmaking, tailoring, fur-sewing, millinery, hairdressing establishments and for office workers and telephone operators the apprenticeship period is one year with no fixed rate for the first month of employment. Apprentices are limited to 25 per cent of the total female staff in all places but telephone exchanges where 33⅓ per cent may be student operators.

All employees covered by the orders are governed by the Hours of Work Act which limits hours to eight a day and 48 a week for females and nine a day and 54 a week for males. Certain exceptions are permitted in the lumbering industry in rural districts and the Board of Industrial Relations may grant exemptions in other industries.

Except as indicated in the accompanying table, the rates for male workers are hourly rates and there is no special overtime rate. For female workers, one hour of overtime in a day must be paid for at not less than the regular rate if the weekly hours are 48 or less. Time in excess of nine hours a day or 48 hours a week must be paid for at the rate of time and a half.

All male employees covered by the general order if hired by the week or a longer period must be paid for at least 42 hours per week; and if employed for four hours or less not less than that period must be paid for at 40 cents an hour.

Special provision is also made for part-time female workers and for regular female employees on short time. The latter, except in theatres and telephone exchanges, if working less than 40 hours a week, must be paid for at least that number of hours; if working for less than 48 but more than 40 the prescribed minimum wage may be reduced *pro rata*. Part-time workers, hired by the hour or by the day or only for busy periods, who work for less than 40 hours a week, must be paid not less than 30 cents an hour for four hours. Girls and women in theatres who work less than six consecutive days a week must be paid not less than 50 cents an hour for at least two hours and in telephone offices not less than 30 cents an hour for four hours.

Women employed in restaurants may not be charged more than $5 for a week's board or 75 cents per day where board for less than a week is furnished. For male employees the maximum charge for 21 meals per week is $5, for single meals 25 cents, and for lodging $2 for a full week or 25 cents per day for any period less than a week but in logging, lumbering, etc., employees must be furnished with board and lodging in addition to the minimum wage specified.

BRITISH COLUMBIA

The Female Minimum Wage Act, 1934, and the Male Minimum Wage Act, 1934, revise earlier statutes. They do not apply to farm labourers or domestic servants. The Female Minimum Wage Act provides that where a minimum has been fixed for employees in any industry or occupation, no male person over 18 years of age may be employed in work usually done by female employees at less than the minimum wage fixed for such female employees. Similarly where a rate has been fixed for female employees under 18 years of age no male employees under 18 years may be employed at a lower wage.

Orders made under the Female Minimum Wage Act cover the mercantile industry; manufacturing; personal service in beauty parlours; theatres and places of amusement; garages and service stations and the driving of motor vehicles; offices; janitor service; fruit and vegetable industry; hotels and catering in any establishment; elevator operators; laundries and dry-cleaning works; telephone and telegraph operation; fish drying, curing, etc.

The Male Minimum Wage Act orders apply to logging, sawmilling and woodworking; furniture manufacture; bakeries; fruit and vegetable industry; construction; carpenters in some localities; shipbuilding; goods transported by road; bus and taxi drivers; mercantile industry; stationary engineers; barbers; first-aid attendants; and janitors.

As in the other provinces, special rates lower than the minimum wage for experienced workers are set for female employees during a fixed learning period except in the fruit and vegetable industry and in the case of elevator operators. A further distinction is made between inexperienced females over 18 and girls under 18 years of age. The statute stipulates that the number of learners over 18 must not exceed one-seventh the total number of female employees in any establishment and the aggregate number of such workers and of girls under 18 may not exceed 35 per cent of the total female working force. In wholesale and retail stores, barber shops and beauty shops, offices and in the hotel and catering industry, the rates fixed in the orders for inexperienced females may only be paid with permission from the Board. In the fruit and vegetable industry the lower rates for inexperienced and handicapped female employees may be paid only to 10 per cent of the total number of females.

The learning period for female employees over 18 years of age in stores, barber shops and beauty parlours, offices, laundries and in the fish industry is one year; in factories it varies from six to 12 months and in bookbinding, printing, clothing, millinery and fur trades, leather goods, jewellery, and cigar manufacture it is 18 months. Six months' experience is required in the hotel and catering industry before the full minimum is payable, nine months for telephone and telegraph operation and two years in the personal service occupations. Girls under 18 must be paid the rate for experienced workers on reaching the age of 18 after 18 months' experience in offices, 21 months in the mercantile industry and two years in beauty shops and laundries. A laundry worker must be paid the rate for experienced workers after one year if she has reached the age of 18.

Under the Male Minimum Wage Act, lower rates are fixed for those under 21. Such employees are limited to 10 per cent of the total number in shipbuilding, 15 per cent in the fruit and vegetable industry, 33⅓ per cent in woodworking and 40 per cent in household furniture manufacture. In the mercantile industry the minimum rate for those under 21 varies with the age, the highest rate being payable after three years' experience if the employee is over 18 but under 21 years of age. Employees over 21, but under 24, are required to have 18 months' experience before they are entitled to the full minimum rate.

For all female employees but janitresses, the minimum weekly rate applies to a specified number of hours. In the mercantile industry, beauty shops, hotel and catering industry, elevator operation, laundries, etc., and in the fishing industry, the rates for female workers apply to a week of 40 hours or more. In factories and in dressmaking, fur-sewing, etc., the specified number of hours is 48, in offices 37½ and in theatres and places of amusement 36. Hourly rates are fixed for fruit and vegetable packing and canning.

Special hourly rates for part-time work for female workers are fixed at 35 cents for experienced workers in the mercantile industry, 25 to 35 cents for inexperienced and from 20 to 30 cents for girls under 18. In factories the part-time rate is 29½ cents; in beauty shops and in hotels and catering, 37½ cents and 27 to 35 cents for experienced and inexperienced respectively; 30 cents in theatres, etc., 40 cents and 30 to 37½ cents in offices and 28½ cents in laundries. In most cases the employee must be paid for at least four hours' work.

In road transport, shops and for elevator operators and barbers, where minimum weekly rates are set for male workers, the rates apply also to a specified number of hours and part-time work is required to be paid

at a higher rate. For goods transported by road, for bus drivers, barbers and elevator operators, the part-time rate applies to a week of less than 40 hours and in the mercantile industry to a week of less than 37½ hours. A minimum hourly rate of 45 cents is fixed for part-time workers in road transport and for barbers and 50 cents for bus drivers in Victoria, Esquimalt, Oak Bay and Saanich. In the mercantile industry part-time rates range from 15 to 40 cents an hour, according to age and experience.

The Hours of Work Act limits working hours for both male and female employees in practically all the establishments covered by the Minimum Wage Orders to eight a day and 48 a week except when the Board of Industrial Relations makes special regulations permitting longer hours for some classes or at certain seasons. No overtime rates have been established for female workers except in the fruit and vegetable industry and for telephone and telegraph operators who must be paid time and one-half after eight hours a day and 48 hours a week up to 56 hours which is the maximum for emergencies. This does not apply to operators customarily on duty from 10 p.m. to 8 a.m. who may work 10 hours a day instead of eight. In the canning and packing of fruits and vegetables, the regular minimum hourly rate applies to a 10-hour day. For the next two hours, 45 cents must be paid to at least 90 per cent of the female workers and 37½ cents to the others. After 12 hours' work these minimum rates are 60 and 50 cents an hour. In tomato canneries, the first two hours of overtime have a minimum rate of 40 cents for at least 90 per cent of those employed and 37½ cents for the others. For subsequent hours the rates are 54 cents and 50 cents for these two groups.

Overtime rates for males are fixed for first-aid attendants and in transport and the fruit and vegetable industry. In the last mentioned, for the first two hours in excess of 10 hours a day, males over 21 and those under 21 years of age must be paid at least 57 cents and 42 cents an hour respectively. For longer hours, the minimum rates are 76 and 56 cents for these classes. The special rates for overtime in tomato canning for the same hours are 52 and 37½ cents with 70 cents and 50 cents the minimum hourly rates after the twelfth hour. First-aid attendants for time in excess of their regular hours and taxicab drivers working more than 10 hours a day must be paid for such time at the rate of 50 cents and 45 cents an hour respectively. Bus drivers in the towns named above have an overtime rate of 67½ cents an hour for all work after nine hours in a day or 50 in a week. In certain other branches of the road transport industry time in excess of 50 hours must be paid for at rates varying from 40 to 60 cents an hour but the hours that may be worked are limited to 54 a week.

Deductions for board and lodging for females in the hotel and catering industry and for male and female elevator operators may not exceed $4 per week for 21 meals, $2 per week for lodging or 25 cents per meal. During the off-season, females employed in the hotel and catering industry in summer resorts in unorganized territory may be paid a minimum of $25 per month together with room and board instead of the weekly rate if such arrangement is approved by the Board of Industrial Relations. A maximum of $1.25 per day for board and lodging is permitted to be deducted from the wages of men in the sawmill and logging industry in some districts.

In the case of janitors, where free living quarters are not provided, the maximum rent that may be charged is $20 or $25 according to the size of the apartment and deductions for gas and electricity may not exceed $4 per month.

All other janitors	.37½

Wages and Hours of Labour Under Collective Agreements and Schedules of Wages and Hours Made Obligatory by Orders in Council in Certain Provinces

In certain provinces, legislation provides that the wage rates and hours of labour agreed upon by representatives of employers and workers in a trade or industry for a locality, district or the whole province may be made obligatory on all employers and employees concerned by Order in Council on the recommendation of the Minister in charge of the administration of labour legislation. Such rates of wages and hours of labour are noted below and are applicable to both male and female workers unless otherwise stated.

NOVA SCOTIA

Industrial Standards Act

This Act, which was summarized in the Labour Gazette, July, 1936, page 604 with amendments in Labour Gazette, August, 1937, page 861 is similar to the Industrial Standards Act of Ontario which is summarized below. It is, however, restricted to the building and construction industry in Halifax and Dartmouth, excluding government and municipal employees and any employee performing temporary work the total amount of which does not exceed $25. Five schedules were in effect by Orders in Council under this Act at the end of the year 1938:

Construction

The wage rates and hours so in effect are shown below. Provision is made in all schedules for extra pay for overtime.

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN HALIFAX AND DARTMOUTH, NOVA SCOTIA.

—	Minimum hourly wage rate	Hours per week
	$	
Bricklayers	.97½	44
Carpenters	.65	44
Electrical workers	.85	44
Plumbers and Steamfitters	.85	44
Plasterers	.75	44

QUEBEC

Collective Labour Agreements Act

The text of this Act, which amends the Workmen's Wages Act, was summarized in the Labour Gazette, May 1938, page 503 and the Workmen's Wages Act in the issue of July, 1937, page 745. Under this Act any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. Any Order in Council may be amended or revoked by the Lieutenant Governor in Council at any time. They do not apply to the Government of Quebec or its departments or services, nor to work done by a third party for the Government under a contract providing for a scale of minimum wages. The agreements under this Act are enforced within the industry itself by joint committees composed of representatives of both employers and employees. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937; proceedings under the Workmen's Wages Act in the issues from

July, 1937, to July, 1938; proceedings under the Collective Labour Agreements Act in the issues beginning July, 1938.

The wages and hours in effect at the end of 1938 under agreements so made obligatory in various industries in the whole or part of the Province are noted below.

Mining, Non-ferrous Smelting and Quarrying

Iron Oxide Mining.—All mines producing iron oxide (ochres) in the province of Quebec are covered by an obligatory agreement. (Labour Gazette, December, 1937.) Minimum hourly wage rates are 32½ cents for workers working in the mines, 35 cents for those working in the establishments and 42½ cents for millers. Hours are limited to 48 per week.

Granite, Marble and Stone Quarrying

See below under "Manufacturing: Non-Metallic Minerals, etc."

Manufacturing: Vegetable Foods, etc.

Baking Industry.—Agreements approved by Orders in Council as to wages and other working conditions in this industry provide for the following minimum weekly wage rates and maximum hours: Quebec City and Levis—bread bakers $20, foremen bakers $23, apprentices $7, salesmen $16. Hours for bakers and delivery workers 65 per week (Labour Gazette, December, 1937 and April, 1938). Three Rivers—bakers $16 to $23, apprentice bakers $6 to $12; delivery salesmen $9 plus commission (Labour Gazette, March, 1938). Granby—bakers $15 to $22 (Labour Gazette, October, 1938). Montreal—bakers $18 to $22, helpers $15, apprentices $10 to $12, with a 60 hour week; salesmen $15 (Labour Gazette, February, 1937). Sorel*—bakers $12 to $18 with a 60 hour week; salesmen $12 (Labour Gazette, September, 1937). Hull—bakers $12 to $28, pastry cooks $20, apprentice bakers $6 to $12; apprentice pastry cooks $6 to $15; hours 60 per week; salesmen $12 (Labour Gazette, June and October, 1935 and October, 1938).

Manufacturing: Boots and Shoes

Shoe Manufacturing.—The agreement covers both male and female employees in the boot and shoe manufacturing industry throughout the province (Labour Gazette, October, 1937, March, June and December, 1938). Employees are divided into six trade classes according to the skill required for the operation. Minimum hourly wage rates for each class and for the apprentices to the first four classes are as follows:

Class	Minimum Wage Rate Per Hour Zone I	Zone II	Zone III
I	·55	·52½	·48
Apprentice...	·33	·31	·29
II	·45	·42½	·39
Apprentice...	·26	·25	·23
III	·35	·33	·31
Apprentice...	·21	·20	·18
IV	·25	·24	·22
Apprentice...	·18	·17	·16
V	·18	·17	·16
VI	·13	·12½	·11½

Minimum wage rates for women or men who take the place of women employees on an operation not mentioned in the classified list of operations are as follows:

	Minimum Weekly Wage Rates Zone I	Zone II	Zone III	Zone IV
20% of female employees..	$ 7.00	$ 6.00	$ 6.00	$ 6.00
15% of female employees..	9.00	8.00	7.50	7.00
65% of female employees.	11.00	10.00	9.50	9.00

Manufacturing: Fur and Leather Products, etc.

Fur Manufacturing Industry.—Orders in Council for this industry were summarized in the Labour Gazette, September and October, 1938. For the city of Quebec the following minimum wage rates are payable for a week of 48 hours: in the city of Quebec—first class cutters $27, second class cutters $24, third class cutters $18, journeymen blockers $20, female operators and finishers $14 for first class, $12 for second class. For the Island of Montreal and within 50 miles of it, minimum weekly wage rates in industrial and wholesale establishments (excluding the fur dressing and dyeing industry) are: first class cutters $36.50, second class $29.50; first class male operators $29.50, second class $21.50; first class female operators $21.50, second class $16.50; first class finishers $19.50, second class (female) $15.50; first class apprentice cutters, blockers and trimmers $22, second class $14; first class examiners $25.50, second class $14.00, second class employed by trimmers $14. The hours are 40 per week in the Island of Montreal and within 10 miles of it and $48 in the rest of the Montreal district. For the Island of Montreal and within 50 miles of it, minimum hourly wage rates in retail establishments are: qualified cutters 95 cents for Class A, and 80 cents for class

*This agreement was repealed by Order in Council January 16, 1939.

B, operators 75 and 60 cents, finishers 70 and 55 cents, blockers 55 and 35 cents, female operators 55 and 40 cents, female finishers 50 and 40 cents respectively; in the retail establishments of the Montreal district which are outside the Island of Montreal and located in towns of less than 25,000 population, however, these minimum rates may be 25 per cent less.

Glove Manufacturing (Fine Gloves) Province of Quebec.—The agreement approved by Order in Council for cutters in this industry covers the entire province (Labour Gazette, June, 1937). Hours are limited to 49 per week. Minimum wages are fixed on a piece rate basis. In towns of population of less than 15,000 the minimum piece rates are 15 per cent lower than in the larger centres.

The agreement for operators and blockers of fine gloves was summarized in the Labour Gazette, March, 1938, and also covers the whole province. Hours are 49 per week and minimum wages are fixed on a piece work scale, except for apprentices who must be paid a minimum of $7 per week during first six months and $9 during second six months.

Glove Cutters (Work Gloves) Province of Quebec.—This agreement was summarized in the Labour Gazette, August, 1937. Maximum hours are 44 per week and minimum wages are fixed on a piece work scale.

Manufacturing: Textiles, Clothing, etc.

Men's, Boys', Youths', Children's and Juveniles' Clothing Industry, Province of Quebec.—This industry throughout the Province is covered by an agreement made obligatory by Orders in Council, the last one coming into effect November 20, 1937 (Labour Gazette, December, 1937). (The manufacture of shirts, overalls, mackinaw coats, etc., is not included in the agreement.) The province is divided into three zones: Zone I is the Island of Montreal and the area within 10 miles of its limits, Zone II is the area within 75 miles of the boundaries of Zone I, Zone III in the rest of the province. The hours are 44 per week in Zone I and 48 hours in Zones II and III; overtime pay is time and one-half in Zone I and time and one-quarter in Zones II and III.

Piece work rates may be fixed instead of hourly rates, provided that such rates do not yield less than the hourly rates established in this agreement.

In the coats, pants and vests departments, class AA consists of skilled cutters in all three departments; class A, of head operators and shape sewers or underbasters by machine in the coat department and pocket makers and tape sewers in the vest department; class BB, of pocket makers and skilled trimmers in the coat department, back and front pocket makers, trimmers and seamers in the pants department and skilled trimmers and second operators in the vest department; class B, of fitters and off-pressers in the coat department, leg pressers in the pants department and off-pressers in the vest department; class C, of edge basters, second basters, shapers and top collar makers in the coat department and lining stitchers in the pants department; class D, of examiners, joiners, second operators, lining makers and pocket tackers in the coat department, lining sewers and top pressers, cloth waistband sewers in the pants department, fitters in the vest department; class EE, of steam machine pressers and underpressers in the coat department and general underpressers in the vest department; class E, of choppers, lining basters, machine edge basters and undercollar basters in the coat department, pocket makers and outside seamers on boys' shorts and bloomers and juvenile pants, lining sewers and attachers on boys' shorts and bloomers and juvenile pants in the pants department; class FF, of underpressers in the pants department; class F, of armhole basters, buttonhole makers, lapel makers, sleeve makers in the coat department, buttonhole makers, fitters, inside seamers on boys' shorts and bloomers and juvenile pants and trimming makers in the pants department, buttonhole makers, basters, lining makers and vee sewers in the vest department; class G, of bottom of collar and leaf of collar fellers, canvas basters, canvas makers, coat finishers, general hands, inside coat tackers, button sewers in the coat department, button sewers, examiners, finishers, fly makers, loop makers, pocket sergers and tackers in the pants department, brushers, button sewers, examiners, finishers, general hands, ticket sewers in the vest department; class H, of buttonhole tackers, fellers of bottom of sleeve linings, pocket closers, sleeve lining tackers and basters, ticket pocket makers in the coat department, buttonhole tackers and cleaners in the pants department and buttonhole tackers and cleaners in the vest department; class K, of basting pullers (male).

Women's Cloak and Suit Industry, Province of Quebec.—The Order in Council approving the agreement for this industry governs conditions throughout the Province in the production, for women and girls over 14 years, of cloaks, coats, suits and of woollen skirts (Labour Gazette, October, 1937). The hours are 40 per week.

The following minimum wage rates apply to these occupations:—

Class	Wages per hour
	cents
Fully skilled cutters	80
Semi-skilled cutters	55
Trimmers	60
Fur tailors	65
Assistant fur tailors	44
Button sewers, general hands and examiners	34

In the following crafts, work may be done on a piece work or time work basis, but in either case the following minimum wage rates will apply:—

Class	Wages per hour
	cents
Skilled operators (male)	80
Skilled operators (female)	64
Section operators (male or female)	80
Top pressers	80
Machine pressers	80
Under pressers	75
Piece pressers	45
Lining makers	42
Finishers	42
Skirt makers	42
Machine basters, hand basters and special machine operators	44
Semi-skilled operators (male)	55
Semi-skilled operators (female)	49½

The Joint Committee may determine a special rate for employees whose production is under normal.

Apprentices are limited to 5 per cent of the number of those employed in an establishment. Apprentice operators, pressers and cutters to start at $7 per week, with advances every six months to a minimum of $22 at the end of three years.

Dress Cutters, Province of Quebec.—The obligatory agreement for this trade (Labour Gazette, October, 1936), covers throughout the province of Quebec, the cutting departments of manufacturers, contractors, jobbers and retailers engaged in the production of women's and misses' dresses, dress ensembles, blouses, etc., and all separate skirts not included in the cloakmakers' agreement, but does not include smocks, aprons, uniforms, etc. Hours are limited to 44 per week. Minimum weekly wage rates: cutters $30, choppers $20, apprentices $15. The number of apprentices is limited to 20 per cent of total employees.

Men's Hat and Cap Workers, Montreal District.*—This industry, which includes the manufacture of cloth hats and caps for men, boys and children over two years of age, is governed by an agreement made obligatory on the Island of Montreal and within 50 miles of its limits as well as the city of Hull (Labour Gazette, January, August and November, 1938). Minimum wage rates for a 44 hour week are: cutters $22, operators $20, blockers $15.40, lining makers $12.50.

Women's and Children's Millinery Industry, Montreal and District.—The agreement approved by Order in Council for this industry (Labour Gazette, August, 1935, March, 1936, June, 1937, and June, 1938) covers the Island of Montreal and an area within a distance of 50 miles from its limits. Hours are 40 per week. Wages per week for qualified operators are: hand blockers $32; straw operators, fabric operators, blockers and cutters $29, drapers $20, draper-trimmers $17, trimmers $15. Workers not yet qualified may be paid at rates fixed by the Joint Committee until they are qualified, but not more than 25 per cent of employees in any particular class of work in any establishment may be paid at less than the above minimum rates.

Manufacturing: Printing and Publishing

Printing Trades, Quebec.—The Order in Council extending the latest agreement in the printing trades in the judicial districts of Quebec, Beauce, Montmagny, Rimouski and that part of the St. François district not in the Montreal district was summarized in the Labour Gazette, September, 1938. Establishments are divided into three classes: Class A covers daily newspapers and three other printing firms; class B, plants equipped with one or more composing machines, linotype or monotype, one or more cylinder presses working more than 20 hours per month and book binding establishments using motive power; class C, establishments having only non-automotive feeding presses and having neither composing machines nor cylinder presses. Hours in class A and class B establishments are 46 per week; in class C, 46 hours; for night work 43 hours per week. Weekly wage rates: journeymen typographers $30.50 in class A and $28 in class B; journeymen pressmen, stereotypers, bookbinders, rulers, photo engravers and photo-litho apparatus operators $26.50 in both class A and class B establishments; typographers, pressmen and bookbinders in class C, $22.08. Journeymen working on night shifts to receive $2 per week over the day scale.

For the judicial districts of Chicoutimi, Lake St. John, Roberval and Charlevoix-Saguenay, the Order in Council (Labour Gazette, November, 1936) provides for both newspaper and job printing shops a 40-hour week. The minimum wage rate for journeymen typographers, pressmen, bookbinders and stereotypers is 52 cents per hour, with a 10 per cent reduction on this rate for work in municipalities of a population of less than 2,000.

Printing Trades, Montreal and District.—The Order in Council covering the printing trades with the exception of work on daily newspapers and of certain work in job offices (duplicating, etc.), in Montreal and district, which was summarized in the Labour Gazette, April, 1938, includes in its jurisdiction the Island of Montreal and the area within 100 miles of its limits. It is divided into three zones, of which: Zone I comprises the Island of Montreal and within 10 miles of its limits; Zone II the municipalities of Three Rivers, Sherbrooke, Sorel, St. Hyacinthe, Valleyfield, Joliette, Granby, Saint John d'Iberville, Laprairie, St. Jerome and Hull and within 2 miles of their limits, except establishments publishing and printing one or more weekly newspapers; Zone III the remainder of the district, and establishments owning and printing a weekly or semi-weekly newspaper outside the Island of Montreal.

Hours are 45 per week in zone I and 48 per week in zones II and III. Minimum hourly wage rates for certain classes in zone I: compositors and machine keyboard operators, castermen, journeymen pressmen on rotary presses for paper rolls less than 36 inches wide, machines for power printing, die embossing, etc., flat bed cylinder presses of one colour, bindery journeymen, 70 cents during year 1938, 75 cents during 1939 and 80 cents during 1940; corresponding rates in zone II are 60 cents in 1938, 64 cents in 1939 and 68 cents in 1940; in zone III, 56 cents in the year 1938, 60 cents in 1939 and 64 cents in 1940. Minimum wage rates for journeymen pressmen on rotary presses, for paper rolls 36 inches wide or more, tubular rotary presses, rotary presses sheet fed, two colour rotary presses and perfecting presses are 4 or 5 cents higher than the above scale; for journeymen pressmen on platen presses and multigraphing machines and for feeders on all the above machines the rates are from 9 to 14 cents per hour lower than the above minimums. Minimum hourly rates for bindery girls are 28 cents in zone I, 24 cents in zone II and 23 cents in zone III.

* This agreement was repealed by Order in Council, January 16, 1939, but application was made and published in the *Quebec Official Gazette*, January 28, 1939, for the extension of a similar agreement to apply to the whole province.

Lithographing Industry, Province of Quebec.—This industry is under an agreement made obligatory throughout the province (Labour Gazette, April, 1938). Regular hours are limited to 45 per week for both day and night work. Minimum hourly wage rates for day work: artists 85 cents for poster letterers, $1 for letterers and engravers (reproducers only), $1.10 for poster crayons, $1.20 for process (colour correctors); camera operators —process $1, commercial 56 cents; other operators 52 and 90 cents; transferrers 85 cents and $1, provers $1, stone and plate preparers 53 and 65 cents, journeymen pressmen from 58 cents to $1.35 varying with type of press, press feeders 32 to 60 cents varying with type of press and with experience; press helpers 30 cents.

Manufacturing: Miscellaneous Wood Products

Furniture Industry, Province of Quebec.—The Order in Council making obligatory the agreement in this industry throughout the province is summarized in the Labour Gazette, December, 1937, February and October, 1938. The province is divided into four zones: zone I is the Island of Montreal; zone II, municipalities of a population of 3,000 or more in the rest of the province except the county of Chicoutimi and establishments with 50 workers or less in any part of the province outside of zone I; zone III is the rest of the province; zone IV covers the manufacture of summer furniture made of wood assembled by nuts and bolts and using textiles in their manufacture. Hours are limited to 55 per week except for shippers, maintenance and repair men.

MINIMUM HOURLY WAGE RATES IN THE FURNITURE INDUSTRY

Female workers receive the same wage rates as men for the same work, and are included in the general wage schedule shown above.

Manufacturing: Metal Products

Aluminum Smelting Industry.—This industry, consisting of plants at Arvida and Shawinigan Falls only, is governed by an agreement for each of the two plants (Labour Gazette, November, 1937) and provides as regular hours for an 8 hour day, averaged over the regular working days of each calendar month.

Minimum hourly wage rates for a few of the many classes of workers at Arvida: bricklayers 75 cents, machinists 65 cents, mechanics (general maintenance) 60 cents, millwrights 60 cents, millwrights' assistants 50 cents, electricians 60 cents, pipefitters 55 cents, carpenters 55 cents, head potmen's assistants 55 cents, potmen 49 cents, carbon changers 51 cents, cranemen 47 cents, analysts from 35 cents during first year to 45 cents during third year, construction labourers 40 cents, general labourers 45 cents.

Minimum hourly wage rates for a few classes of workers at Shawinigan Falls: head potmen's helper 54 cents, potmen 48 cents, tapper 52 cents, cranemen 48 cents, wire drawer 48 cents, pourer, catcher, electrician and millwright 46 cents, labourer and sweeper 40 cents.

Ornamental Iron and Bronze Industry, Quebec and Montreal Districts.—In the city of Quebec and neighbouring counties (Labour Gazette, December, 1937), hours are limited to 50 per week for shop work. Minimum hourly wage rates for this district for shop work are 50 cents for mechanics, 40 cents for adjusters and 30 cents for helpers in the city of Quebec and Levis and within 10 miles of their limits and in Thetford Mines; in the rest of the district 42½ cents for mechanics, 34 cents for adjusters and 25½ cents for helpers.

In the Island of Montreal and neighbouring counties (Labour Gazette, August and December, 1937 and October, 1938), hours are limited to 44 per week for both shop and erection work. Minimum hourly wage rates for this district are: for shop work 66 cents for mechanics, 55 cents for fitters and 45 cents for beginners to 26 cents after one year. 66 cents, erectors' helpers 50 cents.

Can, Container and Metal Utensil Manufacturing Industry.—The agreement made obligatory for this industry throughout the province was summarized in the Labour Gazette, November, 1938. Hours are 48 per week for all except stationary engineers and firemen who may work up to 54 hours at the regular rate. Minimum hourly wage rates for general employees—men (labourers, sweepers, janitors, truckers and generals helpers) 30 cents during first six months, 32½ cents thereafter; other men employees (production operators, can pilers, packers, etc.) 32½ and 35 cents, shippers 40 cents; boys (16 to 20 years) from 20 cents for beginners to 26 cents after one year, female employees from 17 cents for beginners to 26 cents after one year. Minimum hourly wage rates for certain specialized employees—machine and tool setters 37½ cents for beginners to 42½ cents after one

year, maintenance men on machines 40 to 45 cents, picklers, galvanizers and tinners' helpers 40 cents, galvanizers' and tinners' principal attendants 50 and 55 cents, building and maintenance men 50 cents, painters 45 and 50 cents, welders 50 cents, deep draw press operators 42½ and 45 cents. Minimum hourly wage rates for certain mechanical employees: mechanics skilled on a special machine or working on mechanical work but not qualified journeymen 50 cents, millwrights 55 and 60 cents, journeymen machinists including toolmakers, diemakers and general machinists 65 and 70 cents, journeymen lithographers 80 and 85 cents, male office employees $15 to $20, female office employees $12 to $15.

Passenger, Freight and Industrial Car and Bus Manufacturing Industry, Montreal.—The agreement in this industry covers the Turcot and Dominion plants of the Canadian Car and Foundry Company Ltd. (Labour Gazette, October and November, 1938). Hours are 50 per week except power house engineers and firemen, locomotive engine crews and sprinkler and heating system attendants. The wage schedule provides for a minimum wage for the majority of skilled trades of between 50 and 70 cents per hour, for helpers 40 to 50 cents and for labourers 35 and 40 cents. Among the minimum hourly wage rates are: blacksmiths 60 to 70 cents, die and tool makers 70 cents, machinists 65 to 80 cents, plumbers and pipefitters 65 and 75 cents, welders 60 to 75 cents, reamers 50 cents, riveters and caulkers 70 cents, carpenters 60 and 70 cents.

Manufacturing: Non-metallic Minerals, Chemicals, etc.

Granite Marble and Stone Industry, Province of Quebec.—The agreement for this industry includes both quarrying and cutting throughout the Province (Labour Gazette, June and September, 1937, and December, 1938).

Maximum hours are: for granite cutting, a 45 hour week for granite cutters, 44 hours for blacksmiths working in granite cutting plants, 50 hours for blacksmiths in quarries; all other trades including surface machine operators and quarrymen, 50 hours per week; for marble cutters, stone cutters and their apprentices, a 44 hour week; for all others engaged in the marble and stone cutting industry, 55 hours per week.

Minimum hourly wage rates for certain classes of work in the granite industry: granite cutters 70 cents on the Island of Montreal, and in cities of Quebec, Three Rivers and Sherbrooke and 60 cents in the rest of the province; blacksmiths, machine polishers, surface machine operators in the granite industry 50 cents, carborundum machine operators, crane operators in granite industry 45 cents, granite quarrymen 40 cents, labourers 30 cents.

Certain minimum hourly wage rates in the marble industry: marble cutters 60 cents, apprentice cutters from 25 to 50 cents, carborundum machine operators 50 cents (apprentices 35 to 45 cents), millwrights 40 cents, sawyermen and cranemen 40 cents, hand polishers 35 cents.

Certain minimum hourly wage rates in the stone industry: stone cutters 60 cents, apprentice cutters 20 to 50 cents, planermen 45 cents, apprentice planermen 35 and 40 cents, carborundum machine operators 40 cents, stone turners 45 cents, sawyermen 40 cents, cranemen 40 cents, helpers 30 cents.

Transportation and Public Utilities: Water Transportation

Longshoremen, etc., Montreal and Sorel.—At Montreal, agreements cover longshoremen and shipliners employed in loading and unloading and shiplining of ocean-going vessels and to checkers and coopers for such vessels (Labour Gazette, December, 1938). Hourly wages for longshoremen and shipliners are 77 cents for day work, 87 cents for evening work and 97 cents for night work, with 15 cents per hour extra for longshoremen working on certain cargoes.. Hourly wages for checkers are 64 cents for day work and 74 cents for night work; for coopers 63 cents for day work and 73 cents for night work.

Another agreement* at Montreal covered longshoremen, checkers and coopers loading and unloading vessels engaged in inland and coastal navigation (except the handling of grain) which provides for wage rates of 49 cents per hour for day work and 51 cents for night work (Labour Gazette, July, 1938).

Coal handlers at Montreal are governed by an agreement (Labour Gazette, June, 1938). Hourly wages for coal handlers engaged in trimming and handling of coal in bulk cargoes in vessels are 92 cents for day work, $1.02 for evening work and $1.12 for night work. For those handling coal on the docks and in yards next to discharging plants used for loading or unloading vessels the wage schedule includes a minimum of 40 cents per hour for labourers, 45 cents for mechanics and repair men (iron), 50 cents for boiler mechanic, 48 and 56⅔ cents for crane runners, 44 cents for firemen.

At Sorel (Labour Gazette, August, 1937, July, September and November, 1938) ocean, inland and coastal navigation are included in the agreement which provides for the following hourly wage rates: for loading grain 50 cents for day work, 60 cents for evening work

* This agreement was repealed by Order in Council from January 1, 1939.

and 70 cents for night work; for unloading grain out of lake and ocean steamers into the elevator 45 cents for day work, 48 cents for evening work and 55 cents for night work; for handling dynamite 60 cents; for general cargo 50 cents.

Transportation and Public Utilities: Local Transportation

Taxicab Service and Trucking, Sorel.*—The agreement made obligatory for these workers in the city of Sorel (Labour Gazette, August, 1937) provides for a maximum of 10 hours work per day, 60 per week, with no work for truck drivers on Sundays or holidays. Taxi drivers to be paid 25 per cent of money taken in, and truck drivers 40 cents per hour, with a minimum of $15 per week for both whatever the hours worked. The minimum weekly wage for private chauffeurs is $18.

Trade

Retail Store Employees, Quebec City.—This agreement applies to most of the retail trade except food, drug, jewellery and hardware stores (Labour Gazette, January, 1939). Hours are 49¼ per week. Minimum weekly wage rates for men clerks: 60 per cent to be paid at least $20, another 25 per cent $15, and the rest $8; corresponding rates for women clerks are $11.50, $9.60 and $7.25; deliverymen $18. Rates are also set for department heads, floor walkers, messengers, etc.

Dairy Employees, Quebec City.—The agreement for dairy employees in Quebec City and Levis (Labour Gazette, July, 1938) provides for hours of 57 per week for inside employees in winter and 60 per week in summer months and 65 per week for delivery work. Minimum weekly wages: foremen $25; testers, ice cream and butter makers, shippers, $18; labourers $15; salesmen on delivery $17; helpers on delivery $8 and $12; deliverymen $16.

Retail Store and Hotel Workers, Donnacona.—These workers are under an agreement (Labour Gazette, June, 1938) which provides a 60-hour week for male employees and 54 hours for female employees, except those employed in offices and hotels; hours for office employees, 40 per week. Minimum wages for all except office and hotel employees: male workers from $6 per week for beginners with no experience to $12 after three years' experience; female workers from $6 for beginners to $8 after two years' experience. For female hotel employees $16 to $25 per month in addition to board, room and laundry.

Retail Store Clerks and Food Manufacturing Workers, Magog.—The agreement which includes retail store clerks, bakers, butchers, soft drink manufacturing workers, etc. (Labour Gazette, October, 1938, and January, 1939) provides for a 60-hour week in manufacturing establishments, 65 in retail stores, 70 per week in hotels, restaurants, drug stores. Wages: in bakeries from 18 to 29 cents per hour, bakery delivery men 25 cents; in grocery and butcher shops, $15 and $20 per week for butchers, delivery men $15; in soft drink bottling plants $10.80 to $15; in ice storage plants, $15; in retail stores, clerks $8 for beginners to $15; seamstresses in clothing stores $12 for a 48-hour week; in hotels and restaurants 10 to 14 cents per hour.

Grocers and Butchers, Sherbrooke.—These workers are governed by an agreement (Labour Gazette, September, 1938) which fixes hours shops may be open and sets minimum wages of $8 to $15 per week for clerks, 25 cents per hour for extra helpers, and $10 to $12 per week for deliverymen.

Butcher Shops, Sorel.*—An agreement is in effect under an Order in Council for butchers in the city of Sorel and the village of St. Joseph de Sorel. Hours are limited to 48 per week and the minimum wage rate for journeymen butchers is 35 cents per hour; apprentices may be paid 10 cents per hour during first year, 15 cents during second year and 20 cents during third year. (Labour Gazette, August, 1937.)

Service: Custom and Repair

Garage and Service Station Employees.—The agreement for Quebec City, Levis and neighbouring counties (Labour Gazette, June, October and December, 1938) provides for a 54 hour week in garages, repair shops, etc., and a 60 hour week in auto storage, gasoline stations, etc. except that in auto storage stations, gasoline stations, etc., which are open day and night, the night shift may work 72 hours per week. Wage rates for day hours in the cities of Quebec and Levis and within ten miles of them: man in charge of replacing parts $25 per week; mechanic, fitter, machinist, electrician, body man, wheelwright, blacksmith, welder, 45 cents per hour; painter, glazier, upholstery maker, battery man, 40 cents; oiler and vulcanizer 35 cents, nonqualified help 30 cents; apprentices 15 to 30 cents; service men, gas sellers, washermen, etc., 27 cents per hour except for beginners who may be paid 20 cents per hour during first year. Wage rates for day hours in the rest of the territorial jurisdiction are 30 cents

* This agreement was repealed by Order in Council, January 16, 1939.

per hour for qualified workmen, 25 cents for assistants; for gasoline stations, etc., from 10 cents per hour during first year to 25 cents after three years. In garages, repair shops, etc., for work between 6 p.m. and 11 p.m., 10 per cent extra to be paid; for hours between 11 p.m. and 7 a.m., 50 per cent extra to be paid except where there is a double shift when the shift between 6 p.m. and 3.30 a.m. will be paid at 10 per cent over regular rates. A scale of minimum prices which must be paid by customers for each piece of work is included in the agreement.

The agreement for Montreal (Labour Gazette, June, July and November, 1938) includes the Island of Montreal and neighbouring territory. For journeymen and their apprentices the hours and payment for evening and night work are the same as noted above for employees of garages, repair shops, etc., in Quebec City and the hours for other employees of garages and service stations are also the same as in service stations in Quebec City as noted above. Minimum hourly wage rates for the Island of Montreal and immediately surrounding district are: journeymen wheelwrights, electricians, blacksmiths, machinists, mechanics, carpenters, painters, duco polishers —50 cents for first class, 45 cents for second class and 40 cents for third class journeymen, 30 cents for wax polishers; journeymen body men, upholsterers, radiator repairmen and welders—60 cents for first class, 50 cents for second class and 40 cents for third class; service men and night watchmen 25 cents; apprentices to any class except service men, from 10 cents during first six months to 25 cents during third year, apprentice service men 15 cents first year, 20 cents second year. Minimum prices which customers must pay for each piece of work is specified. Hourly wage rates and prices are 15 per cent lower in the part of the territorial jurisdiction not included in the above district.

The agreement for Sherbrooke (Labour Gazette, January, 1939) provides for the same hours as in Quebec City as noted above. Minimum hourly wage rates: journeyman electrician, blacksmith, machinist, mechanic, glazier, automobile painter, body man, upholsterer, radiator repairer, welder—first class 45 cents, second class 40 cents, third class 35 cents; apprentices to these trades from 10 cents during first six months to 25 cents during third year; service men 20 cents, apprentice service men 10 and 15 cents. For work between 7 p.m. and 11 p.m., these rates are 10 per cent higher, and between 11 p.m. and 7 a.m., 50 per cent higher. A scale of minimum prices which must be charged customers is also included.

Blacksmithing.—An agreement for horseshoers and wheelwrights (Labour Gazette, December, 1937) effective in Victoriaville and the counties of Arthabasca, Nicolet, Richmond, Megantic, Wolfe and Drummond provides for qualified workmen a minimum of $12 per week, $2.25 per day; for apprentices $6 per week in first year, $9 during second year.

Shoe Repairing.—Three agreements are in effect by Order in Council. For the Island of Montreal (Labour Gazette, June, 1938), hours are limited to 58 per week, with minimum weekly rates of $16 to $21 for experienced workmen, except for four winter months when the corresponding rates are $13 to $18. For Victoriaville and vicinity (Labour Gazette, September, 1937), hours are as determined by municipal by-law. Minimum wage rates are $10 per week for finishers and $12 for other experienced workers, except in four winter months when the corresponding rates are $7.50 and $8. For Sherbrooke (Labour Gazette, July, September and November, 1938), the agreement provides for minimum weekly wage rates of $10 to $15 for experienced workmen with hours set during which shops may be open.

Service: Business and Personal

Barbers.—Agreements made obligatory by Orders in Council in the barber or the barber and hairdresser trades cover many districts. The hours vary in the several localities, each agreement specifying the time shops are to be open with periods off for each employee. Piece or job rates for each piece of work in the barbering, hairdressing, manicuring trades, etc., are specified in the agreements. For barbers employed by the week, the agreements specify a minimum weekly wage and in addition provide that barbers receive a certain percentage of their individual receipts above a specified amount taken in during the week. The following minimum wage rates for barbers and hairdressers are payable in the following centres and in their surrounding districts:—

MINIMUM WEEKLY WAGE RATES FOR BARBERS AND HAIRDRESSERS

Locality	Barbers		Female Hairdressers

(a) Towns of Chicoutimi, Arvida, Bagotville, Port Alfred, Grand-Baie, Jonquière, Kenogami and Ste. Anne de Chicoutimi.

(b) Journeymen barbers $12 during first year, $15 with two years' experience, plus 10 per cent of gross receipts.

(c) Or $20 without commission.

(d) And Cap de la Madeleine and Louiseville.

(e) Commission of 70 per cent of receipts over $20.

(f) And St. Therese de Blainville, Terrebonne, St. Janvier, Ste. Rose, Shawbridge, New Glasgow, St. Canut, Ste. Monique, Ste. Scholastique, Ste. Sophie de la Corne, St. Lin, St. Martin de Laval, St. Augustin, Ste. Anne des Plaines, St. Eustache and St. Hippolyte.

(g) Commission of 60 per cent of receipts over $25.

(h) 65 per cent of receipts over this amount.

Tavern Employees, Quebec City.—This agreement (Labour Gazette, June and July, 1938) provides for a 60-hour week and for minimum weekly wage rates of $18 for barmen, $16 for experienced waiters and $12 to $14 for beginners.

Funeral Undertakers, Montreal.—This agreement (Labour Gazette, January, 1939) provides for a working week of 70 hours except the automobile mechanics and service men who are governed as to wages and hours by the agreement covering garage employees. Minimum wage rates are: embalmers $25 per week if employed by the week or $5 for each embalming; extra employees 40 cents per hour, with a minimum of $1.50 per call.

Construction

Building Trades.—The agreements in the building trades in various sections of the province, which have been made obligatory by Orders in Council, have been summarized in the Labour Gazette during 1934, 1935, 1936, 1937 and 1938. In some cases the agreements cover several counties as well as the principal cities and towns. The minimum wage rates for the principal trades, which were in effect at the end of the year 1938 under Orders in Council are shown in the accompanying table.

The agreements in many cases also specify minimum weekly rates, lower than the standard hourly rates, for workmen permanently employed on maintenance work for religious, charitable or educational institutions, hotels, office buildings and manufacturing or industrial establishments. These weekly rates are not shown in the table. Minimum wage rates for apprentices which are set in many of the agreements are also omitted from this table.

* Urban wage rates are usually payable in rural sections on contracts exceeding specified amounts.

(a) The municipalities of Chicoutimi, Jonquière, Kenogami, Saint Joseph d'Alma, Rivière du Moulin, Ville Racine, Ile Maligne, River Bend, Arvida, Bagotville, Port Alfred, Grande Baie, Desbiens Mills and within a radius of two miles of their limits.

(b) And 24 other specified municipalities.

(c) 45 cents in Drummondville, 50 cents in Magog and Granby.

(d) And contracts of $5,000 or more in County of Bagot.

(e) With the authorization of the Joint Committee, *bona fide* contractors, licensed and recognized as such, may pay 5 cents per hour less to carpenters and joiners and 10 cents per hour less to bricklayers, masons and plasterers.

(f) And Verdun, Westmount, Outremont, Hampstead, Montreal East, Montreal West and Mount Royal.

(g) Since August 1, 1938, these rates for Arthabasca County have been in effect under Ordinance No. 12 of the Fair Wage Board, instead of under the Collective Labour Agreements Act.

ONTARIO

Industrial Standards Act

The Industrial Standards Act of Ontario, the text of which was printed in the LABOUR GAZETTE, June, 1935, page 534, with amendments in the issues of May, 1936, page 410, May, 1937, page 505, and May 1938, page 501, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene or authorize an officer to convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force "during pleasure" or for the period, not exceeding twelve months, stipulated in the schedule, and thereupon such schedule is binding upon every employee and employer in such industry in the whole or any part of the Province designated by the Minister and is published in *The Ontario Gazette*. The Industry and Labour Board has authority to enforce the provisions of the Act and of the regulations and schedules. The following is a summary of the wage rates and hours in effect under these Orders in Council at the end of the year 1938.

Logging

LOGGING INDUSTRY.—Schedules of wages for this industry were effective by Orders in Council in four districts at the end of 1938, namely the Massey Zone (vicinity of Sudbury), Timmins Zone, Port Arthur Zone and the Rainy River Zone (LABOUR GAZETTE, May, August and December, 1938). For those working on a time rate basis, the minimum monthly rate for cookees and kitchen staff is $40 per month; for general bushmen the minimum is $42.50 and for loaders $45, in all four zones; the minimum rates for teamsters are $50 to $55 in all four zones; for river drivers, the rate is $2.60 per day except in the Rainy River zone where it is $3. Free board and lodging must be provided by employers to all workers employed on the time rate basis. For those employed on piece rates, the prices are set in all zones and the maximum amount which the employers may charge each employee working on piecework for his board is 85 cents per day in the Timmins, Port Arthur and Rainy River zones and 75 cents in the Massey zone.

Manufacturing: Vegetable Foods

BAKING INDUSTRY.—One schedule is in effect (LABOUR GAZETTE, January, 1938), which provides for the city of Ottawa and immediately adjacent area a 56 hour week, with the following minimum weekly rates: $23 for cake makers, doughmakers, machine operators, bench hands and ovenmen; $20 for salesmen, drivers and checkers, $14 to $20 for helpers.

Manufacturing: Tobacco and Liquors

BREWING INDUSTRY, PROVINCE OF ONTARIO.—A schedule is in effect throughout the Province (LABOUR GAZETTE, July, 1935, and September, 1936), and provides for a regular working week, between April 1, and September 30, of 50 hours, except transport drivers whose week is 54 hours. Between October 1, and March 31, the regular working week is 45 hours. Minimum weekly wage rates are: coopers $30; truck drivers $25; helpers $22.50; bottlers operating machines $24.50; other bottlers $22.50; watchmen, fermenting room and cold storage, brew house, washhouse $24.50.

Manufacturing: Textiles and Clothing

MEN'S, BOYS' AND YOUTHS' CLOTHING, PROVINCE OF ONTARIO.—The schedule which regulates this industry throughout the province (LABOUR GAZETTE, October, 1936), applies to the manufacture of men's, boys' and youths' pants, coats, vests and suits, etc., except work shirts, overalls, mackinaw coats, etc., and except clothing for infants and children up to the age of 6 years. Regular hours are limited to 44 per week.

Employees of "stock manufacturers" are divided by classes, as follows: Class A, skilled cutter and head operator; class B, finish presser; class C, pocket operator and front pocket and back pocket maker on pants; class D, skilled trimmer, edge taper, 1st operator on vests and 2nd operator on vests; class E, shaper and leg and bottom presser on pants; class F, seamer on pants, top stitcher on pants, lining maker on pants, waistband maker on pants, fitter, under-baster, top collar baster and finish presser on vests; class G, lining maker, edge stitcher, joiner and pocket tacker, shoulder joiner, general operator, gorge sewer, fitter on vests, top presser on pants and chopper; class H, edge presser, edge baster by hand, lining baster, facing baster by hand, collar setter and examining brusher; class I, shoulder and undercollar baster, alteration tailor, seam presser, under presser and back presser on

vests, pocket maker and outside seamer on boys' longs, shorts and bloomers and lining sewer and stitcher on boys' shorts, longs and bloomers; class J, sleeve maker and separator of coats; class K, buttonhole maker (machine), edge baster (machine), fitter on pants, trimming maker on pants, seam presser on pants, separator of vests and ticket pocket maker; class L, facing and bottom tacker, special machine operator, lapel and collar padder, facing baster (machine), armhole serger, lining and back maker on vests, operator on vests, baster on vests and separator of pants; class M, canvas baster (machine), special machine operator on pants, buttonhole maker (hand), canvas baster (hand), finisher and button sewer; class N, bottom trimmer on pants, thread marker, canvas maker (machine), buttonhole tacker, binder, cleaner and basting puller, pocket and piecer on vests, general helper and busheller on pants.

69799—12

Any employer may submit to the advisory board the name of any employee who has less than the average skill and ability, and the board may set a special wage rate for such employee for a defined period. In the case of employees performing more than one operation they are to receive the wage rate for the highest classification of work they perform, unless a special rate is fixed by the advisory board.

Women's Cloak and Suit Industry, Province of Ontario.—The schedule made binding by Order in Council under the Act for the women's cloak and suit industry, that is the manufacture, for females, of cloaks, coats or suits and of woollen skirts of specified weight was summarized in the Labour Gazette, February, 1937, and February, 1938. The terms of this schedule relating to working hours and minimum wage rates are the same as in the agreement which is in effect in the province of Quebec and is summarized above under the Collective Labour Agreements Act, except that the provisions relating to apprentices are not in the Ontario schedule, and except that the Board set up under the Industrial Standards Act is to determine rates for handicapped workers.

Manufacturing: Miscellaneous Wood Products

Furniture (Wood) Industry, Province of Ontario.—Under the schedule made binding for this industry for the whole province (Labour Gazette, June, 1938, and April, 1937), the manufacture of all wood products known as furniture for houses, offices, schools, churches, theatres, institutions and public buildings, radio cabinets and frames for upholstered goods, is included. The province is divided into two zones: zone B includes the cities of Toronto, London, Woodstock, Kitchener, Guelph, Hamilton, St. Thomas and Stratford and the areas adjacent to them; zone A is the rest of the province. Regular hours are limited to 47 per week.

MINIMUM HOURLY WAGE RATES IN FURNITURE (WOOD) INDUSTRY

—	Zone A	Zone B
	cents	cents
Skilled workers	47	49
Semi-skilled workers	37	39
Unskilled workers	32	34
Average for above three classes	37	39
Beginners commencing under 21 years of age*—		
First year	18	18
Second year	21	21
Third year	24	24
Fourth year†	27	27

*The total of these employees may not exceed 20 per cent of the total number of employees in the plant nor 25 per cent in case of plants in which more than half of the production consists of wooden chairs.

†After four years' experience such employees must be classed as skilled, semi-skilled or unskilled workers as shown above.

Manufacturing: Miscellaneous Products

Jewellery Manufacturing Industry, Toronto.—The schedule for this industry at Toronto (Labour Gazette, September, 1938) provides for a 44 hour week except during June and July when there will be a 40 hour week. Minimum hourly wage rates are: casters, jewellers, press hands, stampers and polishers, 70 cents per hour except when working full time at hand made platinum work, for which they are to be paid at $1 per hour; setters who are not employed on a piece work basis and engravers 82½ cents per hour. A scale of piece rates is included for setters, as well as conditions and wage rates for apprentices.

Construction

Building Trades.—Schedules governing wage rates and hours in the building trades in various localities, which are in force under the Act, have been summarized in the Labour Gazette during 1935, 1936, 1937 and 1938. The schedules apply to the immediately surrounding district as well as to the city named. The wage rates and hours for journeymen stated in these Orders are given in the accompanying table. (Apprentices are to be employed according to the conditions of the Ontario Apprenticeship Act.)

Transportation and Public Utilities: Water Transportation

Coal Hoisting Industry, Toronto.—This schedule covers the work in Toronto usually performed by operating engineers, firemen and oilers in connection with the unloading of coal from boats and the handling of coal in or about dock warehouses or dock yards (Labour Gazette, September, 1938). It provides for a 54 hour week for engineers and a 60 hour week for firemen and oilers. Minimum hourly wage rates are: Engineers operating locomotive and crawler cranes with any kind of motive power 85 cents, engineers operating truck cranes with any kind of motive power 75 cents, firemen and oilers 55 cents.

Transportation and Public Utilities: Local Transportation

Taxi Drivers, Toronto.—These are covered by a schedule which provides for an 11 hour day and a 66 hour week (Labour Gazette, September, 1938). The minimum wage rate for all drivers is 25 per cent of the fares earned by the driver, with a minimum of $12.50 per week; the minimum rate for despatchers, $15 per week; for spare drivers 25 cents per hour with at least 5 hours' pay each day they are called to work.

Trade

Coal Drivers and Handlers, Toronto.—The storage warehousing, transfer and delivery of all kinds of coal and coke at Toronto is covered by this schedule (Labour Gazette, May, 1938). Minimum hourly wage rates for boat trimmers, stackers on conveyors, truck drivers and teamsters 50 cents, yardmen 45 cents, truck drivers' helpers 40 cents. For those working on piece rates, tonnage rates are set for delivery of coal or coke from the docks and from retail yards.

Service: Business and Personal

Barbering Trade.—The accompanying table shows minimum wage rates for barbers established by schedules under this Act. The rates there shown are for those employed full time, and in all cases minimum prices which must be charged for each operation are included in the schedule. Special provision of higher proportionate rates are stipulated for barbers working part time.

SASKATCHEWAN

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The Saskatchewan Act was summarized in the LABOUR GAZETTE, June, 1937, page 635 and May, 1938, page 507. The following schedules have been made binding under this Act:—

Manufacturing: Vegetable Foods

BAKERS, MOOSE JAW.—A schedule for the baking industry in the city of Moose Jaw (LABOUR GAZETTE, December, 1938) provides for a 54 hour week and the following minimum weekly wage rates: foreman $30, doughman $25, ovenman and bench hand $23, shippers $18, bakery salesmen $18 or a specified commission on sales, whichever is greater.

Manufacturing: Miscellaneous Products

JEWELLERY WORKERS, SASKATOON.—These workers are covered by a schedule (LABOUR GAZETTE, November, 1938), which provides for a 47 hour week from April to August inclusive and 51 hours from September to March inclusive. Minimum weekly wage rates are $18 for employees with at least five years bench experience and $15 for those with less experience but who are not apprentices.

SIGN PAINTING, MOOSE JAW.—A schedule for sign painters at Moose Jaw (LABOUR GAZETTE, January, 1938), provides for a 44 hour week and minimum wage for experienced sign painters of 65 cents per hour or 42 per cent of the amount taken in at the job prices specified in the agreement, whichever is greater; sign shop helpers to be paid a minimum wage of 40 cents per hour.

Construction

The following hours and wage rates were in effect under schedules for the following trades at the end of the year 1938:

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN SASKATCHEWAN

—	Minimum wages per hour	Hours per week
	$	
Regina—		
Bricklayers, stonemasons and tilesetters	1.10	44
Carpenters	.75	44
Electrical workers	.90	44
Painters, paperhangers and decorators	.65	44
Painters (spray)	.80	44
Plumbers	.90	44
Sheet metal workers	.75	44
Sheet metal workers' helpers	.40	44
Moose Jaw—		
Painters, paperhangers and decorators	.65	44
Painters (spray)	.80	44

Transportation and Public Utilities: Local Transportation

TAXI DRIVERS, REGINA.—This schedule (LABOUR GAZETTE, March, 1938) provides for a maximum day of 12 hours including one hour's rest, and a 6 day week. Minimum wages are $13 per week guaranteed, plus 30 per cent commission on all receipts over $45 taken in by the driver in a week.

DRAYING, TRANSFERRING AND STORAGE INDUSTRY, REGINA.—This industry includes public warehousing and the hauling or transferring of merchandise or household goods except if done by the regular employees of a manufacturer or merchant. It is covered by a schedule which provides for a 48 hour week and a minimum wage rate of $18 per week, or, for part time work, 35 cents per hour (LABOUR GAZETTE, May, 1938).

Service: Business and Personal

SHOEMAKING AND REPAIRING, REGINA.—For the city of Regina a schedule in effect (LABOUR GAZETTE, December, 1938), provides for a 52 hour week with a minimum wage of $18 per week or payment according to a specified minimum scale of piece work, whichever is greater; inexperienced employees from $7.50 during first six months to $13.50 during second year.

BARBERS AND HAIRDRESSERS.—The minimum wage rates and hours shown in the accompanying table were binding by Orders in Council for these trades at the end of 1938. In all cases the minimum weekly wage is either the stated minimum rate or a percentage of the proceeds taken in by the barber or beauty parlour employee, whichever is greater. The hours are those for which the minimum wage rate is payable.

ALBERTA

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The text of the Act was published in the Labour Gazette, June, 1935, page 534, with amendments noted in the issues of June, 1936, page 501, June, 1937, page 640 and June, 1938, page 663. The following notes give information as to schedules of wages and hours in effect at the end of 1938:—

Agriculture

Honey Producing Industry, Coaldale, Taber, Vauxhall Zone and Eastern Irrigation Zone.—In these zones, which are in the vicinity of Lethbridge, hours for the honey producing industry are limited to 9 per day for male employees and 48 per week for female employees (Labour Gazette, June and September, 1938). Minimum wages per day are: for field work—$2.50 and $2.70 for men; for extraction work including packing and shipping—$2.25 and $2.70 for men, $2 and $2.25 for women, and $1.80 for boys and girls over 16 and under 21 years. For monthly employees, the minimum wage in addition to board and room is $30 for men with less than one year's experience and $50 for those with more experience. In addition, bonuses are provided for if the average production exceeds a certain amount and the price of honey is not less than a certain amount.

Logging

Lumbering Industry, Flatbush, Chisholm, Spurfield and Faust Zones.—A schedule (Labour Gazette, January, 1939) regulates wages and hours for logging, railway tie contractors, sawmills, planing mills and box factories. Hours are 60 per week for all workers except cooks, teamsters, millwrights, river drivers and certain other classes. Minimum monthly wages to be paid in addition to board and lodging include $50 or $75 for cooks, $50 for blacksmiths and engineers, $35 for tractor drivers, $32.50 for scalers, $26 to $30 for certain other classes.

Manufacturing: Vegetable Products

Baking Industry.—Schedules were in effect for bakers in the Edmonton and Calgary districts at the end of the year. For Edmonton (Labour Gazette, December, 1938), hours are 52 per week, and minimum wages $25 per week for doughmen, ovenmen and bench hands, $19 for helpers and truckers, $20 for shippers, $13.50 for cake wrappers and $15 for bread wrappers. For Calgary (Labour Gazette, December, 1938), hours are 52 per week and minimum wages $26 per week for doughmen and ovenmen, $24 for bench hands, $18 for helpers.

Manufacturing: Miscellaneous Wood Products

Sawmill, Planing Mill and Box Factory Employees.—These are included in the schedule noted above under "Logging".

Manufacturing: Metal Products

Welding Industry.—For the city of Edmonton and within 10 miles of it, a schedule for the electric and oxy-acetylene gas welding industry (Labour Gazette, July, 1938) provides for a 49 hour week, with a minimum wage rate for electric and oxy-acetylene gas welders and cutters of 45, 60 and 70 cents per hour depending on class of certificate held. For Calgary (Labour Gazette, August, 1938), hours are 44 per week and minimum wage rates 50, 60 and 70 cents per hour depending on class of certificate held by the welder.

Construction

The following hours and wage rates were in effect under schedules for the following trades at the end of the year 1938:—

HOURS AND MINIMUM WAGE RATES FOR CERTAIN BUILDING TRADES IN ALBERTA

—	Minimum wages per hour	Hours per week
	$	
Edmonton—

Calgary—		
Lathers (metal)	.90	40
Lathers (wood)	.75	40
Plumbers	.95	40

* Piece work also and special rates for certain classes of work.

Transportation and Public Utilities: Local Transportation

Taxi Drivers.—At Edmonton, a schedule (Labour Gazette, September, 1938) provides for an 11-hour day, a 6-day week and a 66-hour week. Minimum wage rates during winter months are $15 per week plus 25 per

cent commission on all receipts in excess of $60; for summer months, $12.50 per week plus 25 per cent commission on all receipts in excess of $50 per week. At Calgary (Labour Gazette, February, 1938), hours are also 66 per week. The minimum wages are $12.50 per week of 66 hours plus 25 per cent commission on all receipts in excess of $50 per week. At Banff National Park (Labour Gazette, August, 1938), hours for taxi and bus drivers are 11 per day, 7 days per week, for a period not exceeding three consecutive weeks. Days of rest to be provided on the basis of one day in seven. Minimum wages are $14 per week of 66 hours plus a bonus of 4 cents per mile to drivers of touring cars and of 5 cents per mile for bus drivers for all mileage in excess of 350 per week.

Service: Recreational

Bowling Alley Employees.—At both Edmonton (Labour Gazette, April and September 1938) and Calgary (Labour Gazette, February and September, 1938), hours for pinsetters are restricted to 54 per week with wages based on 2½ cents per line for five pins and 3½ cents per line for ten pins.

Department of Trade and Industry Act

Under this Act and its amendments (Labour Gazette, April, 1934, page 305, May, page 442 and November, page 986; June, 1936, page 502, November, page 997; June, 1938, page 634), this department may call a conference of any trade to draw up certain trade standards including minimum wages and hours. If such code is approved by a majority of persons in the trade or by persons owning over 50 per cent of the aggregate capital invested, they may be made binding by Order in Council on everyone carrying on the trade. Although a number of such codes were made binding only one includes provisions as to wages:

Service: Business and Personal

Barbers, Province of Alberta.—This code which came into effect February 15, 1937, and was amended from February 27, 1937 and August 15, 1938 (Labour Gazette, October, 1938, page 1093) applies to barbers throughout the province. It is provided that a journeyman barber employee receive "60 per cent of his gross weekly receipts for services rendered," but in no case less than $15 per week or $3.50 for Saturday or $3 for any other week day; part time work must be paid at 40 cents per hour.
